

IV. AGE PATTERNS AMONG PERMIT HOLDERS

IV. AGE PATTERNS AMONG PERMIT HOLDERS

A concern of the drafters of the Limited Entry Act was that limited permits would remain accessible to younger Alaskans. This section examines ages of permit holders, transferors, and transferees (transfer recipients) over the lifetime of the limited entry program. Excluded from the data are nontransferable permits and permits which were foreclosed upon by the Department of Commerce, Community and Economic Development (DCCED) or the Commercial Fishing and Agriculture Bank (CFAB).

Mean Age of Permit Holders, Transferees (Transfer Recipients), and Transferors

Annual mean ages for all transferable permit holders, transferors and transfer recipients are shown in Table 11. If no permits were transferred at all, the mean age of permit holders would logically increase by one year each year. However, the mean age actually declined from about 43 in 1975 to 41 in 1978 and remained relatively stable through 1985. In 1986, the mean age of transferable permit holders increased to 41.5 and steadily rose to 48.9 at year-end 2008. There are at least two possible explanations for this increase: 1) fewer transfers have occurred in recent years resulting in a reduction of younger people entering the fisheries, and 2) the average age of transfer recipients has generally increased from a low of 32.5 in 1976 to 39.4 in 2008.

From 1975 through 1984, the statewide annual mean age of transfer recipients was consistently between 32 and 35 years. Beginning in 1985 and continuing through 1990, the annual mean age of transfer recipients rose to between 35 and 36 years. The age of transfer recipients generally increased between 1991 and 2003, reaching a mean age high of 41.1 in 2002 and 2003. The mean age of transfer recipients declined slightly from 2004 through 2006.

The statewide annual mean age of transferors was highest in 1975 at 51.9 years, shortly after the first limited entry permits were issued. It decreased to 41 years by 1979, and then rose to stay in the range of roughly 43 to 44 years from 1980 to 1990. Between 1990 and 2005, the annual transferor mean age gradually increased to just above 50 years, and then rose again by year-end 2008 to 50.6.

Overall, the age difference between transferors and transfer recipients was greatest in the early years of the limited entry program, particularly prior to 1978. From 1984 to 1994 the overall age difference varied little, from 7.3 to 8.7 years. In 2000 and between 2004 and 2008, the age

difference between transferors and transfer recipients was at least 10 years, the highest level since 1983.

Mean Age by Permit Type

Annual mean ages for year-end transferable permit holders, transferors, and transfer recipients in specific permit types are presented in Table 12. At year-end 2008, permit types with the highest mean reported ages of year-end permit holders were the Upper Yukon salmon gillnet (59.9 years), Cook Inlet Dungeness pot (58.1 years), Prince William Sound roe herring seine (57.8 years), and Southern Southeast sablefish longline (57.0 years). The permit types with the lowest mean reported age of year-end permit holders in 2008 were Southeast Brown King Crab Pot (41.5 years), Southeast Dungeness 225 Pot (43.4 years), Bristol Bay salmon setnet (43.4 years), Southeast cucumber dive (43.5), Southeast geoduck dive (44.2), Southeast Dungeness 300 Pot (44.2), and Kuskokwim salmon gillnet (44.2).

Mean Age by Resident Type

The annual mean ages by resident type for year-end transferable permit holders, transferors, and transfer recipients are presented in Table 13. The highest mean age for year-end transferable permit holders in 2008 was Alaska urban locals (50.0 years) and the lowest was Alaska rural nonlocals (46.6 years).

By year-end 2008, the mean age of transferors varied by 4.5 years between resident types. The reported mean age of transferors by resident type ranged from 47.9 (ARN) to 52.4 (AUL) for the 5 resident type categories.

Annual mean ages of transfer recipients gradually increased within each resident type over the 1975 to 2003 time period. In 2008 Alaska urban nonlocals had the highest mean age of transfer recipients (41.3 years), followed by Alaskan urban locals (40.9 years). Alaska rural nonlocals had the youngest mean age of transfer recipients (38.8 years).

The annual age class distributions of year-end transferable permit holders are shown in more detail in Table 14. The table also lists the annual percentage each age class represents of all transferable permits held by a particular resident type (percentage of the row total). In recent years, the percentage of permit holders for all resident types in the younger age classes has generally decreased. The decrease is balanced by an increase in the percentage of permit holders

in the 41- to 50-year-old, the 51- to 60-year-old, and over 60-year-old categories. Mean ages for specific permit types by resident type and year are provided in Table 15.

* The number of transferable permits excludes foreclosed permits. The Department of Commerce, Community and Economic Development and the Commercial Fishing and Agriculture Bank have foreclosed loans for 334 permits and have transferred 321 of those permits. 13 permits remain held by DCCED and CFAB.

** The number of transfers excludes foreclosed permits or transfer surveys with missing birthday information.

*** Mean ages may be based on fewer observations than the number of permits because of missing birthday information.

* The number of transferable permits and the number of transfers exclude foreclosed permits. Mean ages may be based on fewer observations than the number of permits because of missing birthday information.

** Age information is confidential when there are fewer than 4 permits.

* Transferable permits exclude foreclosed permits. The transferor count represents numbers of transfers from a resident type. The transferee (transfer recipient) count represents numbers of transfers to a resident type. Mean ages may be based on fewer observations than the number of permits because of missing birthday information.
