# *Introduction*

**A**laska's fishing industry needs active support from both the private and public sectors in order to achieve biological and economic stability. This industry has existed as long as commerce has been practiced in Alaska. Seafood harvest is such an integral part of Alaska people often assume it will always be healthy, despite swings in volume and price. Current conditions facing the industry are so critical, survival of the industry as we know it, cannot be taken for granted. World seafood markets are recasting, and change is inevitable.

Fishing has been our heritage and can be our future but solutions must be devised to counter expanding competition from farmed salmon, detrimental effects of natural forces, erratic seasons, and soft markets created by the glut of fish products.

Though commercial fishing is one of the largest industries in the state, it is overwhelmingly comprised of small business operations. The largest share of Alaskan fishing vessels represent individual small businesses whose annual gross earnings pay crew shares, food, fuel, gear and other supplies as well as debt overhead and insurance costs. Each year the seafood industry pumps in excess of \$3 billion into the state's economy.

---

---

---

---

***The largest share of Alaskan fishing vessels represent individual small businesses whose annual gross earnings pay crew shares, food, fuel, gear and other supplies as well as debt overhead and insurance costs.***

---

---

---

The importance of the seafood industry to the state of Alaska cannot be overstated. If Alaska were a nation, it would rank among the top ten worldwide seafood producers . . . ahead of Norway, Canada, Iceland and other countries renowned as fishing nations.

Just as the salmon industry's value to the state cannot be overstated, we must never forget the negative impact created by record low prices. Each 1 cent per pound decline in the average statewide salmon price represents a loss of approximately \$7 million in ex-vessel payments to fishers. Each dime reduction in prices represents a loss of approximately \$70 million, and a \$4.5 million loss in tax revenues and assessments to the state and municipalities.

---

---

***If Alaska were a nation, it would rank among the top ten worldwide seafood producers . . .***

---

---

The Alaska State Legislature was foresighted when it took a bold step by adopting the Limited Entry Act in May of 1973. The Act created a resource agency "to promote the conservation and the sustained yield management of Alaska's fishery resource and the economic health and stability of commercial fishing in Alaska by regulating and controlling entry into the commercial fisheries..." AS 16.43.010(a).

The Commercial Fisheries Entry Commission (Commission) became the exempt, independent, quasi-judicial agency to carry out the mandate. Beyond its function as a regulatory agency, the Commission provides a pivotal resource development tool. Today, over 50 of Alaska's fisheries are under limitation and additional requests for limitation are pending. The Commission plays an important role in the development and economic growth of Alaska's fisheries, contributes to the State's general fund, and provides data and analysis on a variety of fishery

---

issues. The Commission is an essential component of fisheries management and Alaska's three billion dollar industry.

When creating the limited entry system, if the legislature had been committed only to simplicity and economy, it could have conducted a lottery or simply authorized auctioning a limited number of property rights to its fisheries. But the legislature rejected these approaches because they lacked consistency with the State's most important objective of protecting the resource and those who rely on the harvest of the resource. The Limited Entry Act protects the interest of qualified, individual fishers who demonstrate tangible dependence on their fishery.

Extensive biological, economic, historic, and cultural data and analyses have been generated to aid the development, enactment and review of entry limitation in Alaska. Thousands of hours of hearings throughout the State helped form the choices made in shaping Alaska's limited entry system. Alaska's courts have carefully scrutinized the program and developed an extensive and unique body of law governing limited entry in Alaska.

This governing body of law has successfully upheld an intent of the legislation to keep the permits in the hands of those who most depend on their fisheries for their livelihood. The percentage of permits held by Alaska residents has remained relatively stable. Today, more than 77% (more than 10,000) of all limited entry permits are still held by Alaskans, and more than half of that number by rural Alaskans.

---

---

***Today, more than 77% (more than 10,000) of all limited entry permits are still held by Alaskans, and more than half of that number by rural Alaskans.***

---

---

---

Absent limited entry, many of the state's high-valued fisheries would experience large increases in effort by new entrants from several states. Such increases in effort would raise management costs and likely threaten the resource and the livelihood of many Alaskans in coastal communities where commercial fishing is the cornerstone of the economy. Unchecked growth in commercial fishing would also threaten subsistence and other uses of the resource.

The Commission is concerned about the economic plight of commercial fisheries during these troubled times and particularly efforts by the Internal Revenue Service (IRS) to force the sale of entry permits from local fishers who most depend on their fisheries.

Together with the Division of Investments, the Commission helped create the Tax Obligation Loan Program as a means for fishers to settle federal tax obligations and protect their fishing privileges. The Commission has supported statewide efforts between the public and private sector to perform outreach to inform fishers of this unique program.

In addition to responding to these current and pressing issues, the Commission has continued to perform its primary functions to license fishers, adjudicate claims, and perform research critical to the industry, as detailed in the sections to follow.

Broad support from both the private and public sectors is absolutely necessary to enable the industry to rebound to a level of economic health and stability. As a food source important to our State and the world, Alaskans must set a course to ensure our fisheries are sustained through sound management and wise commercial development. Fortunately, Alaska stands at the threshold of a new

---

---

---

---

century . . . older and more mature, but young  
enough to believe that our best days are ahead of us.  
We at the Commercial Fisheries Entry Commission  
renew our commitment to apply the tools we have  
been given toward that goal.

*Major Decisions/Activities Affecting Agency Operations  
Fiscal Years 1996-1988*

**Fiscal Year 1996**

- ➔ Conducted research, held public hearings and adopted regulations limiting the Southeastern Alaska Dungeness crab, the Prince William Sound sablefish, and the Southeastern Alaska shrimp pot fisheries.
- ➔ Conducted research, held public hearings and adopted regulations establishing point systems and an application period for the Southeastern Alaska Dungeness crab and the Cook Inlet Dungeness crab fisheries.
- ➔ Received petitions to limit additional fisheries and began required analysis.
- ➔ Commission staff participated in the Koliganek Economic Development Council meetings.
- ➔ A member of the Commission served on the Child Support Enforcement Division's Rural Task Force, concerning child support and Alaska fishers.
- ➔ The legislature adopted HB 297 which raised the annual vessel license fee based on overall length; revenue generated by the increased fees goes to Fish and Game management of fisheries resources.
- ➔ The legislature adopted HB 547 which established a four year moratorium on entry into Southeast Alaska dive fisheries.
- ➔ The legislature adopted HB 538 which established a four year moratorium on vessels participating in the Bering Sea Korean hair crab fishery and authorized the Commission to develop a vessel permit limited entry program.
- ➔ The legislature adopted SB 42 which gives the Commission the authority to propose stacking (an individual could hold more than one permit up to limits set by the Board of Fisheries).
- ➔ The Commission issued the Carle decision, which denied a request by the

---

IRS to transfer a Southeast Alaska salmon purse seine entry permit to the highest bidder in a forced permit auction held in December.

- ➔ Representatives from the Commission, other state agencies and Senator Steven's office met with the IRS to explore means to help permit holders achieve voluntary tax compliance and to eliminate forced sales of limited entry permits.
- ➔ Commission statutes, regulations, public notices, transfer survey, and staff's email addresses became available to users of the Commission's WWW internet site.

**FY95:**

- ➔ Conducted research, held public meetings and adopted regulations limiting the Northern and Southern Southeast herring spawn-on-kelp pound fisheries.
- ➔ Held public meetings in Southeast Alaska to discuss the future of the moratorium in the Southeastern dungeness crab fisheries.
- ➔ Received petitions to limit additional fisheries and began required analysis.
- ➔ A member of the Commission served on an Alaska Federation of Natives (AFN) Task Force concerning the IRS and Alaska fishers.
- ➔ A member of the Commission served on a Bristol Bay Native Association Commission to address issues concerning limited entry.
- ➔ The Commission participated in the Governor's Salmon Strategy Task Force.

- 
- The legislature adopted SB 251 (Ch 62, SLA 1994), which authorized the existing Commercial Fishing Loan Program to lend up to \$30,000 to fishers in danger of IRS seizure and forced sale of their entry permits.
  - The Commission, together with the Division of Investments and the AFN, persuaded the IRS not to implement its new electronic levy program against those fishers eligible for the new loan program.
  - The Commission, together with the Division of Investments, the IRS, and AFN, developed and began outreach to implement the new Commercial Fishing Tax Obligation Loan Program.
  - The Commission's Bulletin Board System became available to Internet.

**FY94:**

- Adopted optimum number regulation for the Southeastern Alaska roe herring purse seine fishery. (Johns v. State, CFEC)
- Conducted research, held public hearings, and adopted regulations limiting the Cook Inlet dungeness crab fishery.
- Conducted research and prepared a report on the Southeastern Alaska dungeness crab fishery to assist in determining if some form of limited entry is warranted for the fishery following the moratorium.
- Participated in the AFN Task Force concerning the IRS and Alaska commercial fishers.
- The IRS filed suit against the Commission.
- Advocated legislation (SB 251) to expand the commercial fishing revolving loan fund to offer loans for past due federal tax obligations.

- 
- ➔ Developed new licensing system to run on the Commission's local area network (LAN) rather than the state mainframe computer.
  - ➔ Continued to defend state against elimination of nonresident fee differential. Carlson v. CFEC.

**FY93:**

- ➔ Completed optimum number study for the Southeastern Alaska roe herring purse seine fishery.
- ➔ Proposed optimum number regulation pursuant to the study.
- ➔ Conducted workshops related to getting and keeping limited entry permits in local communities.
- ➔ Commissioners and hearing officers each completed more than 100 adjudicatory decisions. Among the nearly 1,000 decisions issued since 1983, only one has been reversed by the Alaska Supreme Court.
- ➔ Conducted many research projects in response to requests from the Commission and others (for example, limited entry studies, Alaska Board of Fisheries (ABF), Alaska Department of Fish and Game (ADF&G), Governor's Office, fishing associations and Legislators).

**FY92:**

- ➔ Conducted workshops to help rural Alaskans in getting and keeping limited entry permits in their local communities.
- ➔ Completed initial classification of Western Alaska herring and Togiak herring spawn-on-kelp fisheries applications.

- 
- ➔ Continued an optimum number study for the Southeastern Alaska roe herring purse seine fishery.
  - ➔ Conducted research, held public hearings, adopted regulations and implemented a moratorium (in response to HB 137 from the previous year) in the Southeastern Alaska dungeness crab fishery (more than 300 eligible to apply).
  - ➔ Aided the ABF in its creation of a new open access salmon set net fishery around Atka Island for the 1992 season, for the commercial harvest of local pink salmon stocks.

**FY91:**

- ➔ Togiak herring spawn-on-kelp fishery point system adopted, application period began, approximately 500 applications were received. Initial classification of approximately half of the 1,813 Western Alaska herring permit applications completed.

**FY90:**

- ➔ Exxon Valdez oil spill continued to make demands on Data Processing and Research sections for services required to respond to legal activity.
- ➔ Western Alaska herring fisheries point systems finalized, and almost 1,100 applications received.
- ➔ Togiak herring spawn-on-kelp fishery researched, hearings held, and fishery limited.

---

**FY89:**

- ➔ Research and hearings on Western Alaska herring fisheries point systems.
- ➔ Wassillie settlement finalized; processing of 273 applications began.
- ➔ Alaska Supreme Court decision in Johns case; extensive research and data analysis for optimum number determinations began.
- ➔ Exxon Valdez oil spill in Prince William Sound created significant demand for Data Processing services to assist affected fishers.

**FY88:**

- ➔ Research and hearings on Prince William Sound herring spawn-on-kelp pound fishery point system and processing of 140 applications began.
- ➔ Processing of 213 applications for the Southeastern sablefish fisheries began.
- ➔ Western Alaska herring fisheries researched, extensive hearings in Western Alaska villages held, and five fisheries limited.

---

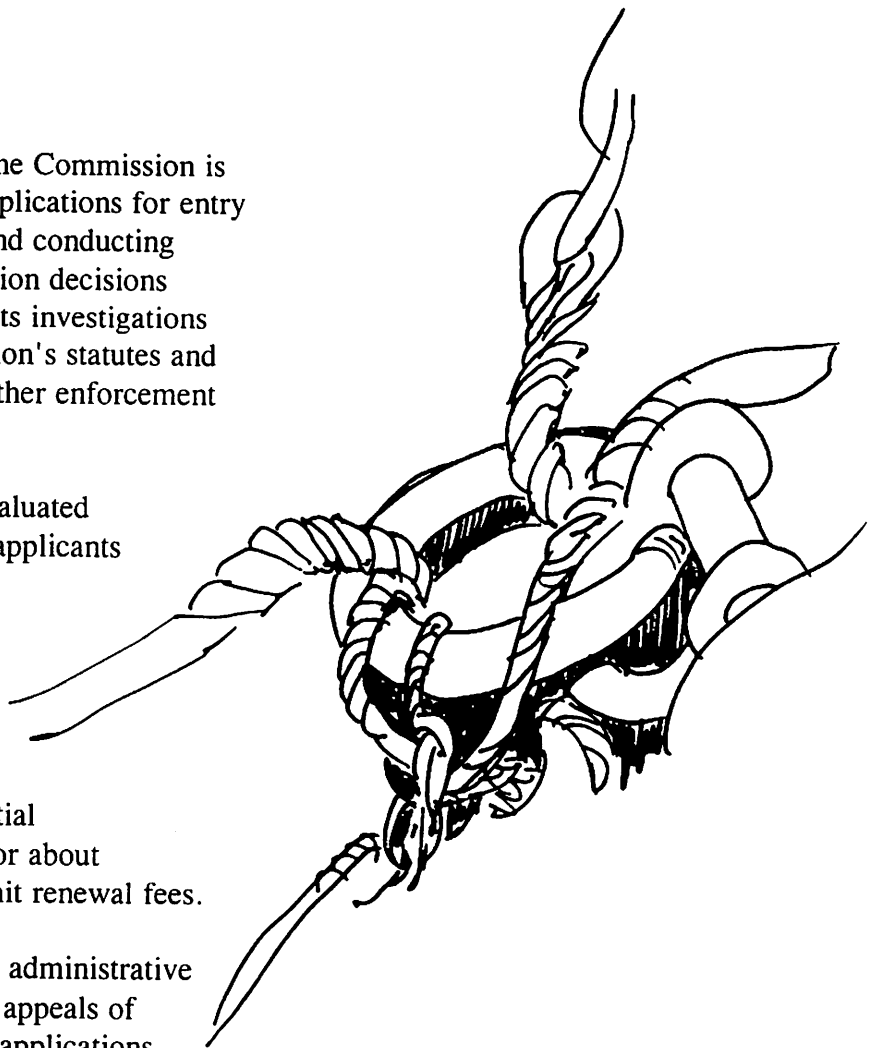

# *Adjudications*

## *Overview*

**T**he Adjudications Section at the Commission is responsible for processing applications for entry permits in limited fisheries and conducting hearings for those who contest Commission decisions affecting them. The section also conducts investigations into potential violations of the Commission's statutes and regulations, and provides assistance to other enforcement agencies.

Entry permit applications are first evaluated by Commission paralegals who classify applicants in a ranking system that measures each applicant's past participation and economic dependence on the fishery. Applicants who disagree with their initial classifications may request hearings. Hearings are also available to contest initial decisions about permit transfer requests or about qualifications for reduced (poverty) permit renewal fees.

Commission hearing officers conduct administrative hearings throughout the State and decide appeals of initial determinations about entry permit applications, permit transfer requests, and fee arrearages charged to those who wrongly claimed to be Alaska residents. The Commissioners review and affirm or modify hearing

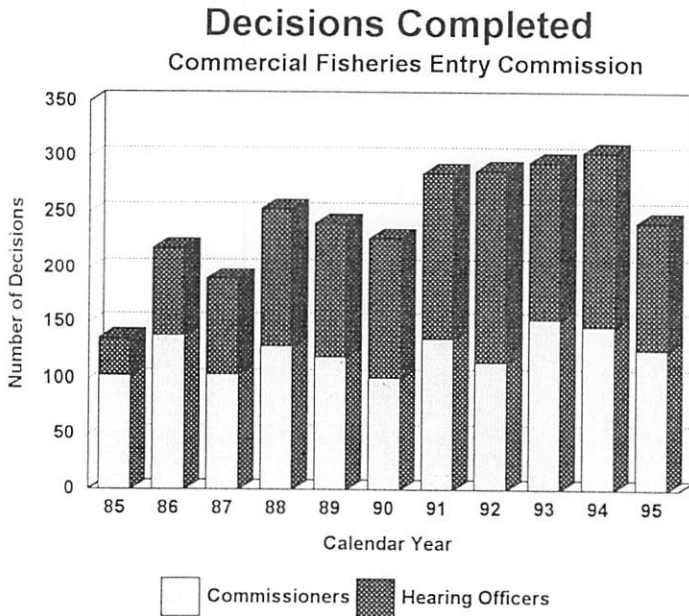

officers' decisions on their own motion, or upon the request of an affected party.

Commission hearing officers also preside in "show cause" hearings. These hearings are held in the presence of the Commissioners. In these proceedings, the Commission may impose fines, or revoke or suspend the permits of those who attempt to mislead the Commission with false information.

During 1995, Commission paralegals conducted hearings and decided appeals of denied emergency transfer requests.

### *Administrative Proceedings and Decisions*

The hearing officers conducted 55 hearings in 1995: 10 on permit applications, 42 on permit transfers, and 3 on miscellaneous actions. The hearing officers issued 115 decisions: 70 on permit applications, 40 on permit transfers, and 5 on miscellaneous actions. At the end of the year, 450 cases were in various stages leading up to the issuance of a decision by a hearing officer.

---

The Commissioners adjudicated a total of 126 cases during 1995: 60 permit applications, 45 permit transfers, 1 fine and 20 miscellaneous actions. At the end of the year, 212 cases were in various stages of the adjudication process leading to the issuance of final decisions by the Commissioners.

### *Judicial Rulings and Appeals*

The Alaska Supreme Court issued two decisions on limited entry permit applications during 1995:

In *Lewis v. State*, CFEC, 892 P.2d 175 (Alaska 1995), the court addressed Lewis' applications for herring purse seine permits for Prince William Sound and Cook Inlet. On the Prince William Sound application the court upheld the Commission's interpretation of AS 16.43.260 requiring an actual physical harvest--bringing the resource under physical control--to be eligible to apply for an entry permit. On the Cook Inlet application the court found Lewis' evidence proved he qualified for credit for owning a herring purse seine.

In *Dominish v. State*, CFEC, 907 P.2d 487 (Alaska 1995), the court held there were no violations of the applicant's due process rights. Dominish requested and received a written administrative hearing. He was later offered an additional hearing but he waived it. The court upheld the Commission's denial of Dominish's point claims and application.

---

## ***Commission Efforts to Help Individual Fishers in Financial Crisis***

In order to help individual fishers respond to financial crises and protect their fishing privileges, the Commission has participated in the new Rural Task Force sponsored by Child Support Enforcement Division of the Department of Revenue, The Bristol Bay Native Association (BBNA) Commission on Limited Entry, and the Alaska Federation of Natives Task Force on the Internal Revenue Service (IRS). The Commission also works closely with the Division of Investments, Department of Commerce, the Commercial Fishing and Agriculture Bank, and the Alaska Business Development Center. Additionally, with the Commission's encouragement, the Bristol Bay Economic Development Corporation and the BBNA together established the Bristol Bay Permit Brokerage. These collaborations all help the Commission provide referrals for commercial fishers facing serious financial problems.

---

---

***... collaborations all help the Commission provide referrals for commercial fishers facing financial problems.***

---

---

---

---

***Despite this cooperation, over the state's objection, the IRS attempted a force sale of three entry permits shortly before Christmas of 1995.***

---

---

The Commission also continues to cooperate with the IRS in an effort to help permit holders achieve voluntary federal tax compliance. The Commission's efforts have included support for the Fisher's Tax Obligation Loan Program administered by the Division of Investments.

Despite this cooperation, over the state's objection, the IRS attempted a forced sale of three entry permits shortly before Christmas of 1995. Subsequently, in early 1996, the IRS applied to the Commission for transfers of the permits to the successful bidders. During the course of the Commission's review of IRS' applications, one buyer withdrew and obtained a refund of his bid from the IRS. The Commission denied a second application based upon

---

the buyer's ineligibility. With respect to the third application, the Commission decided in *Carle*, CFEC 96-003-P (1996), to deny the transfer.

Subsequently, Senator Ted Stevens, as Chairman of the Senate Governmental Affairs Committee, conducted an oversight hearing on the IRS and arranged for a meeting in Anchorage that included the Commission and IRS Commissioner Margaret Milner Richardson. Following the meeting, the Commission and the IRS have continued a dialogue. On occasions the IRS has called the Commission concerning particular permit holders who may be facing IRS enforcement. The Commission, in turn, has been able to call upon people in the field like the Bristol Bay Permit Brokerage and the Alaska Business Development Center to intervene and help permit holders make arrangements with the IRS to avoid harsh enforcement.

Cooperation between the IRS and the State to implement the State's Tax Obligation Loan Program is required by a written Memorandum or Understanding (MOU). This cooperation under the MOU has so far generated more than \$4 million in revenue to the IRS. Nonetheless, contrary to its commitment in the MOU, IRS gave the State only two days notice and scheduled the forced sale of two entry permits shortly before Christmas of 1996.

# Licensing

**T**he licensing section at the Entry Commission is responsible for issuance of the annual permits and vessel licenses required for all fishers and vessels participating in Alaska's commercial fisheries, as well as related activities such as replacing lost or damaged licenses, changing vessel ownership and re-registering vessels for different areas or fisheries. Requests to permanently transfer permits, and to transfer them temporarily due to emergency situations, are also reviewed by staff within the licensing section. The workload is seasonal with the greatest volume of activity occurring between November and June. To accommodate the fluctuating demands of the workload, three of the eight positions within the section are seasonal, working only during the months of peak

**Licenses Issued By Month**  
Commercial Fisheries Entry Commission

---

demand. Due to the growing complexity of fisheries management programs and regulations and resulting increases in phone calls, the small staff has been hard-pressed to handle the load in peak periods during the past few years. Automated processing enables the licensing section to issue a large number of licenses in a short time, but the initial stages of processing involve a myriad of details and judgement calls. An unforeseen shortage of experienced staff occurred during the spring of 1995 when demands of the workload left little opportunity to train replacements. The effects made clear that it is the expertise and experience of the staff (most of whom have been here for several years) that normally enables the section to accomplish its tasks in an accurate and expeditious manner.

The licensing section constantly seeks means of improving efficiency and accuracy and streamlining procedures for fishers and staff. A project started late in 1995 involves conversion of the file room from an alphabetic system to numeric system. The Commission maintains approximately 40,000 files for permit holders active in recent years. It is already evident, even though the conversion is not completed, this change will significantly reduce the time required to file and retrieve documents, as well as improving filing accuracy.

### *Declining Permit Numbers*

The number of fishers licensed and permits issued in 1995 continued the decline seen during the past few years, which appears to be related to enactment of the federal IFQ program. However, there was a slight increase in the number of vessel licenses issued over the 1994 level, probably due to increased awareness among sport charter

---

operators and guides of the requirement to license vessels for those activities. A quick comparison of the numbers of permits and vessel licenses issued in the past few years follows:

	1991	1992	1993	1994	1995
Permits	32,524	32,219	29,511	28,633	27,153
Vessels	17,580	17,194	16,276	16,259	16,277
<b>TOTAL</b>	<b>50,104</b>	<b>49,413</b>	<b>45,787</b>	<b>44,892</b>	<b>43,430</b>
Fishers	17,944	17,635	16,561	16,408	15,853

### *Permit Transfers*

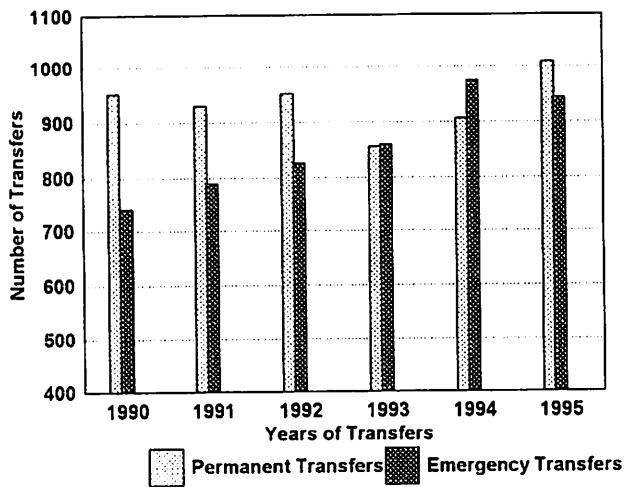

The Limited Entry Act provides for two types of permit transfers. Permanent transfers occur when a permit is sold, inherited or given as a gift. Emergency (temporary) transfers may be approved in certain instances when the permit holder is unable to participate in the fishery due to illness, injury, death or unavoidable hardships of a temporary, unexpected and unforeseen nature. Emergency transfers are typically approved for the duration of the emergency situation or the fishing season, whichever is shorter.

The licensing section receives requests for both types of transfers throughout the year, but emergency transfers occur primarily during or shortly before the fishing seasons, with the majority received from March through July. When an injury or illness is suffered in the midst of the fishing season, the permit holder and transferee may go

to the local office of the Department of fish and Game to complete a request for emergency transfer. Field office personnel then relay the pertinent information to CFEC transfer staff who determine if the transferee may commence fishing using a copy of the transfer form.

Since 1989, the annual number of transfer requests has risen with emergency transfers comprising most of the increase. In 1995, the total number of transfers requested was approximately 1,984. This was an increase over the 1994 total of 1,936, although the number of emergency transfers actually decreased for the first time in years while permanent transfers rose.

### Permanent and Emergency Transfers Commercial Fisheries Entry Commission

### *Number of Emergency Transfers in 1995*

946 emergency transfer requests were received during 1995, of which 210 were called in by field offices mid-season and 736 were received by mail. 861 emergency transfers were approved upon initial review and 11 were approved "conditionally" for a short period of time pending receipt of more information. 62 requests were denied on initial review. Of those denied, administrative hearings were requested in 37 cases; 27 of these were approved after hearings and 10 denials were upheld. 2 of those denials were later overturned and approved by the Commission on appeal. The final count of emergency transfers for 1995 was 901 approved transfers, 33 denials and 8 requests withdrawn.

---

## *Multiple Transfers During a Season*

Some permits are being emergency transferred multiple times during a season, usually due to schedule conflicts or disagreements between the parties over terms. The 946 emergency transfer requests received in 1995 involved 855 permits. Of these, 812 were transferred once, 39 twice and 4 transferred three times.

## *Permanent Transfers*

The transfer tables at the back of this report provide comparative information on numbers of transfers by fishery, year, and other criteria. The following figures indicate the numbers of transfers by type, as well as the number or requests denied. "Regular" transfers include voluntary transfers requested by permit holders which may be sales, gifts, trades, etc.. "Survivorship" transfers include permits transferred to a surviving spouse by right of survivorship after the permit holder's death. "Foreclosure" transfers are those by which a state-authorized loan agency (CFAB or DCED) repossesses a permit after the holder has defaulted on a loan.

CFEC regulations require the parties to a permanent transfer to disclose in writing all terms and conditions relating to the transfer request. Transfer staff review the bills of sale, contracts or other documents to ensure there are no provisions which violate the statutes or regulations, as well as checking the history of the permit and eligibility of the parties to transfer. Approximately 1,079 permanent transfer requests were reviewed during 1995, as illustrated here:

Permanent Transfers Completed	975
Regular	5
Survivorship	28
Foreclosure	7
Permanent Transfers Denied	43
Transfer Requests Withdrawn	26

---

***Licenses Issued for 1995***

\* Fees for limited entry permits may be waived in the event of season-long closures such as occurred in the PWS herring fisheries during 1994 and 1995.

---

### *Licensing Field Office Activities*

During 1995, staff from the licensing section again traveled to Dillingham and King Salmon to provide on-site assistance with licensing and permit transfers. As a result of the staff shortages in the Juneau office, field office service was limited to April 7-8 and 19-21 for the herring season and June 5 - July 15 for the salmon fishery.

The following table shows the number of licenses issued at field offices during 1995.

Field Office	Permits Issued	Vessels Licensed	TOTAL
Dillingham	149	81	230
King Salmon	299	183	482
<b>TOTAL</b>	<b>448</b>	<b>264</b>	<b>712</b>

In addition to issuing licenses, Commission staff in the field offices assisted with approximately 108 requests for emergency transfer of fishing permits. "User fees" collected from field office activities during 1995 totaled \$8,490.

# *Research*

## *Overview*

**T**he research section provides the background analyses and studies needed by the Commission. The section, coupled with the Commission's data processing section, also produces basic economic data on Alaska's fisheries which can be used to address many policy questions and produces standard or specialized reports to serve the data needs of users outside the agency.

In 1995, the Commission's research staff was involved in many projects. These projects included efforts to monitor trends in Alaska's fisheries, to evaluate the need for access controls in particular fisheries, and to provide other agencies and users with needed data and analyses.

The staff produced analyses on issues for the Legislature, the Office of the Governor, the Alaska Department of Fish and Game (ADF&G), and the Alaska Board of Fisheries (BOF). In addition, the staff answered numerous information and data requests from the general public. The following paragraphs provide brief highlights of major 1995 events for which the research section provided analyses and data support.

## ***New Amendment To The Limited Entry Act***

In 1995, the legislature amended the Limited Entry Act to allow the Commission to restrict the fishing capacity authorized under limited entry permits in newly limited fisheries. The legislation, CSHB 107 (FSH), amended portions of AS 16.43.270 and AS 16.43.150 and became effective on September 14, 1995. The bill was supported by the Southeast Alaska Dungeness Crab Association as a means to develop a more effective permanent limited entry program in their fishery.

---

---

***... the legislature amended the Limited Entry Act to allow the Commission to restrict the fishing capacity. . .***

---

---

---

Each year, the Commission receives petitions to limit entry into additional fisheries, as more fisheries face the threat of increased commercial fishing pressure. In recent years, the Commission has denied a high percentage of the petitions received. In some cases petitions have been denied because the Commission felt that the existing limited entry program would not do an effective job of controlling the growth of fishing capacity and effort after limitation.

***... as a means to develop a more effective permanent limited entry program. . .***

---

---

Alaska's limited entry law, AS 16.43, was written with the salmon fisheries in mind. The law essentially provided the authority to limit the number of permit holders (skippers) in a fishery. It worked well in fisheries where the gear or vessel size had been restricted by the Board of Fisheries prior to limitation and where participating operations were of a more full-time nature. In such cases, the harvesting operations in the fishery tended to be similar to each other and a program that limited the number of skippers did a reasonable job of containing the growth in fishing capacity and effort.

---

In fisheries where there are a wide range of vessel sizes and types of operations, and a broad mix of participants from small part-timers to more full-time operations, simply limiting the number of skippers will not do an adequate job of controlling the growth in fishing capacity. If a permit is issued to a skipper of a small part-time operation, that person can simply upgrade his/her fishing operation or sell the permit to someone who will run a bigger more full-time operation.

For this reason, the Commission had been reluctant to use the limited entry program in fisheries where such conditions exist. This new amendment to the limited entry law should provide the Commission with the flexibility to design programs that do a better job of containing post-limitation growth in fishing capacity. The law allows the Commission to adopt regulations restricting the fishing capacity associated with a limited entry permit based upon an applicant's past performance in the fishery.

### *New Limitations*

In 1995, the Commission made decisions to limit several fisheries and was petitioned to limit others. National Marine Fisheries Service's individual fishing quota (IFQ) program for sablefish and halibut also began in 1995. These new programs and the efforts of the North Pacific Fishery Management Council to rationalize the fisheries under their jurisdiction may lead to "spillover effects" and increases in effort in some of Alaska's unlimited fisheries in the near future. The following is a brief synopsis of new fishery limitations in 1995.

---

## ***Southeast Herring Spawn-On-Kelp Pound Fisheries***

In 1994, the Commission proposed regulations to limit the Northern Southeast herring spawn-on-kelp pound fishery which includes the area of the Hoonah Sound fishery and the Southern Southeast herring spawn-on-kelp pound fishery which includes the area of the Craig-Klawock fishery. These proposals were in response to petitions.

The public comment period on the limitation proposals ended on January 3, 1995. Based on the Commission's studies, ADF&G's support of limitation, and public testimony, the Commission adopted regulations to limit these two fisheries. Eligibility for interim entry permits was restricted to those who participated as permit holders and commercially harvested the resource prior to January 1, 1995.

The maximum number for the Northern Southeast spawn-on-kelp pound fishery was set at 109 and the maximum number for the Southern Southeast spawn-on-kelp pound fishery was set at 229 permits. The Commission hopes to propose point system regulations for these fisheries in 1996.

## ***Southeast Alaska Dungeness Crab Pot, Ring Net and Dive Fisheries***

Following passage of the new amendment to the limited entry law, the Commission proposed limitation for the Southeast Alaska Dungeness Crab fisheries. Since January 2, 1992 these fisheries had been under a temporary

---

moratorium on new entrants. The moratorium would have expired automatically on January 2, 1996 if the Commission had not acted.

The Commission's proposal included alternatives for a "tiered-pot level" limited entry system that would tie the number of pots a person could use to a measure of the person's past effort in the fishery during the eligibility period. The "tiered-pot level" concept was originally suggested by some Southeast Alaska Dungeness crab fishers. The regulations were proposed under the authority of the new amendment to the limited entry law cited above.

At the public hearings, most of the persons who testified suggested limited entry was needed and a return to open access would be disastrous to the fishery. The Department of Fish and Game also supported a permanent limitation.

Nevertheless, the fleet remained divided on how best to contain the potential increase in fishing capacity after limited entry. Some fishers supported different forms of the tiered-pot limitation proposals. Others felt all of the permits should contain exactly the same use-privilege. These latter fishers supported a standard limitation program with the Board of Fisheries lowering the overall pot limit to help contain the growth in fishing capacity.

At the end of the public comment period, the Commission met and considered the public testimony and available data. Based on public testimony, Commission research, and Department of Fish and Game support of limitation, Commission adopted regulations limiting the fisheries. The Commission established a maximum number of 308 for the Southeast Alaska Dungeness crab pot fishery, a maximum number of 3 for the Southeast Alaska

---

Dungeness crab dive fishery, and a maximum number of 8 for the Southeast Alaska Dungeness crab ring net fishery.

In the pot fishery, the Commission also adopted a slightly modified version of one of their original tiered-pot level proposals. Beginning with the 1997 season, Southeast Alaska Dungeness pot permits will be issued in one of 4 tier classes: 75 pots, 150 pots, 225 pots, and 300 pots. The holder of a pot permit will be able to utilize up to the number of pots allowed under the tier class on the holder's permit.

### *Prince William Sound Sablefish Fisheries*

In 1994 and 1995, the Commission received several letters from Prince William Sound sablefish fishers seeking limitation for the fishery. In the Fall of 1994, William R. Bechtol, who was then the Regional Groundfish Biologist for the Department of Fish and Game, also wrote a letter to the Commission concerning the immediate need for limited entry.

These letters all pointed to a potential dramatic increase in effort in 1995. The North Pacific Fishery Management Council's IFQ program for sablefish was scheduled to begin in 1995 and the Prince William Sound (PWS) sablefish fishery was the only remaining actively managed sablefish fishery that was still open access. The letters predicted a large increase in effort and participation in 1995.

The predictions about the 1995 season proved to be true as the sablefish harvest nearly doubled the harvest in the previous year. The number of fishing operations, vessels, and permit holders more than doubled. The upper

---

---

***Beginning with the 1997 season, Southeast Alaska Dungeness pot permits will be issued in one of 4 tier classes***

---

---

---

bound of the guideline harvest range was exceeded by 31 % in a short 48 hour opening.

Following the 1995 season, the Commission proposed regulations to limit the fishery. A public comment period on the proposals was held from September 1, 1995 to October 5, 1995. Public hearings were held in several communities.

At the end of the public comment period, the Commission met and considered the public testimony and available data. Based on the public testimony, Commission research, and the Department of Fish and Game's support of limitation, the Commission adopted regulations limiting the fisheries. The qualification date for the Prince William Sound sablefish fisheries is January 1, 1995.

The Prince William Sound sablefish fishery has been primarily a longline fishery, but landings have also been made on pot and trawl gear. Moreover, other gear types could potentially be used under regulations of the Alaska Board of Fisheries. The Commission decided to limit the fishery as three fisheries based on gear type.

The Prince William Sound fixed gear sablefish fishery was limited with a maximum number of 49. The fixed gear definition includes longlines and any other legal gear that uses a fishing hook. The Prince William Sound sablefish net gear fishery was limited with a maximum number of one. The net gear definition includes trawls and any other legal net gear. The Commission also limited the Prince William Sound sablefish pot gear fishery with a maximum number of one.

In addition, the Commission passed regulations limiting the fishing capacity of the permits issued for the Prince William Sound sablefish fishery. These regulations

---

(20 AAC 05.779-780) were passed under the authority of the new amendment to the limited entry law cited above.

Beginning with the 1996 season, permits will be restricted to one of four vessel length categories. The vessel length categories are 35 feet, 50 feet, 60 feet, and 90 feet. An applicant will be restricted to a vessel that is no longer than the maximum length allowed under the vessel class shown on the applicant's permit.

The Commission was concerned about limiting entry into the fishery without these additional constraints. At the time of limitation, there were no gear constraints or vessel size constraints in the dominant longline fishery. A similar situation existed in the Northern Southeast Inside sablefish longline fishery prior to limitation. After limitation the fishery was immediately inundated with larger vessels fishing greater amounts of gear and ADF&G was unable to manage the fishery to keep the harvest below the upper bound of the guideline harvest range.

Both the Commission and ADF&G hope that the new vessel category regulations will help to prevent this deleterious growth of fishing capacity and make the Prince William Sound fishery more manageable for resource conservation. If the new regulations achieve this purpose, the Prince William Sound sablefish limited entry program should be effective at helping to control fishing effort.

### *Southeast Alaska Pot Shrimp Fishery*

Beginning in 1995, the Commission began to receive petitions from pot shrimp fishers throughout Southeast Alaska. Fishers were concerned that both resource conservation and their economic livelihoods were

---

threatened by a dramatic increase in fishing pressure on the resource. The increase in fishing pressure had led to short seasons and emergency closures in some traditional fishing areas.

A new "heads-on" shrimp market, floating processors, and higher prices due to reduced world supply were leading to a rapid expansion of effort. ADF&G agreed that effort would probably continue to grow if the fishery was not limited. ADF&G indicated that they were receiving lots of calls from fishers outside of Alaska who wanted to come to Southeast Alaska to get into the pot shrimp fishery. A court decision had allocated a large share of the available resources in Washington to Treaty tribes and as a result many fishers had been displaced and intended to enter fisheries in Alaska. For these reasons and others, ADF&G anticipated continued increases in pressure if the fishery was not limited.

The Commission proposed regulations to limit the fishery and held public hearings throughout Southeast Alaska over the September 1, 1995 through November 3, 1995 time period. The Commission's original proposal was for a maximum number of 186 which reflected the number of participants in 1994. Based on public testimony, the Commission decided to delay entry limitation until 1996.

The Commission adopted a maximum number of 234 and a qualification date of January 1, 1996. The maximum number may be revised upward to reflect the number of legal 1995 participants after 1995 catch data have been finalized and questionable landings have been adjudicated.

---

### *Point System Proposals*

Under AS 16.43, the Commission must develop a hardship ranking system or point system to determine who will receive a limited entry permit in a newly limited fishery. In 1994, the Commission worked on point system alternatives for the Cook Inlet Dungeness crab pot and ring net fisheries. A regulatory proposal was made in the December of 1994 and public hearings were held in January of 1995. On September 25, 1995, the Commission adopted a point system for the fishery. The application period for permanent permits will be held during 1996.

The Commission's research staff is currently working on point system alternatives for all of the recently limited fisheries. Point system options for most of the fisheries should be proposed for public comment sometime during 1996.

### *Optimum Numbers and Fleet Reductions*

Development of a viable fisher-funded fleet reduction program will depend upon a satisfactory resolution of some of the issues raised by the Alaska Supreme Court in *Johns v. State, CEEC*, 758 P.2d 1256. During 1995, the Commission maintained its dialogue with individuals and gear groups interested in gear reductions. However, no new optimum number studies were undertaken.

Other ideas for consolidations into lower cost operations were discussed during the year. Some Southeast Alaska Dungeness crab pot fishers favor developing a "stacking provision" for the new tiered-pot limited entry system. Under a stacking provision, a person would be able to hold more than one permit and fish a

---

number of pots commensurate with the sum of the pots allowed under each permit as long as the person did not exceed the maximum number of pots allowed by the Alaska Board of Fisheries.

Under such a provision, the number of use-privileges in the fishery would remain the same but the number of fishing operations could change frequently as permits are purchased and sold. Draft legislation authorizing such a regulation may be introduced in 1996.

### ***Other Projects, Reports, and Publications***

The research staff also produced monthly permit value estimates for the Department of Commerce and Economic Development and other users and produced basic information tables on many of Alaska's commercial fisheries. The research and data processing sections also worked to produce reports on Alaska's fisheries which were used in the National Marine Fisheries Service (NMFS) publication *Fisheries of The United States, 1994*.

During the year the Commission's research staff produced many ad hoc reports for the Commission and other analyses requested by the Office of the Governor, the Department of Fish and Game, the Board of Fisheries and Alaska's Legislature. The following is a listing of non-confidential reports and publications that the Commission staff members authored or co-authored during 1995.

1. **Number Of Resident And Nonresident Skippers and Vessels In The 1993 Gulf Of Alaska Trawl Fisheries (95-1N)** by E. Dinneford.

- 
2. **Historical Salmon Harvests In Alaska, 1990-1994 (95-2N)** by A. Tingley and K. Iverson.
  3. **Area M Salmon Permit Holders By Combination Of Permits Held (95-3N)** by E. Dinneford.
  4. **Changes In Permanent Entry Permits In Communities Local To the Bristol Bay And Chignik Fishing Areas, 1975-1994 (95-4N)** by E. Dinneford.
  5. **Selected Data On Holdings Of Bristol Bay Salmon and Chignik Salmon Entry Permits By Persons Local To Those Fishing Areas, 1975-1994 (95-5N)** by E. Dinneford.
  6. **A Comparison Of Changes In Rural Local Entry Permit Holdings Over the 1975-1984, the 1985-1994, and the 1975-1994 Time Periods, With Special Emphasis On The Bristol Bay Area (95-6N)** by E. Dinneford.
  7. **Kodiak "Area K" Salmon Permit Holders By Combination Of Permits Held, 1975-1994 (95-8N)** by E. Dinneford and A. Tingley.
  8. **Preliminary Data On 1975-1994 Emergency Transfers With Special Emphasis On the Bristol Bay Salmon Fisheries (95-9N)** by E. Dinneford.

# Revenue

**T**he Commercial Fisheries Entry Commission generates revenue primarily from issuance of commercial fishing permits and vessel licenses, and to a lesser degree from charges for research and data processing services and reports. As shown in the graph, total revenue dropped from about \$5.7 million in FY 94 total revenue dropped to \$4.7 million in FY 95, attributable to a decrease in the number of fishers licensed and permits issued. This decline has been evident since 1991 when the total count of permits and vessel licenses issued was 50,104, compared to 43,430 in 1995. (See the Licensing report for more details.) The decline is largely attributed to the halibut and sablefish IFQ program and the poor economic conditions prevalent in many fisheries in recent years.

Despite the decrease from the previous year, the Commission's revenues during FY 95 were nearly twice the amount of its annual

Revenue - All Sources  
Commercial Fisheries Entry Commission

budget. The agency has been on a maintenance budget for several years which has resulted in reductions in personnel and forced the agency to allocate resources to those demands most urgent. Reliance upon technological advances has been of utmost importance in enabling the agency to carry out its statutory responsibilities in light of the increased variety and complexity of fisheries issues in the 90's.

Notes for Table:

Total Permanent Permits — The number of permanent permits may decrease from one year to the next because of revocations.

Permanent Permits Held by Alaskans — Residency figures were calculated using the permit holder address from 1975-1978. After 1978 permit holders were required to declare their residency status on the renewal form and residency figures were taken from those declarations. These numbers may differ somewhat from those reported in "Changes in the Distribution of Alaska's

TABLE 1. PERMIT AND PERMIT TRANSFER STATISTICS, 1975-1995 \*

Commercial Fisheries Entry Permits" published by CFEC. In that report all persons who declared Alaska residency status but had out-of-state addresses are counted as non-residents. Numbers shown in this annual report may differ from those in previous annual reports due to residency status changes resulting from residency investigations. Permits held by the Dept. of Commerce or C.F.A.B. are counted as resident permits.

Total Number of Transfers — Transfers reported here include foreclosures by the Dept. of Commerce or by C.F.A.B.

Change in Residency Due to Transfers — These figures may differ from figures reported in previous annual reports due to residency status changes resulting from residency investigations.

Permits with State Liens — These are permits which have been financed by the Dept. of Commerce or by CFAB or which have been used as collateral against a commercial fishing loan from one of these agencies. These numbers differ from those shown in past CFEC Annual Reports due to permit file corrections and changes in the accounting of foreclosed permits.

Transfer Survey Information — These surveys were voluntary until January 1, 1980. Many transfers occurred without completion of a survey form during the years 1975-1979. A few surveys are missing for 1980 and 1981. In addition, there have been seven administratively ordered transfers in the 1986-1994 period for which no surveys exist.

Non-monetary/Monetary Transfers — For the years 1980-1994 any transfer survey with a sale price greater than \$500 was counted as a monetary transfer. All other transfers were counted as non-monetary transfers. For the years 1975-1979 the number of monetary transfers reported here is the number of transfer surveys which were used to compute the average price of permits for use by the Dept. of Commerce and CFAB in their loan programs. These surveys were selected using exclusionary criteria different from the \$500 minimum.

Average Price Paid for Permits — These figures are the average of the sale price taken from all surveys counted as monetary transfers. For the years 1980-1994 they may vary slightly from the average prices used by the Dept. of Commerce and CFAB which are based on exclusionary criteria different from the \$500 minimum used in this report. A "—" indicates that there were no monetary transfers for this fishery. A "\*\*\*\*" indicates confidential information because fewer than four surveys exist.
