

**VII. PERMIT TRANSFERS FROM ALASKA LOCALS TO
OTHER RESIDENT TYPES**

VII. PERMIT TRANSFERS FROM ALASKA LOCALS TO OTHER RESIDENT TYPES

Local Alaskan permits, which are the combined permits from Alaska rural local (ARL) and Alaska urban local (AUL) resident types, are the focus of this section. Alaska local permits are defined as those permits held by persons who reside in the area near a limited fishery. Since 1975, 79.1% (13,166 transfers) of all transfers from local Alaskans were made to other local Alaskans. The remaining 20.9% (3,480 transfers) were made to other resident types (Table 5). Tables in this chapter provide information on the cross-cohort transfers between Alaska local permit holders and other resident types. They are similar to tables in the previous section on Alaska rural locals.

Transfer Activity Away From Alaska Locals

In every year from 1977 through 1996, the number of permits held by Alaska locals declined as a result of transfer activities with the nonresident and nonlocal resident types (Table 29). Over the 1975-2004 time period Alaskan locals transferred 3,480 permits to other resident types. Alaskan locals received 3,068 permits from other resident types which resulted in a net decrease of 412 locally-held permits. Total net decreases were greatest in the years 1979 through 1986. Since 1997 Alaska locals have gained permits in each year as the net result of permit transfer. The largest gain was in 2000, when Alaskan locals gained 68 permits.

In the 1975 to 2004 time period, the net increases within the other resident types were 207 permits to Alaska urban nonlocals (50.2%), 53 permits to nonresidents (12.9%) and 84 permits to Alaska rural nonlocals (20.4%). Transfers to the DCED or CFAB through loan foreclosures and subsequent resale by these agencies are responsible for net decrease of 68 (16.5%) Alaska local permits.

The cumulative numbers of transfers to and from Alaska local permit holders are presented for each permit type in Table 30, and by permit type and year in Appendix E.¹ By the end of 2004, transfer activity resulted in a net decrease of permits held by Alaska locals in 26 permit types and net increases to Alaska locals in 33 permit types.

¹ Note that if there have not been any transfers for a particular permit type, that permit type will not be listed on the tables.

The greatest decreases in the number of permits held by Alaska locals have been in the Bristol Bay salmon permit types (398 permits), the Prince William Sound salmon permit types (107 permits), the Peninsula/Aleutian salmon permit types (86 permits), and the hand troll permit type (46 permits). The net local shift in the Bristol Bay salmon permit types was highest in the late 1970s and early 1980s, but this shift has been reduced in the 1989-2004 period for the Bristol Bay salmon drift fishery and it reversed for the Bristol Bay salmon setnet fishery. From 2000 through 2003, Alaskan locals gained permits each year in the Bristol Bay salmon setnet fishery as the net result of permit transfer. (Appendix E).

The power troll permit type showed the largest gain (131 permits) in number of permits to Alaska locals.

The relationship between transfer parties by permit type and year is presented in Table 31. Statewide, 63.3% of the survey responses indicating transfers from Alaska local residents to other resident types during the 1980-2004 period, were between people who had no pre-existing relationship (1,736 out of 2,744).²

Permit Financing Methods

Transfer acquisition methods are presented in Table 32. From 1980 to 2004, 75.9% of the transfers from Alaska locals to other resident types recorded on surveys were sales (2,084 of 2,744 transfers). Cross-cohort transfers appear more likely to be transfers between people without a pre-existing relationship and therefore are more likely to be sale rather than gift transactions.

Sources of permit financing are shown in Table 33 for 2,084 purchases where nonlocal buyers acquired permits from Alaska locals. For all permit types combined, 71.2% of the permit sales from 1980 to 2004 were financed through the personal resources of the transfer recipient. This figure is higher than the amount of self-financing by transfer recipients over all resident types (62.2%), reported in Table 22.³ However, both tables indicate that since 1980 the use of personal assets to buy permits has increased.

² The relationship question in the Transfer Survey form was reworded in October of 1983 from “friend” to “personal friend.” This rewording may be responsible for a portion of the increase in the percentage of “other” responses.

³ Note that Table 22 includes both cross-cohort and intra-cohort permit purchases for each resident type.
