Abstract

Many Commercial Fisheries Entry Commission (CFEC) salmon set gillnet permit holders in Prince William Sound, Cook Inlet, Kodiak, Alaska Peninsula and Bristol Bay hold shore fishery leases with the Alaska Department of Natural Resources (DNR). A DNR shore fishery lease allows CFEC permit holders the ability to exclude others from fishing at specific sites secured through the DNR lease. This report includes summary statistics on the number of leases, breaking out the figures into five resident classes in each year from 1975 through 2015. In addition, it provides ex-vessel gross earnings of permit holders both with and without DNR shore fishery leases. Descriptions of computer files and methods used to generate the statistics are also provided.

The map the on cover was created by Marcus Gho using ESRI National Geographic Ocean Base Map, DNR Shore Fishery Lease data from the Alaska Department of Natural Resources, and statistical areas from the Alaska Department of Fish and Game.

Introduction

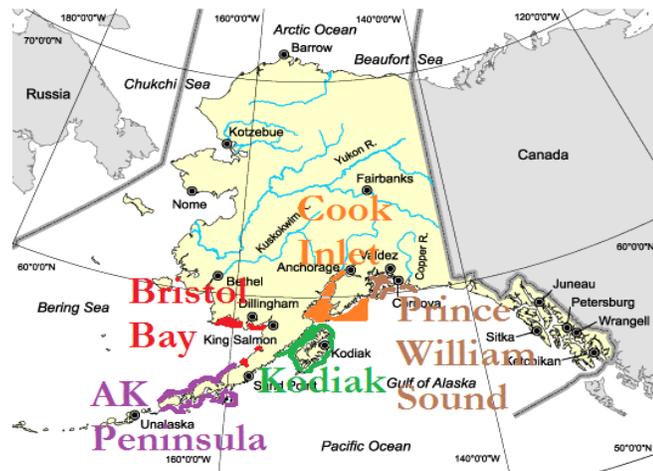

Set gillnet fishing for salmon in Alaska predates Western contact. While the principles of set gillnet fishing have not changed over the years, nylon replaces nettle and cedar netting, and stone anchors are replaced with steel and concrete. Set gillnets are placed in rivers, tidelands and near shore in submerged lands. Typically, a large anchor is used to secure one end of a gillnet, while the other end is fixed near the tide line. As salmon move along the shore, fish are entangled or caught by their gills in the net. The fish are harvested from the net either at low tide or with a boat moving along and picking fish from the net. Today set gillnet fishing is prosecuted by both subsistence and commercial fisherman as an effective, low cost method of fishing for salmon.

With the advent of Statehood in 1959, Alaska was granted 28% of the land in Alaska from the federal government. Included in the land grant were tidelands extending three miles from mean high tide and lands under navigable waterways. Management of State lands is administrated by the Department of Natural Resources (DNR). DNR manages its lands consistent with Article VIII of the State Constitution. As part of its policy, lands are designated for specific uses through a planning process that considers all viable competing uses. DNR adjudicators use planning documents, public comments, and input from multiple government agencies to grant temporary property rights by way of permits or leases for the use of land under its jurisdiction. In 1964, DNR began a program to lease tidelands and submerged lands for the purposes of set gillnet fishing. This program allows for DNR shore fishery leaseholders to establish a priority system for set gillnet sites, thereby resolving conflicts over prime salmon sites. Leaseholders of DNR set gillnet sites have the ability to exclude other individuals from fishing on established sites, subject to certain provisions and restrictions.

The privilege to fish commercially in Alaska requires a permit issued by the State Commercial Fisheries Entry Commission (CFEC), which is an agency administratively attached to the Alaska Department of Fish & Game (ADF&G). CFEC permits are specific to species, gear type, and administrative area. Prior to 1975, all fisheries in Alaska were managed as open access, where any individual could obtain a fishing permit for a nominal annual fee.

Alaska's limited entry program began in 1975 when 19 salmon fisheries were limited. Among them were the salmon set gillnet fisheries in Prince William Sound (S04E), Cook Inlet (S04H), Kodiak (S04K), Alaska Peninsula (S04M) and Bristol Bay (S04T). Permits were issued to individuals who demonstrated both a history of fishing and an economic dependence on the fishery. During the phase when an individual's permit qualifications were determined, they were issued an interim-use permit (IUP). More than 2,300 IUPs were issued to individuals in the five set gillnet fisheries. Eventually, individuals who met the minimum qualifications were issued permanent CFEC limited entry permits.

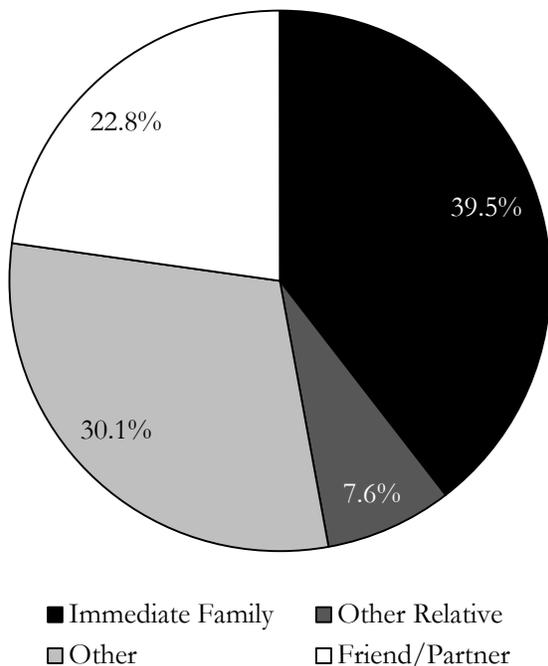

Figure 1. DNR Set Gillnet Areas

Blank map from ADF&G, modified to show locations of Management Areas

In 1975, DNR shore fishery leases already existed in each of the five set gillnet management areas except Kodiak. The first shore fishery leases in Kodiak were granted in 1979. Some DNR leases were issued to IUP holders contingent upon final adjudication of

Figure 2. Source of CFEC Permits for Transfers in Fisheries with DNR Shore Fishery Leases, 1975-2014

their CFEC permit: if an individual successfully qualified for a permanent CFEC limited entry permit, they could retain their shore fishery lease. If they failed to qualify, their lease was cancelled.

Ultimately, 2,121 permanent limited entry permits were issued in the five fisheries. The great majority (92.5%) were issued as transferable permits. A transferable permit allows an individual the ability to choose who the permit can be conveyed to, through market transactions, gifts, or inheritances. Nontransferable permits are cancelled either upon the death of the permit holder or when the annual fee is no longer paid. If the holder of a permanent permit becomes temporarily unable to fish, permits may be transferred and leased as an "emergency transfer" (ET), thereby granting temporary

fishing privileges from the permit holder to their designee. At the end of the year, the fishing privilege of the ET holder reverts back to the permanent permit holder. There is no restriction on residency or nationality with regards to holding a CFEC permit. Within a fishery, there is no distinction among permits - each permit grants the permit holder an equal access to fishing privileges. Alaska Department of Fish and Game regulations determine the methods and means of fishing; as a consequence, the amount of gillnet gear that may be deployed varies between fisheries.

Some families or partnerships control several permits, with each permit holder in the group allowed to deploy a full complement of gear. Perhaps because it is land-based, fishing with immediate and extended family members is especially common in the set gillnet fisheries. These family groups may span multiple generations. Often, a permit will change hands within a family depending upon who is available to fish that year. For Prince William Sound, Cook Inlet, Kodiak, Alaska Peninsula, and Bristol Bay, 46.9% of the salmon set gillnet permit transfers were to relatives, most of which were transferred as gifts (Figure 2).¹

Many of the commercial set gillnet fishermen will also use the same gear for subsistence fishing activities.

In 2002, House Bill 286 amended Alaska Statute 16.43.140 (c), to allow individuals to hold two salmon limited entry permits in the same fishery. The permits may be either limited entry or interim-use permits. The law specifies that individuals who hold two permits are not allowed to fish the second permit. This prohibition, however, was made ineffective under specific circumstances by House Bill 251 in 2006, which amended Alaska Statute 16.05.251, giving the Alaska Board of Fisheries (Board) the authority to grant fishing privileges for the second permit held by an individual. Stacked permit operations, which is the fishing of two permits by one individual, have thus far been granted by the Board for set gillnet fishing in the Kodiak, Bristol Bay, Cook Inlet, and Yakutat fisheries. The Kodiak permit stacking regulations took effect in 2008 and remained until December of 2010, when they were automatically repealed by a sunset clause. Bristol Bay permit stacking started in 2010 and sunset after December 31, 2012. Cook Inlet regulations went into effect in 2011 with no sunset provisions. The regulations allowing Yakutat permit stacking began in 2012, but provisions of the regulations allow stacking to occur only under specific circumstances and they sunset at the end of 2017, unless reauthorized by the Board of Fisheries.

Requirements for a DNR Shore Fishery Lease

Regulations and statutes determine the requirements for DNR shore fishery leases. Pertinent DNR regulations and statutes can be found in Appendix B of this document.

A permit holder does not need a DNR shore fishery lease in order to fish. However, a permit holder with a shore fishery lease has the first right to fish anywhere within the area of their lease, subject to ADF&G regulations that determine minimum distances between nets, closed areas, and other considerations. Other permit holders retain the opportunity to fish within the area of the lease, but the lease holder has the right to supplant them – effectively forcing them to move. DNR leaseholders are required to personally fish each leased tract for at least four legal fishing periods during the commercial fishing season; however, they may refrain from fishing for one year, but not two consecutive years.

Shore fishery leases are granted at the discretion of the Shore Fishery section within the DNR Division of Mining, Land and Water, solely for State lands managed by the DNR.

DNR shore fishery leases are only granted to U.S. citizens who are at least 10 years old and hold a valid CFEC set gillnet permit. The ADF&G Commercial Finfish Regulations specify that DNR leases may only be held in the ADF&G management areas of Alaska Peninsula, Bristol Bay, Kodiak, Cook Inlet, and part of Prince William Sound.² The number of leases held by an individual is dependent upon governing regulations established for the area. Area-specific regulations also determine which portions of the area are open for the establishment of shore fishery leases.

Each site can be leased for periods up to ten years with a fairly small annual rent (currently \$300). The current application and diagram review fees are \$250. There is some preliminary work required to adjudicate the lease, including staking the site and completing shore fishery diagrams, applications, and other tasks. Obtaining a survey may be costly in some instances. Currently, the window of time to apply for a shore fishery lease is between June 1 and October 15.

DNR set gillnet leases are for tidelands and submerged lands only; the shore fishery leases themselves do not allow for the construction of cabins or outbuildings on adjacent uplands. Frequently, however, the uplands are privately owned and may be associated with titles obtained through Alaska Native Allotments, historic homesteads, or other sources. In other cases, the uplands remain as public lands, but can be developed by set gillnet fishermen under separate leases obtained from the government entity with management authority over the uplands.

DNR adjudicators consider prior use of a site when multiple applicants apply for a lease. Leases in good standing may be transferred from one leaseholder to another at the discretion of DNR.

² There are other management areas in Alaska where salmon set gillnets are used, but the areas do not have a DNR shore fishery lease program.

Methods

DNR maintains a public record of shore fishery leases through an online database called the Land Administration System (LAS). Information for each lease is stored with a unique identifying case file labeled as the Alaska Division of Lands record number (ADL). There are many ADL types, one of which is the shore fishery lease type for salmon set gillnet sites. Each ADL includes identifying information pertaining to historical ownership of the lease, the CFEC permit number, the location, and other information related to the administration of the DNR site. Each row of data within LAS is stored as a unique event and is coupled with information such as dates, ADL, DNR person identification number, and other identifying information. For example, an assignment record would indicate an identifying ADL, a date, the person who assigned the lease away, and to whom it was assigned. Another row would contain the ADL, a date, and the CFEC permit number associated with the site.

Through a data-sharing agreement, DNR provided electronic shore fishery lease data to CFEC, denoted by a case type of 558 – Shore Fishery Lease. The data was provided in Excel file format. Multiple iterations of the DNR dataset were provided as the DNR data extraction routine was developed. CFEC staff converted the data to a SAS dataset, where it was further processed to prepare it for merging to CFEC data.

Each lease is designated with an ADL reference. Data was sorted by ADL and transaction dates. Within the DNR dataset, there are 71 transaction types. Each transaction type attributes information as it pertains to different aspects of the case file, such as the person identification, the location, the CFEC permit number and permit type, transfers of the lease, case file initialization, and all other aspects of publically-documented information pertaining to the lease.

Specific events, such as CFEC permit transfers and DNR shore fishery leases, are sometimes documented with dissimilar administrative lag intervals. For example, in one instance a CFEC permit transfer might be documented one month prior to the DNR shore fishery lease transfer, and in another instance the reverse could occur: the DNR lease is documented as transferred one month prior to the CFEC transfer. Due to these administrative lags, point-in-time records were selected as end-of-year records for both the CFEC permit file and the DNR shore fishery lease database to mitigate for these types of inconsistencies.

To accommodate a point-in-time series dataset, the Spell file method from Chapin Hall was utilized on the DNR dataset.³ The Spell file method takes date points and converts them into streams of data with begin and end dates. Various data points denote start

³ Chapin Hall Center for Children, and Casey Family Programs *Advanced Analytics for Child Welfare Administration*.

dates while others are used to describe end dates. Start dates are tied to transaction types in the DNR data of 'Extended/Renewed', 'Issued', 'Issue/Approve/Active Authorization', 'Reinstated', and 'Assigned'. End dates for ADLs include transaction types of 'Closed and Combined', 'Closed', and 'Expired'. Dates associated with the start and end date transactions were drawn from the value in the Transaction Date field. The presence of subsequent start date transactions (specifically the Extend/Renewed and Assigned types) for a similar ADL generated an end date using the subsequent start date minus one day for the prior transaction. After conversion using the Spell method, the end of each year (December 31) was queried for the presence of an active lease to conform the DNR dataset to the CFEC dataset.

The selected DNR records included data points such as the CFEC permit type, CFEC permit number, name, address, and social security number.

The CFEC permit file was used to identify individuals who held permits on the last day of each year. By the last day of the year, all emergency transfer permits have reverted back to the permanent permit holder. DNR staff indicated they do not issue leases to ET permit holders; they also indicated that assignments of DNR leases are not made to ET holders in-season. Instead, the lease remains in the permanent permit holder's name.

Both the DNR and CFEC permit files were merged then validated. Validation included a comparison between active CFEC permits in a year and the CFEC permits listed on DNR leases. There were some instances where the CFEC permit may not have been entered in the same year that a lease transfer took place. There were also simple data entry errors of the CFEC permit number in the DNR data. Each inconsistency was corrected. A subsequent validation occurred when DNR adjudications staff provided CFEC with an in-house report that contained all active DNR Shore Fishery Leases. This report was also carefully compared to the merged dataset. If the permit number and permit type from the DNR dataset did not match to the CFEC file, an analysis was undertaken to determine the most likely individual who held the CFEC permit. Many failed matches were the result of simple data entry errors, and corrections were applied. Likewise, on the very rare occasions where no CFEC permit information was entered on the DNR data, matches were made using other identifying information, such as the name and address of the permit holder. It should be noted that it is unlikely that the DNR adjudicators envisioned their data being merged to CFEC data when the data was entered into their database. Also noteworthy is that the vast majority of DNR records correctly recorded CFEC permit information.

The CFEC permit file was used to validate the DNR dataset, and also to establish permit holder resident type. Address information was merged with the Census 2010 file to determine if the permit holder had a resident status of Alaska Rural Local, Alaska Rural Nonlocal, Alaska Urban Local, Alaska Urban Nonlocal, Nonresident, or if the permit was temporarily held by the Department of Commerce, Community and Economic Development or the Commercial Fishing and Agriculture Bank (DOC) at year-end. Permits held by DOC

are essentially foreclosed. When resident classes were considered in this report, the very few permits held by DOC at year-end were excluded.

Both permanent and interim-use CFEC permits were considered in the analysis. Some applications for permanent permits are not successful (i.e., an interim-use permit is not upgraded to a permanent permit), and a small number of these were associated with DNR shore fishery leases. In each of these instances the DNR shore fishery lease was closed, concurrent with cancelation of the CFEC permit.

A set gillnet ex-vessel revenue file was prepared for this report from the CFEC Gross Earnings file. Alaska statutes mandate that all landings of commercially-caught fish are to be recorded on ADF&G fish tickets. The ADF&G fish tickets contain information relevant to this project, such as the permit used, the amount of the catch, and the area where the harvest occurred. This data is enhanced with average ex-vessel price estimates and other information from proprietary CFEC files to produce the CFEC Gross Earnings file. From the Gross Earnings file, all revenues were summed by permit for each year, regardless of who used the permit. Some permits are transferred either through temporary emergency transfers or through permanent transfers to a different owner. As previously mentioned, emergency transfers revert to the original owner at the end of the year. The summation of gross earnings per permit fished was adjusted for inflation using Federal Bureau of Labor Statistics 2015 Consumer Price Index. Real prices (adjusted for inflation) allow for inter-temporal comparisons by removing increases attributable solely to inflation.

The validated DNR shore fishery lease file was merged with the condensed set gillnet ex-vessel revenue file. The final dataset allows for comparisons of gross earnings between cohorts of DNR lease holders, to compare for example, differences between resident types and between leaseholders and non-leaseholders. It also provided an analysis of permit latency, or the rates in which CFEC permits are not used in a fishery.

Table Descriptions

Table 1. Number of CFEC Permits and DNR Shore Fishery Leases at Year-end.

Each of the five permit fisheries considered in this report include two classes of counts for the years 1975 to 2013. Columns labeled as DNR are the number of DNR shore fishery leases for the area; columns labeled as CFEC provide the number of permanent and interim-use CFEC permits and the associated percentages. The five set gillnet permit fisheries are Prince William Sound (S04E), Cook Inlet (S04H), Kodiak (S04K), Alaska Peninsula (S04M), and Bristol Bay (S04T), which are the areas where shore fishery leases are allowed. All permits are included in the counts, irrespective of whether they were used to make commercial landings. The counts are for year-end permit and lease holdings.

Table 2. DNR Shore Fishery Leases by Fishery and Resident Type at Year-end.

Counts by resident type are shown for each year for each of the five fisheries described in this report. Resident classes include:

- Alaska Rural Local (ARL) – *Alaska* resident of a *rural* community which is *local* to the fishery for which the permit applies;
- Alaska Urban local (AUN) – *Alaska* resident of an *urban* community which is *nonlocal* to the fishery for which the permit applies;
- Alaska Rural Nonlocal (ARN) – *Alaska* resident of a *rural* community which is *nonlocal* to the fishery for which the permit applies;
- Alaska Urban Nonlocal (AUN) – *Alaska* resident of an *urban* community which is *nonlocal* to the fishery for which the permit applies;
- Nonresident (NR) – *nonresident* to Alaska;
- DOC – signifies permits that have been foreclosed upon by the Department of Commerce, Community and Economic Development or by the Commercial Fishing and Agriculture Bank and have yet to be transferred.

Table 3. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders With and Without DNR Shore Fishery Leases, by Fishery. Average gross earnings, adjusted for inflation, are calculated for two separate cohorts; those with DNR shore fishery leases and those without. Average gross earnings calculated across all years are included as well. The difference between average gross earnings of permit holders with and without leases is described in terms of a dollar amount and a percent difference. Average gross earnings for each year are reported for each of the management areas. To protect confidential data, earnings are masked when there are fewer than four permits with landings. When either the DNR lease holders or non-DNR lease holder's columns have fewer than four permits with landings, both columns are masked to preserve confidentiality. DOC and latent (not fished) permits are excluded from this table.

Table 4. Average Real Gross Earnings for Salmon Set Gillnet Permit Holders With and Without a DNR Shore Fishery Lease, by Residency. Average gross earnings, adjusted for inflation, are presented for four separate groups, which represent combinations of Alas-

ka residency, and those with and without DNR shore fishery leases. The adjusted average gross earnings over all years are included as well. The data are calculated for each year in the areas where DNR shore fishery leases are allowed. To preserve confidential data, when there are fewer than four permits with landings earnings are masked. When the data in only one column is below the confidentiality threshold of four, earnings for the second-lowest count are masked as well. The second-lowest count was selected to minimize the amount of data masked. DOC and latent permits are excluded from this table.

Table 5. Average Real Gross Earnings for Salmon Set Gillnet Permit Holders With and Without a DNR Shore Fishery Lease, by Resident Type. Average gross earnings, adjusted for inflation, are presented for ten separate cohorts, which consist of combinations of the five resident classes and those with and without DNR shore fishery leases. Average gross earnings across all years are included as well. Average gross earnings for each year are reported for each of the areas that allow DNR shore fishery leases. To preserve confidential data, when there are fewer than four permits with landings, the description of earnings is masked. When only one column is below the confidentiality threshold of four, earnings for the second-lowest count is masked as well. At least two columns are masked to eliminate the possibility of solving for the missing values. DOC and latent permits are excluded from this table. The companion to this table is Table 6, which describes the count of permits used to compute the adjusted mean earnings.

Table 6. Number of CFEC Permits With Landings by Resident Type and DNR Shore Fishery Lease Status by Fishery. This is an accompanying table to Table 5. The table includes the number of salmon set gillnet permit holders with and without a DNR shore fishery lease, by resident type, and excludes DOC permits. The counts are restricted to only the permits that recorded landings in a year.

Table 7. Latent Salmon Set Gillnet Permit Holders With and Without a DNR Shore Fishery Lease. This table describes latent (no landings recorded for the year on the issued permit) salmon set gillnet permit holders, both with and without a DNR lease. The rate of latent permit holders is shown for each year among the areas where DNR shore fishery leases are allowed.

Table 8. CFEC Permit Holdings and Associated DNR Shore Fishery Leases. Counts of individuals with single and multiple (two) permits are shown by fishery, along with the total count of permits. Data is documented by year, and presents year-end holdings of CFEC permits.

Table 9. Multiple DNR Shore Fishery Leases per CFEC Permit. Counts of permits that are associated with one or multiple DNR shore fishery leases. Some permits are associated with up to three separate leases in a management area.

Discussion and Results

The first DNR shore fishery leases date back to the 1960s. Although commercial salmon fisheries were administered by ADF&G prior to 1975, the focus of this report considers only the period from 1975 forward,

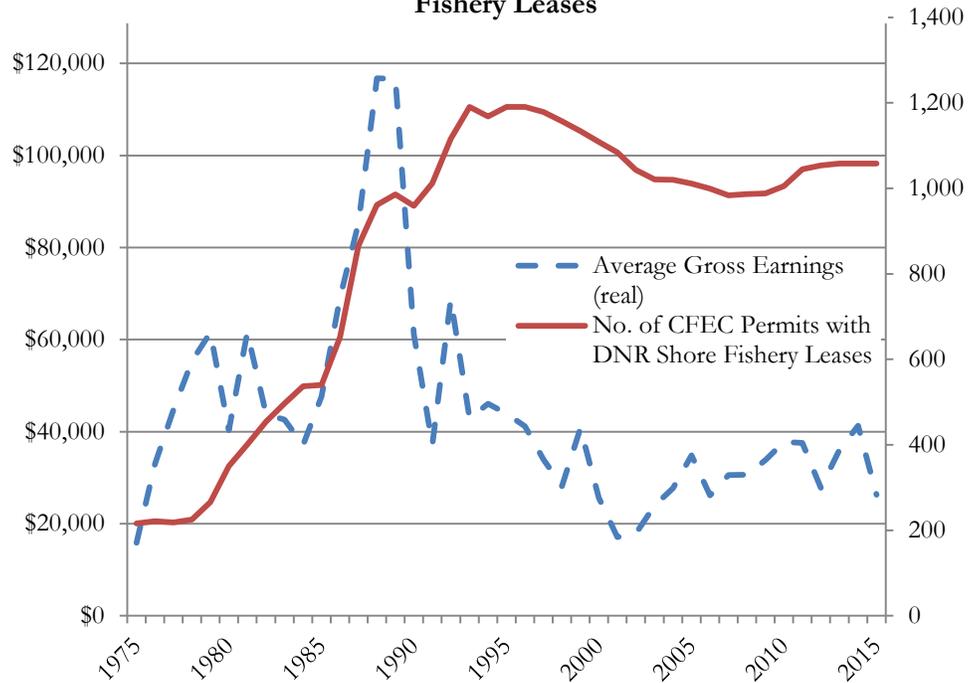

when limited entry permits were issued. By 1975, there were just over 200 DNR leases issued in four management areas. This was also the year with the lowest average of real gross earnings per permit (see Figure 3). Figure 3 shows the combined average gross earnings for the five fisheries described in this paper. As the value of catches increased, the number of DNR shore fishery leases also in-

creased. By the late 1980s, when salmon prices peaked, the number of CFEC permits with DNR shore fishery leases approached 1,000. Shortly after the peak, salmon earnings fell; however, since 1990 the number of CFEC permits with DNR shore fishery leases has remained between 950 and 1,200 leases even after the early 2000s when salmon ex-vessel values fell to levels similar to those in 1975.

Some families or small groups of individuals will pool their harvests and record their landings on only one permit. While such activity is not permissible under state law,⁴ it would have the effect of over-estimating the number of latent (unfished) permits in a fishery. Another effect of group recordings on fish tickets would be to increase the mean earnings among 'fished' permits as the actual number of permits fished would be unaccounted for in these situations.

Although the data suggests there are economic benefits to permit holders from DNR shore fishery leases (discussed below), there are other factors that affect average gross earnings for permit holders as well. Some of the factors include: total harvests and ex-

Figure 3. Average Gross Earnings (real) and DNR Shore Fishery Leases

S04E, S04H, S04K, S04M, and S04T permit fisheries only.

Adjusted for inflation using the 2015 CPI.

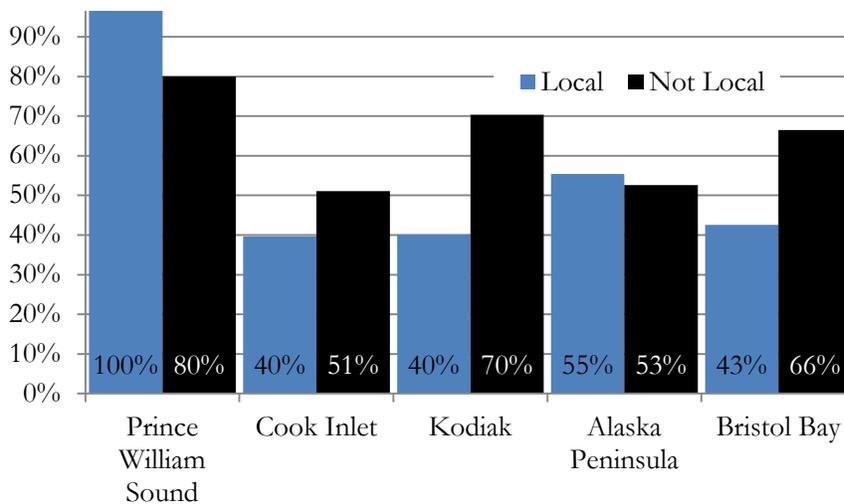

⁴ AS 16.05.690 (b).

vessel prices; processing capacity; fishery allocations and other fishery regulations, and disparate mixes of salmon species.

Harvests in set gillnet fisheries are largely based on the productivity of the area, but the distinctions between areas can be dynamic. For example, Bristol Bay is extremely productive; however, there are a large number of permit holders competing among one another. In spite of the competition, large runs of salmon can allow permit holders to catch high volumes of fish during the short Bristol Bay season. Cook Inlet is less productive than Bristol Bay, and is characterized by a high concentration of permit holders who fish in small, defined areas. This is especially notable along the eastern shore of Cook Inlet, where many fishermen have established leases near the productive Kenai and Kasilof rivers. Other places in Cook Inlet have fewer leases and less fishing effort, which is likely related to site accessibility and the relative abundance of salmon.⁵ In Prince William Sound, ADF&G biologists indicated that a recent regulatory re-allocation of fish towards set gillnetters has allowed permit holders to harvest a larger volume of fish than was historically feasible.

External market and ecological signatures can be identified in Tables 3, 4, and 5. For example in March of 1989 the oil tanker Exxon Valdez struck Bligh Reef in Prince William Sound. As a result, salmon harvesting was suspended in Prince William Sound that year of the ensuing oil spill. Salmon fisheries in Cook Inlet, Kodiak and the Alaska Peninsula were also affected by the same oil spill.⁶ In the early 1990's, farmed salmon began to impact international fish markets. As a result, the price of salmon declined and reduced ex-vessel values and the associated profitability of the fisheries.

Figure 4. Percent of CFEC Permit Holders with DNR Leases, 2015

Demographics play a role in participation among the distinct fisheries. As indicated in Table 2 and Figure 4, locals generally have a lower rate of DNR shore fishery leases than those that are not local. Anecdotally, fishermen have indicated that locals will often return to

⁵ Detailed images of the location of DNR shore fishery lease sites can be viewed at: <http://dnr.alaska.gov/Landrecords/>. General maps can be found in Appendix C of this publication.

⁶ Exxon Valdez Oil Spill Restoration Plan.

places their families have historically fished for decades. Local agreements and understandings exist about who fishes which locations. It was reported that when nonlocals, who either do not understand or accept local arrangements, move into an area and begin securing DNR leases, locals will begin to secure DNR lease sites as well. As locals secure sites, they may have to give up some of their traditionally fished sites due to regulations which restrict the number of DNR leased sites per permit.⁷ This explanation may describe what occurred in 1987, when the total number of DNR leases in Bristol Bay rose from 264 to 402 in a single year. There are other points in time when the number of leases rose significantly.

Rates of urban and rural holders vary in each of the regions, which can be seen in Tables 2, 4, and 6. In Cook Inlet, there is a high proportion of urban locals, many of whom have DNR leases. Urban communities local to Cook Inlet include Anchorage, Eagle River, Soldotna, Kenai, and Chugiak, among others. Kodiak also has a relatively high number of local urban commercial fishermen. Prince William Sound, Alaska Peninsula and Bristol Bay have no urban communities local to the respective fisheries. In some areas, the distribution of permit and lease holdings by resident type has changed over time. For example, in Prince William Sound, the proportion of permits held by rural locals has shifted towards urban nonlocals, and occurred primarily due to permit transfers.⁸

The number of DNR shore fishery leases allowed per permit is determined by the Alaska Board of Fisheries.⁹ Table 9 provides counts of multiple lease holdings per CFEC permit at year-end. There may be some instances where transfers are in the process of occurring, or data entry miss-keys that can bias the counts. Over all areas, from 1975 to 2015, the rate of multiple leases per permit has declined from 6.5% to 1.8%. The rate of multiple holdings varies by area; Alaska Peninsula had the highest rate in 2015, with 11.5% of DNR lease holders holding multiple leases at year-end.

In some management areas, permit holders who stack permits (two permits fished by one permit holder) can record their landings on just one or both of their permits. In situations where an individual only records landings on just one permit, the second permit would be considered latent even though it was in fact actively used.

With the ability to stack permits, the percentage of individuals with two permits increased substantially in Kodiak, Bristol Bay, and Cook Inlet (see Table 8). Prior to the permit stacking regulations, less than 1% of the permit holders held multiple permits. At the end of 2008, the first year permit stacking was allowed in Kodiak, 15.3% of set gillnet permit holders held two permits in that management area; this percentage rose to 25.3% by the end of 2010. In 2011, after the ability to stack permits ended, the percentage of Kodiak permit holders with multiple permits dropped to 2.2%. In Bristol Bay, the percentage of multiple permit holders was well below 1% of permit holders until 2010, when permit stack-

ing regulations were implemented by the Board of Fisheries. In the first year of permit stacking regulations, 5.9% of the permit holders held two permits, then the count increased to 12.0% by 2012. After permit stacking regulations sunset, the number of individuals with multiple permit holdings at year-end dropped below 1% again. In Cook Inlet there were fewer than 1% permit holders with multiple permits until 2011, the first year of permit stacking when the year-end count rose to 6.4% and has risen each year; by the end of 2015, 14.7% of the permit holders held two permits.

There are many reasons why an individual might choose to obtain a shore fishery lease. Moving from place to place can be costly, both in terms of the opportunity cost of not fishing a known productive site, but also in fuel and other expenses incurred in moving. Moreover, the logistics of running a fishing operation become easier and more economical with the stability of a known site, especially if the uplands can be used for constructing living quarters and storage facilities. On the other hand, specific movements of fish are not always consistent, and there may be advantages to not being fettered to a single site. While there are restrictions that specify how many times DNR leaseholders are required to fish their leased sites during any given season,¹⁰ some leases may have multiple tracts which may span miles of distance. Furthermore, some families or partnerships may have multiple permits, thereby expanding their ability to secure additional leases.

On average, CFEC permit holders with DNR shore fishery leases had substantially higher gross earnings than their counterparts without leases, except in the Kodiak area (Tables 3, 4, and 5, and Figure 5). In Kodiak, the average difference, or “lease premium” over the 1975 to 2015 period is negative 1.5%; DNR lease holders had higher average earnings than non-lease holders only in one third of those years.

As shown in Table 5, among the Kodiak permit holders, rural locals and nonresidents appear to fare better without a DNR lease. On the other hand, non-locals, both rural and ur-

Figure 5. Average Real Earnings by Area, 1975-2015

¹⁰ 11 AAC 64.180.

ban, posted higher earnings with a DNR lease. Among Kodiak rural and urban locals, there were years when lease holders had higher earnings and years when non-lease holders had more income. Among resident types in the four fisheries other than Kodiak, DNR leaseholders most often average substantially higher earnings than non-lease holders.

Among the four fisheries with higher real earnings for DNR lease holders, the amount of the DNR lease premium varies. Prince William Sound has the greatest average rate of premium at 54.0%. Alaska Peninsula has the highest lease premium in terms of real dollars where real ex-vessel earnings for leaseholders averaged \$27,565 over non-lease holders.

For permit holders with shore fishery leases, Tables 3 and 4 indicate that in Prince William Sound, Alaska Peninsula, and Bristol Bay, average ex-vessel earnings for Alaska residents are similar to earnings of nonresidents, calculated over the entire 1975 to 2015 period. In Kodiak and Cook Inlet, there is a more pronounced difference between Alaska resident and nonresident earnings; again, averaged over all years within the group of permit holders who held leases.

For persons who did not hold shore fishery leases, Table 4 indicates a somewhat wider spread in average real earnings between Alaska residents and nonresidents. This holds true in all fisheries except Prince William Sound, where the 1975-2015 average earnings among persons who did not hold leases is roughly similar between Alaska residents and nonresidents.

As noted in Appendix A, each fishery has different gear restrictions. Moreover, within each area, there may be different gear restrictions in districts and sub-districts, as established by Board of Fisheries regulations. Each level of gear restriction provides associated levels of fishing capacity. Alaska Peninsula set gillnet permit holders have the highest average ex-vessel earnings; likewise, they are capable of deploying the most amount of aggregate net. Bristol Bay has the smallest amount of allowable gear, and in spite of the high number of permit holders, due to the productivity of the Bristol Bay region, permit holders bring in a substantial amount of revenue.

Conclusion

Generally, the ability to secure a known productive site with a DNR shore fishery lease for commercial set gillnet fishing is advantageous. However, several other factors will influence a permit holder's harvests. These include external market and ecological impacts, gear restrictions, the permit holder's skill level and effort, fishery allocations, and the relative abundance of catchable fish.

This report does show that for the salmon set gillnet fisheries in total, the overall average gross earnings of DNR leaseholders is appreciably more than that of non-DNR leaseholders. Averaged over all fisheries and years, the annual average benefit of a DNR shore fishery lease was \$9,496, which is a 23.0% premium (Table 3) over their counterparts without such leases. This benefit, or premium, is common across the years and across the five fisheries; therefore, it is likely attributable to the DNR shore fishery lease itself, and not to other external factors.

Although this report explores a very limited level of the geography of the DNR shore fishery lease site, it can be surmised that certain geographic locales are intrinsically more productive for fishing. That such locales should get selected for DNR lease sites likely explains much of the premium.

DNR - number of DNR shore fishery leases within CFEC permit area at year-end.

Percent - the percentage of CFEC set gillnet permits in the management area attached to a shore fishery lease.

CFEC - number of Commercial Fisheries Entry Commission limited entry permits at year-end. This includes both permits fished and not fished.

Table 2. DNR Shore Fishery Leases by Fishery and Resident Type at Year-end

** Earnings masked to preserve confidentiality.

The figures in this table reflect only the CFEC permits that recorded fishery landings.

Permits held at year-end by the Department of Commerce, Community and Economic Development or the Commercial Fishing and Agriculture Bank are excluded from this table.

Earnings are adjusted for inflation using the US Bureau of Labor Statistics base 2015 consumer price index.

2015 earnings are preliminary.

** Earnings masked to preserve confidentiality.

The figures in this table reflect only the CFEC permits that recorded fishery landings.

Permits held at year-end by the Department of Commerce, Community and Economic Development or the

Commercial Fishing and Agriculture Bank are excluded from this table.

Earnings are adjusted for inflation using the US Bureau of Labor Statistics base 2015 consumer price index.

2015 earnings are preliminary.

** Earnings are masked to preserve confidentiality.

Figures in this table reflect only the CFEC permits that recorded fishery landings.

Permits held at year-end by the Department of Commerce, Community and Economic Development or Commercial Fishing and Agriculture Bank are excluded from this table.

Earnings are adjusted for inflation using the US Bureau of Labor Statistics base 2015 consumer price index.

2015 earnings are preliminary.

“Renewed Permits” refers to permits that were issued and could have recorded landings.

“Latent” permits are Issued Permits for which no landings were recorded that year.

Permits held at year-end by the Department of Commerce, Community and Economic Development or the Commercial Fishing and Agriculture Bank are excluded from this table.

Permits held at year-end by the Department of Commerce, Community and Economic Development or the Commercial Fishing and Agriculture Bank are excluded from this table.

Counts in this table are for permit holders, not permits.

Only the permit areas of Prince William Sound, Cook Inlet, Kodiak, AK Peninsula, and Bristol Bay are considered in this table.

	2015	1,039	98.2%	19	1.8%	0	0.0%	1,058

Counts are as of December 31st for each year.

Some counts may reflect an administrative lag in assigning the appropriate lease to a permit number.

Appendix A. Summary of ADF&G Gear Restrictions by Management Area

	Maximum Number of Nets	Maximum Aggregate Net Length	Minimum Distance Between Nets
Alaska Peninsula	2-3	600' - 1,200'	600' - 1800'
Bristol Bay	2	300'	300' - 450'
Cook Inlet	4	630'	600'
Kodiak	2	900'	0' - 900'
Prince William Sound	3	900'	300' - 600'

	Maximum Number of Nets	Maximum Aggregate Net Length	Minimum Distance Between Nets

Appendix B. DNR Shore Fishery Lease Statutes and Regulations

Alaska Statute 38.05.082. Leases for shore fisheries development.

- (a) The director, with the approval of the commissioner, may lease tide and submerged land for fisheries development. Fisheries development includes the utilization of shore gill nets or set nets for the taking of fish. Every lease issued under this section shall reserve to the public a right-of-way for access to navigable waters and other tide and submerged land.
- (b) The director may classify land as subject to leases for fisheries development and publicly invite applications for lease of the selected areas. Each application shall be accompanied by an affidavit to the effect that the applicant presently intends to personally utilize the leased area for fishing purposes the following season. If two or more applications are received for the same shore area, the director shall award the lease to the most qualified applicant. In determining the qualifications of applicants, the director shall consider the length of time during which the applicant has been engaged in set netting, the proximity of the past fishing sites of the applicant to the land to be leased, the present ability of the applicant to utilize the location to its maximum potential, and other factors relevant to the equitable assignment of the disputed area. If the director cannot determine a preference between conflicting applicants for the same lease site on the basis of qualifications, the director shall select between the applicants by lot. An aggrieved applicant may appeal to the commissioner within 30 days for a review of the director's determination.
- (c) A lease for set net fishing may be issued for any period not exceeding 10 years. If the commissioner determines that the land is not being utilized for the purpose for which the lease is issued, the lease may be declared void. The director shall establish a reasonable rental for the lease, equal to the administrative costs involved in processing the leasehold applications.
- (d) Subleasing and renewals of leases are governed by AS 38.05.095 and 38.05.102.
- (e) The lease of submerged land conveys no interest in the water above the land or in the fish in the water.
- (f) The shore fisheries development lease program account is established in the state treasury. The rents, fees, and other proceeds received by the department in connection with the issuance of shore fisheries development leases under this section shall be deposited into the account. The legislature may appropriate money deposited into the account for the operation of the shore fisheries development lease program by the department or for any other public purpose.

DNR Regulations regarding Shore Fishery Leases

11 AAC 64.010. SHORT TITLE.

This chapter applies to leasing tide and submerged lands of the state for the purpose of shore fisheries development. Authority AS 38.05.020, AS 38.05.082

11 AAC 64.020. PARTICIPATION IN SHORE FISHERY.

No person is required to lease tide and submerged lands to participate in a shore fishery. However,

- (1) upon written or verbal notification by a lessee holding a valid shore fishery lease issued under this chapter, a set gillnetter shall remove any net or nets from the site or tract of the lessee if the lessee personally begins to commercially fish the lease site; and
- (2) no set gillnet may be set at less than the minimum distance established by Department of Fish and Game commercial finfish regulations set out in 5 AAC 03 - 5 AAC 39, from a net currently in use by a lessee holding a valid shore fishery lease issued under this chapter.

11 AAC 64.040. ADVISORY COMMITTEES.

The director will, in his or her discretion, accept recommendations from recognized associations or groups whose members are engaged in the practice of set gillnet fishing, or establish an advisory group to recommend resolutions involving application conflicts or protests. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.050. TIDE AND SUBMERGED LAND AVAILABLE FOR LEASING.

The director will, in his or her discretion, classify for leasing, under 11 AAC 55, all unappropriated tide and submerged land where set gillnet fishing is allowed by the Alaska Department of Fish and Game. After the director designates an area as open to leasing, the director will publicly invite lease applications for all or specific portions of the open areas. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.060. PERMANENT IMPROVEMENTS DISALLOWED.

No lessee may erect a permanent installation, building, structure, fixture, or facility upon a lease tract or site. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.061. STAKING AND FILING PERIOD.

An applicant may stake a set gillnet site or tract, and may file an application for a shore fishery lease, annually from May 1 to September 1. The director will extend, close, suspend, or otherwise modify the period for staking and filing an application if the director determines in writing that it is in the best interests of the state to do so. Authority: AS 38.05.020, AS 38.05.082.

(Due to Director's policy change the staking period is between May 2 and October 15 and the application period is between June 1 and October 15.)

Appendix B. DNR Shore Fishery Lease Statutes and Regulations

11 AAC 64.070. SIZE OF LEASE TRACTS.

(a) If an applicant has more than one set gillnet site, and the area between individual sites is not claimed by another person for set gillnet purposes, the applicant may include all such set gillnet sites in one lease tract if

- (1) the maximum number of set gillnet sites included in one tract does not exceed that number allowed by 11 AAC 64.080;
- (2) the maximum distance between set gillnet sites does not exceed twice the minimum distance, minus one foot, allowed between nets by Department of Fish and Game Commercial Finfish Regulations, set out in 5 AAC 03 - 5 AAC 39, for the local area, unless otherwise determined by the director;
- (3) the maximum distance of the tract side line from the nearest set gillnet site within the tract does not exceed one-half the distance allowed between set gillnet sites by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 03 - 5 AAC 39; and
- (4) the maximum distance between the seaward end line of a tract and the landward end line of an offshore tract is not greater than one-half the distance from the seaward end of the nearest set gillnet as determined by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 03 - 5 AAC 39.

(b) In establishing the size and proper location of a tract, the director will, in his or her discretion, require the applicant to survey the tract. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.080. MAXIMUM NUMBER OF NET SITES AND LEASE TRACTS.

Except as provided otherwise in this section, the maximum number of sites allowed one applicant is that number established under Department of Fish and Game Commercial Finfish Regulations set out in 5 AAC 03 - 5 AAC 39, except for Cook Inlet, where the maximum is three sites. The sites may be contained in one, two, or three tracts. In an area where, under established custom, the applicant has or currently uses the same set gillnet and other gear for high and low water sites, the director will, in his or her discretion, lease additional set gillnet sites, if the applicant submits proper justification. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.090. STAKING OF SITES AND TRACTS.

Before submitting an application under 11 AAC 64.260, an applicant must stake each tract by placing the stake at the net anchor point. The location stake must be at least three feet above ground level and must support a sign showing the applicant's name, mailing address, limited entry permit number, and date of staking. For a low water tract, the location stake may be co-located with the high water stake. The sign on the low water stake must contain the information contained on the high water sign and must be labeled across the top as a low water site with the distance and bearing to the shoreward end of the net or net anchor point noted on the sign. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.180. REASONABLE UTILIZATION.

(a) Except as otherwise provided by (b) of this section, reasonable utilization of a site or tract means personally fishing each site of each leased tract for at least four legal fishing periods during the commercial fishing season.

(b) The lessee may refrain from fishing upon any one or all leased tracts for one year, but not for two consecutive years. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.200. CLOSED AREA.

The director will not issue a lease in an area closed to commercial fishing by the Department of Fish and Game. The closure of an area by the Department of Fish and Game will not result in the termination of a lease for failure of reasonable utilization. The closure of an area will not extend the term of an issued lease. The lessee may, however, request an extension of a current valid lease as provided for under 11 AAC 64.391, if the area is reopened to commercial fishing. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.220. HARDSHIP CLAUSE; WAIVER OF RENTAL.

The director will, in his or her discretion, waive the annual rental in the case of substantial injury, illness, call to military service, or legal closure of the fishery. An application for a waiver must be postmarked at least 30 days before the date the annual rental is due. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.230. QUALIFICATIONS OF APPLICANT.

An applicant for a lease is qualified if the applicant

- (1) is a citizen of the United States and is at least 18 years of age; and
- (2) holds a valid limited entry permit or interim-use salmon setnet permit for the area within which a lease is requested. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.240. TRUSTEESHIP FOR MINORS.

The director will, in his or her discretion, issue a lease in trust for the benefit of a minor who is 10 years of age or older if the minor is otherwise qualified to lease under 11 AAC 64.230. The trust automatically terminates upon the date of the minor's 18th birthday. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.250. APPOINTMENT OF TRUSTEE.

A person who is qualified under the laws of Alaska to act as a trustee may apply for approval to act as a trustee for a shore fishery lease on behalf of a minor. The director will issue the lease in the name of an approved trustee, subject to other provisions of this chapter. The trustee does not acquire any rights in the leased area by virtue of this trusteeship. Authority: AS 38.05.020, AS 38.05.082

Appendix B. DNR Shore Fishery Lease Statutes and Regulations

11 AAC 64.260. APPLICATION.

- (a) An applicant shall file a shore fishery lease application with the department within 30 days after staking a shore fishery lease site. The filing date is determined by the postmark date of the application.
- (b) A nonrefundable filing fee, as prescribed by 11 AAC 05.010, must accompany each application.
- (c) A shore fishery lease application must contain the following information:
- (1) the applicant's name, mailing address, and birthdate;
 - (2) if the applicant is a minor, the name and mailing address of the trustee;
 - (3) the applicant's limited entry permit or interim-use salmon setnet permit number;
 - (4) the date the site was staked;
 - (5) the number of seasons the applicant has commercially fished the site;
 - (6) the number of years the applicant has participated in a shore fishery;
 - (7) a description of the lease tract sufficient to locate the tract and sites on the ground and including the township, range, and protracted section in which the site is located, as well as the site's distance and bearing from the shoreward end of the net or net anchor point to a known fixed point, such as a permanent building, monument, or fixed natural feature;
 - (8) a U.S.G.S. map of not more than 1:63,360 scale showing the location of the site;
 - (9) a statement that the applicant intends to personally fish the site;
 - (10) a statement that the applicant has complied with the staking requirements of 11 AAC 64.090 and that the applicant is within legal net distances as established by Department of Fish and Game Commercial Finfish Regulations set out in 5 AAC 04 - 5 AAC 39; and
 - (11) the names and addresses of adjacent right, left, shoreward and seaward setnet neighbors; if any.
- (d) Upon acceptance of a shore fishery lease application, the division will send the applicant further instructions for completing a shore fishery diagram.
- (e) Within 90 days after receipt of the instructions, the applicant shall provide the division with a completed and signed shore fishery diagram.
- (f) If an applicant is unable to comply with any of the instructions for completing the shore fishery diagram, the applicant shall submit a notarized affidavit attesting to the reason or the cause for failing to comply. The affidavit will be made part of the lease document.
- (g) Failure to provide the information required by this section constitutes grounds for denying the shore fishery lease application. Authority: AS 38.05.020 AS 38.05.082

11 AAC 64.280. PROOF OF QUALIFICATION.

In addition to the information submitted with the application, the director may request such additional proof of qualification as is deemed necessary to help effect an equitable assignment of the disputed area. Failure to comply with any request for proof of qualification or additional information shall be reason for the disqualification of an applicant. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.301. TERM OF LEASE.

Upon the successful completion of all requirements of this chapter, and the resolution of any protest filed, the director will issue a lease for a period not to exceed 10 years. In determining the term of a lease, the director will consider the stability of the beach within the area, as well as any other applicable considerations or factors. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.330. RIGHTS PRIOR TO LEASING.

The filing of an application for a lease shall not in any way vest any right in the applicant to a lease. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.370. ANNUAL RENTAL.

Annual rental shall be an approved proportionate share of the cost of administration of the total of the shore fishery development leasing costs, as determined by the director and concurred in by the commissioner. Annual rental shall be paid in advance of April 15, unless otherwise approved by the director, and shall be prorated from the 15th day of the month in which issued to the 15th day of April of the following year. All leases shall stipulate that the annual rental shall be subject to adjustment by the director at five year intervals and such adjustment is to be based on the administration costs involved, and shall in no way reflect the value of the leasehold. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.380. RECEIPT OF ANNUAL RENTAL.

The first year's rental shall be receipted on the lease; thereafter the director shall immediately issue receipts for all rents paid. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.391. EXTENSION OF LEASE.

90 days before the expiration of a valid lease, the lessee may request an extension of the lease. The director will, in his or her discretion, extend the lease for a period of up to 10 years if no changes in site or tract location have occurred, the beach has remained stable, the lease is in good standing with the department, the lessee remains qualified under 11 AAC 64. 230. and no protest of the extension is received. A nonrefundable filing fee, as established by the department's approved fee schedule, must accompany a request for an extension. Authority: AS 38.05.020, AS 38.05.082

Appendix B. DNR Shore Fishery Lease Statutes and Regulations

11 AAC 64.410. LEASE TERMINATION.

- (a) The department will, in its discretion, terminate a lease if
- (1) the lessee fails to pay the annual rental;
 - (2) the director determines that the site is not being used for the purpose for which the lease was issued;
 - (3) the lessee misrepresented facts or made an error with respect to a material fact in the shore fishery lease application;
 - (4) the lessee fails to properly locate his tract and sites or fails to properly situate in the tract when commercially fishing;
 - (5) the lessee fails to maintain a valid limited entry permit or interim-use salmon setnet permit; or
 - (6) utilization of the tract or sites is not in accordance with 11 AAC 64.180;
- (b) The director will notify a lessee in writing of the department's intention to terminate a lease under this section. The director will send the notice of termination to the last address provided to the department by the lessee. The notice is considered delivered when deposited in the mail.
- (c) A lease termination is effective 30 days after the date of the notice, unless stayed by the commissioner in conjunction with an appeal filed by the lessee under 11 AAC 64.460. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.430. ASSIGNMENT.

A lessee may assign a lease to another if

- (1) the lease rental payments are current;
- (2) the assignee is qualified under 11 AAC 64.230 or 11 AAC 64.240 and holds a valid limited entry permit or interim-use salmon setnet permit for the fishery;
- (3) the assignee does not currently lease the maximum allowed sites for the fishery;
- (4) approval of an assignment will not result in the assignee holding leases for more than the maximum allowable number of sites;
- (5) the lessee and assignee complete the required assignment of lease form; and
- (6) the director approves the assignment. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.440. SUCCESSION TO APPLICANT'S INTEREST.

A person who is legally assigned all rights to another person's lease application succeeds to all rights and privileges of the original lease applicant under this chapter if the assignee submits

- (1) a notarized statement setting out the name of the lease applicant, the lease applicant's address of record, the location of the site or sites, the date of lease application acquisition, and the name and address of each of the adjacent site holders, if any; and
- (2) a notarized statement by the lease applicant stating the length of time the lease applicant has personally operated the site or sites, and stating that the lease applicant has relinquished to the assignee all rights to and interest in the site or sites. Authority: AS 38.05.020, AS 38.05.08

11 AAC 64.450. PROTEST.

- (a) A person may protest an application for or the location of a shore fishery lease site by mailing a statement of protest to the applicant and to the director. The protest may be filed from the time a site has been staked until the last date for filing a protest, as determined and published in writing by the department. The postmark date of the statement of protest constitutes the date of protest. If a protest is filed, the director will not issue a lease until resolution of the protest.
- (b) A statement of protest must be in writing, must be signed by the protester, and must contain
- (1) the protester's name and mailing address;
 - (2) the protester's limited entry permit number or interim-use salmon setnet permit, if any;
 - (3) the applicant's name and address as shown on the staking sign;
 - (4) a brief statement of reasons why the protester believes that the lease site location is invalid or that the protester is more qualified to fish at the lease site; affidavits may be included to support the reasons set out in the statement; and
 - (5) a brief statement of the relief requested, which may be either denial of the lease site location, or a determination that the protester is more qualified to fish from the lease site and more entitled to lease the site than is the applicant.
- (c) The applicant shall prepare a brief written response rebutting the protester's statement, the applicant shall mail the response to the protester and to the director within 30 days after receiving the statement of protest. Affidavits may be included to support the facts set out in the response.
- (d) The director will base a decision resolving a protest on the criteria contained in AS 38.05.082 and on the protest, response, supporting affidavits, and hearing, if one is conducted. The decision constitutes the final departmental action unless it is appealed. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.460. APPEAL.

An eligible person affected by a decision issued under this chapter may appeal that decision in accordance with 11 AAC 02. Authority: AS 38.05.020, AS 38.05.082.

11 AAC 64.490. DISPUTES OF BOUNDARY LINE LOCATION.

In a dispute concerning one or more leased tract locations, the protesting party may request that the director establish or reestablish, by survey, the boundary lines of the tract or tracts in question. The director will, in his or her discretion, require that a survey be performed to determine the location of the boundary lines in dispute. The party or parties at fault shall pay the cost of the entire survey. The department will, in its discretion, terminate the lease of the party or parties at fault if they do not pay the survey costs. Authority: AS 38.05.020, AS 38.05.082

Appendix B. DNR Shore Fishery Lease Statutes and Regulations

11 AAC 64.565. TRANSITION.

Pending applications submitted under this chapter before March 30, 1985 will be adjudicated under the provisions of this chapter which are in effect after that date. The applicant will be notified of any additional requirements. Authority: AS 38.05.020, AS 38.05.082

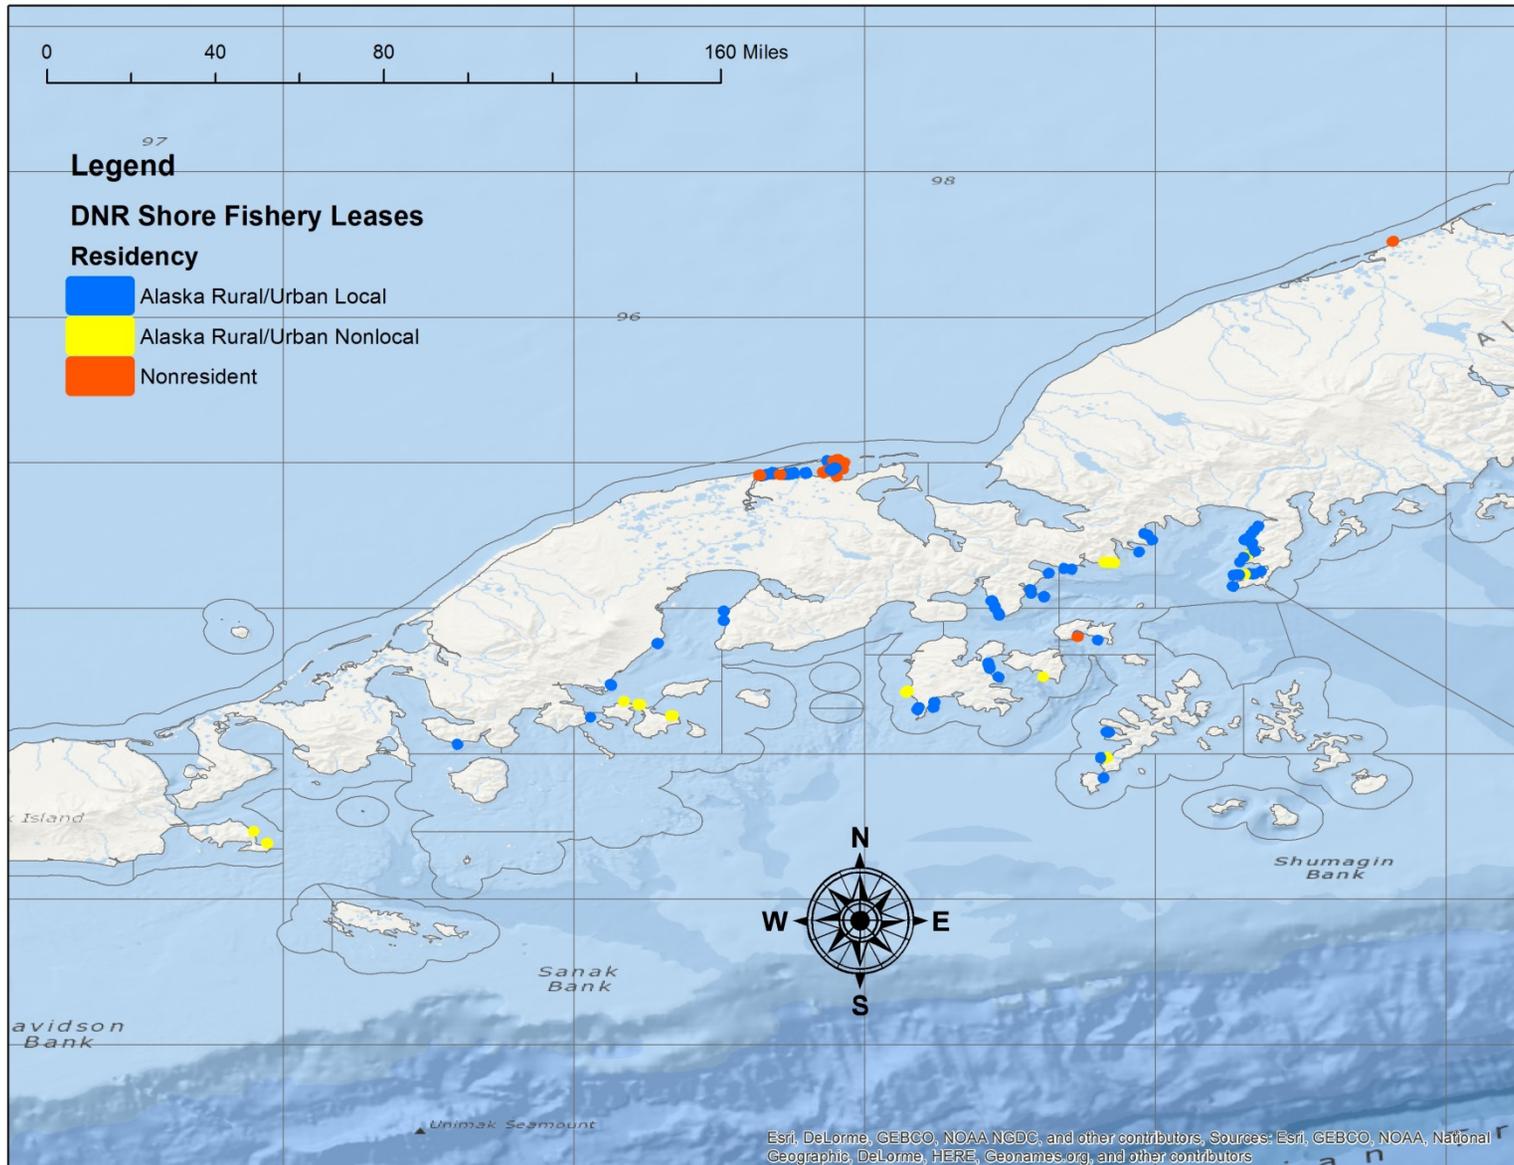

11 AAC 64.570. DEFINITIONS.

In these regulations, the following terms shall have the meaning indicated unless the context clearly requires a different meaning:

- (1) repealed 3/30/85;
- (2) "adjacent" means touching or lying in close proximity, as opposed to "contiguous" which requires a common boundary;
- (3) "boundary lines" means lines having a course and distance that enclose one tract;
- (4) repealed 3/30/85;
- (5) repealed 3/30/85;
- (6) "commercial fishing" means the taking, fishing for, or possession of fish, with the intent of disposing of them for profit, or by sale, barter, or in commercial channels;
- (7) "commercial fishing season" means the locally recognized commercial fishing season opened by field announcement by the Alaska Board of Fish and Game;
- (8) "commissioner" means the Commissioner of the Department of Natural Resources, State of Alaska;
- (9) "department" means the Department of Natural Resources, State of Alaska;
- (10) "director" means the Director of the Division of Lands;
- (11) "division" means the Division of Lands within the Department of Natural Resources;
- (12) "endline" means that boundary line of any lease tract that is parallel or nearly so with the shoreline;
- (13) repealed 3/30/85;
- (14) repealed 3/30/85;
- (15) "lease" means a surface lease for shore fisheries development issued or held pursuant to these regulations;
- (16) repealed 3/30/85;
- (17) repealed 3/30/85;
- (18) repealed 3/30/85;
- (19) "monument" means a natural, physical, artificial, or record monument, as customarily used to appropriately define or mark an area;
- (20) "neighbor" means an adjacent commercial fisherman who is to be designated as right or left side, or seaward or shoreward neighbor;
- (21) "offshore" means those submerged lands lying seaward from the line of mean low tide;
- (22) repealed 3/30/85;
- (23) repealed 3/30/85;
- (24) repealed 3/30/85;
- (25) repealed 3/30/85;
- (26) repealed 3/30/85;
- (27) repealed 3/30/85;
- (28) "site" means setnet site, individual setnet location, setnet fishing site, and set gillnet site;
- (29) repealed 3/30/85;
- (30) "tidelands" are those lands that are periodically covered by tidal waters between the elevation of mean high and mean low tides;
- (31) "tract" means a parcel of tidelands leased under this chapter and may include one, two, or three set gillnet sites;
- (32) repealed 3/30/85;
- (33) repealed 3/30/85;
- (34) repealed 3/30/85;
- (35) "party at fault" means the lessee or lessees who, following a dispute over tract or site boundaries or locations, is determined by the director to be in error;
- (36) "permanent" means not capable of being readily dismantled or removed from a site or tract within the 24 hours after notification, without destroying the object dismantled or removed or damaging the site or tract, and does not include setnet anchors;
- (37) "shore fishery diagram" means a graphic depiction of an applicant's or lessee's site which indicates the relationship of the site to local landmarks and adjacent or neighboring sites. Authority: AS 38.05.020, AS 38.05.082, AS 38.05.965
