## **OEO/ADA Compliance Statement**

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

## **Abstract**

This publication provides real (2016 dollars) gross earnings by year for all limited commercial fisheries in Alaska.

The figures on the cover display real gross earnings for the Cook Inlet set gillnet and Bristol Bay drift gillnet fisheries from 1975 to 2016.

Prepared by Marcus Gho.

Table 1. Limitation of Alaska Commercial Fishing Permits.....	3
Table 2. Mean and Quartile Real (2016 Dollars) Gross Earnings of Permit Holders in Alaskan Commercial Fisheries by Fishery and Year, 1975 - 2016.....	5

## Introduction

In 1972, Alaskan voters amended the state constitution to allow limited entry in the state's commercial fisheries. Following the amendment, in 1973 the Alaska State Legislature enacted the Limited Entry Act (AS 16.43), giving the Commercial Fisheries Entry Commission (CFEC) the authority to administer the program. Permit fisheries are defined by CFEC as a specific gear type for a fishery resource within a defined administrative area.

This report provides counts of fished permits and earnings for all limited permit fisheries from the CFEC gross earnings file.

The CFEC gross earnings file is based on ADF&G fish tickets and is augmented with CFEC permit holder and other data. The ex-vessel value for salmon in the CFEC gross earnings file largely come from the Commercial Operators Annual Report and ADF&G fish tickets with some additional information provided by processors. All ex-vessel values are adjusted for inflation using the from the 2016 Bureau of Labor Statistics Consumer Price Index.

Reported real gross earnings include mean (average), 25<sup>th</sup> quartile, median (50<sup>th</sup> percentile), and 75<sup>th</sup> quartile gross earnings. To produce the quartile earnings, all earnings by permit were first ordered from the smallest amount to the largest amount of gross earnings. The median is the middle value or the mean of the two middle values if there are an even number of permits fished that year. The 25<sup>th</sup> quartile is the middle value of the median and the lowest value, and the 75<sup>th</sup> quartile is the middle value between the median and the largest value.

Some figures are masked due to reasons of confidentiality. 25<sup>th</sup> and 75<sup>th</sup> quartile earnings are hidden when fewer than 16 permits were used to make landings. When fewer than four permits were fished, both the median and mean earnings are marked as confidential.

## Tables

*Table 1. Limitation of Alaska Commercial Fishing Permits.* This table has information for each limited commercial fishery in this report in the order that they are presented. Included in the table are: permit code; description of the permit type; the regulations that defined the limitations along with important dates; when interim-entry and permanent permits have been issued; and the percent of permits that have been issued. Only permits that were or could be issued as permanent permits are included in these figures.

*Table 2. Mean and Quartile Real (2016 Dollars) Gross Earnings of Permit Holders in Alaskan Commercial Fisheries by Fishery and Year, 1975 – 2016.* The focus of this table is to describe annual earnings for each limited fishery. All ex-vessel values are adjusted for inflation using the from the 2016 Bureau of Labor Statistics Consumer Price Index. Included are the mean and quartile earnings to provide references to both the expected value and skewness of what a commercial fisherman could earn. When fewer than four groups of permit holders are presented, earnings are masked due to confidentiality.

## Discussion

This report focuses on landings by permits, not individuals. While permits can only be held by one person at a time, they can be transferred either permanently or temporarily to multiple individuals in any given year. For information on changes of permit holdings through time, please refer to the latest annual Transfer Study publication<sup>1</sup>.

---

<sup>1</sup> See Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2016, CFEC Report 17-01N.

In certain years for some fisheries, permits have been used either in stacked or dual permit operations. For these fisheries, the actual number of permits fished will not be accurately represented and the average earnings could also be affected. A stacked permit operation is where a single permit holder holds two permits with the benefit of an added measure of gear; dual permit operations occur when two permit holders work together and are allowed to increase the amount of gear for the operation. Permit stacking has occurred in several salmon set gillnet fisheries: Kodiak (S04K) from 2008 to 2010; Bristol Bay (S04T) from 2010 to 2012; Cook Inlet (S04H) since 2011; and in limited circumstances in Yakutat (S04D) since 2012. Dual permit operations occur in two salmon drift gillnet fisheries: Bristol Bay (S03T) since 2004; and Cook Inlet (S03H) since 2008. The Southeast herring gillnet (G34A) fishery has had dual permit regulations in effect since 2006.

As estimated earnings have been adjusted for inflation, differences in annual averages values across multiple years can be considered. Because of the open access competitive nature of State of Alaska managed fisheries, variation exists in average earnings by permit for each of the fisheries. Variation also exists in average earnings by year as well due to environmental and social influences that affect the many fisheries. One example each of environmental and social influences include the Exxon Valdez oil spill and farmed salmon.

In March of 1989, the Exxon Valdez struck Bligh Reef in Prince William Sound and spilled more than 10 million gallons of crude oil. Several fisheries were affected by the spill from Prince William Sound to Kodiak as can be observed by both a decrease in participation as well as a reduction in average earnings in the years immediately following the oil spill.

By the mid-1990s, production of farmed salmon begun to exceed wild salmon harvest. The increased production of farmed salmonids has had an impact on the market for wild Alaska salmon and it reached a low point in the 2000s. Many commercial fishermen have since adapted; for example, in Bristol Bay, almost all commercially harvested salmon is chilled before it is delivered to processors.

Additional publications and datasets from the Commercial Fisheries Entry Commission can be found here: <https://www.cfec.state.ak.us/>.

- When fewer than four groups of permits make landings, earnings are masked due to reasons of confidentiality.
- Ex-vessel values are adjusted for inflation to 2016 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
