

II. TRANSFER INCIDENCE

II. TRANSFER INCIDENCE

Statewide Turnover Rates

During the period 1975-2007, 16,392 permanent limited entry permits were issued in 65 limited entry fisheries. However, not all of these permits were available for transfer. AS 16.43.250 requires that CFEC develop hardship ranking systems (“point systems”) to allocate permits, and to determine point levels at which a person would experience only minor economic hardship if excluded from an initial permit allocation. Permanent permits issued to persons classified at minor economic hardship levels are nontransferable.

A total of 14,104 transferable permits and 2,288 nontransferable permits have been issued. By the end of 2007 14,472 permits remain, 13,610 transferable and 862 nontransferable. The net reduction of 494 transferable permits is due to the cancellation of 619 transferable permits and the net addition of 125 permits that were converted from nontransferable to transferable status through the CFEC adjudication process. The net reduction of 1,426 nontransferable permits is due to the cancellation of 1,301 nontransferable permits and the net conversion of 125 nontransferable permits to transferable status through the CFEC adjudication process.

During this same time span there were 33,087 permanent permit transfers. Original permit holders transferred 11,292 permits, indicating approximately 80% of all transferable permits had changed hands at least once by the end of 2007.

Two types of annual transfer rates are shown in Table 1. The first type is the ratio of the permits transferred for the first time (i.e., from initial issuees) to the number of transferable permits. This ratio would be expected to decline over time if no new permits were issued because each year there would be fewer permits still held by initial issuees. This transfer ratio has declined from 0.08 to 0.01 over the 1975-2007 time period. The average annual ratio of transfers from initial issuees to the sum of annual transferable permit counts is 0.03 for the entire time period.

The second type of annual transfer rate reported in Table 1 is the ratio of transfers to available transferable permits, which provides a measure of the annual turnover rate for transferable permits. This ratio varied between 0.06 and 0.13 over the 1975-2007 time period, and averaged 0.08 for all years combined. As can be seen in Table 1, this transfer ratio dropped below the all-years average in 1989 and has remained relatively low through 2007. The 0.06 ratio in 1999 and again in 2002 is the lowest turnover rate recorded in all years.

Turnover Ratios by Permit Type, 1975-2007

In Table 2, permit types were divided into groups based upon the year(s) in which they were limited. A summary of transfer rates is provided for each group. The first group consists of the original 19 salmon permit types for which permanent permits were first issued in 1975. The second group consists of the 6 Arctic-Yukon-Kuskokwim (AYK) salmon permit types for which permanent permits were first issued in 1976. The remaining limited herring, roe herring, shellfish, dive and sablefish permit types are also grouped by years of limitation. These permit type groupings appear on tables throughout the report.

The sum of annual permit counts represent a summation of the number of transferable permits existing at the end of each year. These rates are comparable to the all-years statewide summary rates presented in Table 1.

Two measures of average annual transfer rates for individual permit types are shown in Table 2. The first transfer rate is calculated by dividing the cumulative total transfers from initial issuees, 1975 to 2007, by the sum of annual transferable permit counts over the same period. The permit types limited in the most recent years have the highest rates of transfers from initial issuees, but this rate is expected to decline over time because each year there will be fewer initial issuees remaining in the permit type.

The second transfer rate is calculated by dividing all permanent transfers over the time period by the sum of annual transferable permit counts over the same period. For the second type of turnover rate (ratio of transfers to the sum of annual transferable permit counts), the transfer rates vary considerably by permit type. The transfer rates for about one-half of the permit types are 0.09 or greater when averaged across all years. Some of the permit types with lower annual average rates are all of the AYK salmon permit types, most of the Westward herring permit types, the Chignik salmon purse seine permit, the Goodnews Bay herring gillnet permit, the Cook Inlet Dungeness pot permit, and the Kodiak Tanner bairdi pot gear permit for vessels up to 120 feet.

The annual transfer rate within a permit type may vary considerably from year to year. This is demonstrated in Appendix B where the number of transferable permits, the number of transfers, and the transfer rates for each year are presented for individual permit types.

TABLE 1. Statewide Transfer Data on Permanent Permits by Year, 1975 – 2007

| Year | Number of Permanent Permits* | Number of Transferable Permits** | Annual Number of Transfers From Initial Issuees | Ratio of Transfers From Initial Issues to Transferable Permits | Total Annual Number of Transfers*** | Ratio of Transfers to Transferable Permits |

| Years | Sum of Annual Transferable Permits | Total Transfers From Initial Issuees | Ratio | Total Number of Transfers | Ratio |
|-------------|------------------------------------|--------------------------------------|-------|---------------------------|-------|
| 1975 - 2007 | 389,539 | 11,292 | 0.03 | 33,087 | 0.08 |

* 2,046 permits have been cancelled. Except for 126 that were reinstated, these have been excluded from the year of cancellation forward.

** 619 transferable permits have been cancelled and 125 transferable permits have been added through conversion from nontransferable to transferable status through the CFEC adjudication process

*** The number of transfers includes 332 loan foreclosures by the Department of Commerce, Community and Economic Development or by the Commercial Fishing and Agriculture Bank, and 310 subsequent transfers from these entities.
