

IV. AGE PATTERNS AMONG PERMIT HOLDERS

IV. AGE PATTERNS AMONG PERMIT HOLDERS

A concern of the drafters of the Limited Entry Act was that limited permit types would remain accessible to younger Alaskans. This section examines ages of permit holders, transferors, and transferees (transfer recipients) over the lifetime of the limited entry program. Excluded from the data are nontransferable permits and permits which were foreclosed upon by the Department of Commerce, Community and Economic Development (DCED) or the Commercial Fishing and Agriculture Bank (CFAB).

Mean Age of Permit Holders, Transferees (Transfer Recipients), and Transferors

Annual mean ages for all transferable permit holders, transferors and transfer recipients are shown in Table 11. If no permits were transferred at all, the mean age of permit holders would logically increase by one year each year. However, the mean age actually declined from about 43 in 1975 to 41 in 1978 and remained stable through 1985. In 1986, the mean age of transferable permit holders increased to 41.5 and steadily rose to 48.0 at year-end 2003. There are at least two possible explanations for this increase: 1) fewer transfers have occurred in recent years resulting in a reduction of younger people entering the fisheries, and 2) the average age of transfer recipients has increased from a low of 32.5 in 1976 to a high of 41.1 in 2002 and 2003.

From 1975 to 1983, the statewide annual mean age of transfer recipients was consistently between 32 and 34 years. Beginning in 1985 and continuing through 1990, the annual mean age of transfer recipients rose to between 35 and 36 years. The age of transfer recipients has increased over the last few years, with the mean age jumping to 41.1 in 2002 and 2003.

The statewide annual mean age of transferors was highest in 1975 at 51.8 years, shortly after the first limited entry permits were issued. It decreased to 41 years by 1979, and then rose to stay in the range of roughly 43 to 44 years from 1980 to 1990. Since 1990, the annual transferor mean age has gradually increased to approximately 50 years at year-end 2003.

Overall, the age difference between transferors and transfer recipients was greatest in the early years of the limited entry program, particularly prior to 1978. From 1984 to 1994 the overall age difference varied little, from 7.3 to 8.7 years. In 2000 the age difference

between transferors and transfer recipients was 10 years, the highest level since 1983. In 2003, the difference was 8.4 years.

Mean Age by Permit Type

Annual mean ages for year-end transferable permit holders, transferors, and transfer recipients in specific permit types are presented in Table 12. At year-end 2003, permit types with the highest mean reported ages of year-end permit holders were the Norton Sound herring beach seine (59.8 years), Upper Yukon salmon gillnet (58.9 years), Southeast roe herring seine (54.6 years), power troll (54.1 years), and Prince William Sound Roe Herring Seine (53.8 years).

Mean Age by Resident Type

The annual mean ages by resident type for year-end transferable permit holders, transferors, and transfer recipients are presented in Table 13. The highest mean age for year-end transferable permit holders in 2003 was Nonresidents (49.1 years) and the lowest was Alaska Rural Nonlocals (46.4 years).

By year-end 2003, the mean age of transferors varied by approximately 3 years between resident types. The reported mean age of transferors by resident type ranges from 47.9 (AUN) to 50.7 (ARN) for the five resident type categories.

Annual mean ages of transfer recipients have gradually increased within each resident type. By year-end 2003 the mean age of transfer recipients was the highest it has been in recent years. Alaska Urban Locals had the highest mean age of transfer recipients (43.0 years), followed by Alaska Urban Nonlocals (42.4 years). Alaska Rural Nonlocals were the youngest receiving permits at 36.3 years.

The annual age class distributions of year-end transferable permit holders are shown in more detail in Table 14. The table also lists the annual percentage each age class represents of all transferable permits held by a particular resident type (percentage of the row total). In recent years, the percentage of permit holders for all resident types in the younger age classes has generally decreased. The decrease is balanced by an increase in the percentage of permit holders in the 41- to 50-year-old, the 51- to 60-year-old, and over 60-year-old categories. Mean ages for specific permit types by resident type and year are provided in Table 15.

TABLE 11. Mean Ages of Transferable Permit Holders, Transferors, Transferees, and Mean Age Differences Between Transferors and Transferees, by Year

Year	Transferable Permits*	Mean Age	Number of Transfers**	Transferor Mean Age***	Transferee Mean Age	Mean Age Difference
1975	6,762	42.7	585	51.8	33.2	-18.7
1976	9,160	41.6	776	45.9	32.5	-13.5

2000	13,384	46.5	928	47.9	37.9	-10.0
2001	13,683	46.9	927	47.9	40.6	-7.3
2002	13,676	47.5	732	48.2	41.1	-7.1
2003	13,585	48.0	889	49.5	41.1	-8.4

* The number of transferable permits excludes foreclosed permits. The Department of Commerce, Community and Economic Development and the Commercial Fishing and Agriculture Bank have foreclosed loans for 271 permits and have transferred 196 of those permits. Seventy-five permits remain held by DCED and CFAB.

** The number of transfers excludes foreclosed permits or transfer surveys with missing birthday information.

*** Mean ages may be based on fewer observations than the number of permits because of missing birthday information.

TABLE 12. Mean Ages of Transferable Permit Holders, Transferors, Transferees, and Mean Age Differences Between Transferors and Transferees, by Year and Permit Type, 1975-2003

* The number of transferable permits and the number of transfers exclude foreclosed permits. Mean ages may be based on fewer observations than the number of permits because of missing birthday information.

** Age information is confidential when there are fewer than four permits.

TABLE 13. Mean Ages of Transferable Permit Holders, Transferors, and Transferees by Resident Type, 1975-2003*

Resident Type	Year	Transferable Permits		Transferors		Transferees

* Transferable permits exclude foreclosed permits. The transferor count represents numbers of transfers from a resident type. The transferee (transfer recipient) count represents numbers of transfers to a resident type. Mean ages may be based on fewer observations than the number of permits because of missing birthday information.

TABLE 14. Mean Ages of Transferable Permit Holders, Transferors, and Transferees by Resident Type, 1975-2003*

	Year	20 or Under	21 to 30	31 to 40	41 to 50	51 to 60	Over 60	Total
