ABSTRACT

This report provides detailed information on changes in the distribution of permanent entry permits in Alaska’s limited fisheries. From 1975 through 2007, 79 permit types have been issued in 65 fisheries. The report provides both statewide and fishery-specific data on the number of permit transfers, the geographic distribution of permit holders, changes due to permit transfers, changes due to the relocation of permit holders and the year-end 2007 geographic distribution of permit holders.

The report also includes extensive information on the age of permit holders, age differences between transferors and transfer recipients, the incidence of intra-family and business partner transfers, transfer acquisition methods, and financing of permit purchases. The information contained in the report is derived from the Commercial Fisheries Entry Commission’s permit and transfer survey files.

The report includes 2 separate documents: an executive summary and the principal report, which is primarily a reference document.
