## **OEO/ADA Compliance Statement**

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

## **Abstract**

This report examines the economics of the Cook Inlet commercial salmon fisheries, which include purse seine (S01H permits), drift gillnet (S03H permits), and set gillnet (S04H permits). Included are summary statistics on the number of permit holdings, permanent and emergency transfers of permits, permit value, permit latency, new entrants, permit holder median age, estimated gross earnings, vessel characteristics for the purse seine and drift gillnet fisheries, dual and stacked permit operations in the drift gillnet fishery, and stacked permit operations in the set gillnet fishery. Some summary statistics are also broken out by resident type. A description of the computer files and methods used to generate the statistics are provided.

Prepared by Daniel Strong

## Introduction

In 1972, Alaskan voters amended the state constitution to allow limited entry in the state’s commercial fisheries. Following the amendment, in 1973 the Alaska State Legislature enacted the Limited Entry Act (AS 16.43), giving the Commercial Fisheries Entry Commission (CFEC) the authority to administer the program. Permit fisheries are defined by CFEC as a specific gear type for a fishery resource within a defined administrative area. The Cook Inlet salmon fisheries were part of an original group of 19 Alaska salmon fisheries that were limited after the Alaska legislature passed the limited entry act. Under the authority of AS 16.43.230, CFEC identified both the Cook Inlet drift and set net fisheries as “distressed fisheries” in the State’s limited entry regulations.<sup>1</sup> Salmon limited entry permits in all three Cook Inlet fisheries were first issued in 1975.

This report provides an overview of limited entry permit holdings and estimated gross earnings in the Cook Inlet commercial salmon fisheries. Commercial fishing in Cook Inlet has been documented as far back as 1893.<sup>2</sup> Historically, several gear types have been employed to catch salmon that include fish traps, gillnets, and seines. The three commercial salmon fisheries prosecuted today in Cook Inlet are: purse seine (S01H); drift gillnet (S03H); and set gillnet (S04H) fisheries. Participation in commercial salmon fishing in the Upper and Lower Cook Inlet management areas differ by gear group. In the Upper Cook Inlet management area, most of the commercial salmon fishing is prosecuted by both the set and drift gillnet fisheries. The use of purse seine gear is only employed by emergency order in the Chinitna Bay Subdistrict and was last used in 1982.<sup>3</sup> In the Lower Cook Inlet management area, most of the commercial salmon fishing is prosecuted by the purse seine fleet along with a few of the set gillnet permit holders. Information regarding season length, openings and closings, size, and other such data can be found in the Alaska Department of Fish and Game’s Area Management Reports.

This report focuses on the economics of these commercial fisheries. ADF&G fish tickets identify, among other things, the species harvested. Salmon species on fish tickets are well documented for each of these fisheries. Sockeye provides for most of the ex-vessel value in each of these fisheries except for pink salmon in the purse seine fishery. Note that variations do exist in the financial contribution for each of the five major salmon species commercially harvested in Cook Inlet from year to year and across each fishery. For each of the three gear groups, commercial harvest of species other than salmon were documented at rates less than 0.1% so they are not displayed in Table 0-1.

**Table 1-1. Percent of Total Ex-vessel Value of Cook Inlet by Species, 1975-2018**

Species	Cook Inlet Purse Seine	Cook Inlet Drift Gillnet	Cook Inlet Set Gillnet	All Combined
Chinook	0.1%	0.2%	3.9%	1.7%
sockeye	36.1%	84.5%	86.6%	82.2%
coho	1.5%	4.2%	5.9%	4.7%
pink	45.1%	1.4%	2.1%	4.5%
chum	17.2%	9.7%	1.5%	6.9%

<sup>3</sup> See Upper Cook Inlet Commercial Fisheries Annual Management Report, 2017, FMR No. 18-10.

## Data Display

Percentages are rounded to the nearest tenth of a percent where displayed. Dollars are rounded to whole dollars. As such, rounded aggregates may appear to not total due to rounding. If you would like more precise figures, please contact the CFEC research unit. Some counts will vary from previous research projects insofar as the data has been corrected and updated.

## Description of the Data Files Used to Generate This Report

Several CFEC data files were used to generate the statistics in this report: the gross earnings file, the permit file, the census file, the vessel file, and the Alaska Department of Natural Resources (DNR) shore fishery lease file. In addition to these files, a shape file from the DNR was combined with geographic information systems to create a map depicting set gillnet sites that have active DNR shore fishery leases. The most recent updated data is included in this report. The following is a brief description of each file. Please contact CFEC for more detail about these files if you are interested.

### CFEC Census File

CFEC maintains a computer file of places within Alaska where permit holders reside. Each community is annotated with information on its local or nonlocal status by permit fishery. Tables 0-2 lists the communities that are currently designated as local to salmon commercial fisheries in the Census file for this report.

**Table 1-2. Communities Local to the Cook Inlet Salmon Fisheries, as Indicated in the CFEC Census File**

Alexander	Chugiak	Fritz Creek	Kasitsna Bay	Nikolaevsk	Salamatof
Alexander Creek	Clam Gulch	Funny River	Kenai	Ninilchik	Seldovia
Anchor Point	Cohoe	Gateway	Kern	Palmer	Seldovia Village
Anchorage	Cooper Landing	Girdwood	Knik	Peters Creek	Seward
Bear Cove	Crown Point	Grouse Creek Group	Knik River	Point Mackenzie	Soldotna
Bear Creek	Diamond Ridge	Halibut Cove	Knik-Fairview	Point Possession	Spenard
Beluga	Eagle River	Happy Valley	Kustatan	Port Graham	Sterling
Beluga River	Eklutna	Homer	Lakes	Portage	Sunrise
Big Lake	Elmendorf AFB	Hope	Lowell Point	Portlock	Susitna
Birchwood	English Bay	Indian	Miller Landing	Potter	Tyonek
Bird Creek	Fire Island	Jakolof Bay	Moose Pass	Primrose	Wasilla
Bodenburg Butte	Fire Lake	Kachemak	Nanwalek	Rainbow	
Butte	Fort Richardson	Kalifornsky	Nikishka	Red Mountain	
Chenik	Fox River	Kasilof	Nikiski	Ridgeway	

### CFEC Gross Earnings File

The CFEC gross earnings file is based on ADF&G fish tickets and is augmented with CFEC permit holder and other data. The ex-vessel value for salmon in the CFEC gross earnings file largely come from the Commercial Operators Annual Report and ADF&G fish tickets with some additional information provided by processors. ADF&G salmon districts were mapped out from statistical areas using information provided by ADF&G. Several processes to validate and enhance fields such as vessel number and statistical area were undertaken to increase accuracy of this report. Because of the extraordinary circumstances of the 2018 Cook Inlet commercial fishery, preliminary harvest data for that season was included from OCEANAK. Typically, the time and effort to prepare harvest data ensures that this process is delayed; however, due to the low number of landings it was possible to include this preliminary data for this report.

## **CFEC Permit File**

The CFEC permit file contains data on persons who hold or have held CFEC permits. It originates from CFEC permit renewal and permit transfer forms. The permit file contains a data field indicating the declared residency of permit holders as well as their addresses.

In this report, resident status is categorized into three resident types:

- **Local** – *permits held by persons residing locally to the ADF&G management area*
- **Nonlocal** – *permits held by persons who reside in Alaska outside of the ADF&G management area*
- **Nonresidents** – *permits held by persons who are not residents of Alaska*

## **S03H Dual Permit File**

ADF&G provided a file with all permits used in dual permit operations from 2008 through 2018. This file includes dates when landings were made by permit combinations as well as referencing the actual landings. Data from the dual permit file was merged into the CFEC gross earnings file.

## **DNR Shore Fishery Lease Data File**

The DNR Land Administration System contains records used to maintain the DNR Shore Fishery Lease program. These records were merged with the CFEC permit file to create a dataset. Creation of the dataset is described in CFEC Report Number 18-4N, *CFEC Salmon Set Gillnet Permits and DNR Shore Fishery Leases in Prince William Sound, Cook Inlet, Kodiak, Cook Inlet, and Bristol Bay 1975-2017*.

*This page intentionally left blank*

## Chapter 1 - Cook Inlet Salmon Purse Seine Fishery (S01H)

### S01H Permit Holdings

License limitation permits for the Cook Inlet salmon purse seine fishery (S01H permits) were issued starting in 1975. Table 3 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 85 S01H permits<sup>4</sup>. Of this total, Alaska Locals received 97.6% (83) of the permits, Nonlocal Alaskans and Nonresidents received one permit each (1.2%). Every permit issued was a transferable permit.

**Table 1-1. Initial Issuance and Year-end 2018 Totals of Cook Inlet Salmon Purse Seine Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type**

INITIAL ISSUE			TRANSFERS		MIGRATIONS		CANCELLED		2018 YEAR-END	
Residency	Total	Percent	Change	Percent Change from Initial	Change	Percent Change from Initial	Change	Percent Change from Initial	Total	Percent
Local	83	97.6%	2	2.4%	-6	-7.2%	-1	-1.2%	78	94.0%
Nonlocal	1	1.2%	2	200.0%	-3	-300.0%	0	0.0%	0	0.0%
Nonresident	1	1.2%	-4	-400.0%	9	900.0%	-1	-100.0%	5	6.0%
<b>Total</b>	<b>85</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>	<b>0</b>	<b>0.0%</b>	<b>-2</b>	<b>-2.4%</b>	<b>83</b>	<b>100.0%</b>

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Migrations have had the largest impact on the changes.

<sup>4</sup> Because the number of priority-classified applicants exceeded the maximum number of permits, the initial issuance is greater than the maximum number set in 20 AAC 05.320.

## Transfers of S01H Permits

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.<sup>5</sup> The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

**Table 1-2. Transfer Acquisition Methods for Cook Inlet Salmon Purse Seine Permits, 1980-2018**

Acquisition Method	S01H Permit		Cook Inlet Combined Salmon		Statewide Salmon Purse Seine		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Gift</i>	106	41.2%	2,116	42.7%	1,210	31.8%	14,202	36.7%
<i>Sale</i>	132	51.4%	2,583	52.2%	2,396	63.0%	22,761	58.8%
<i>Trade</i>	4	1.6%	56	1.1%	64	1.7%	523	1.4%
<i>Other</i>	15	5.8%	195	3.9%	134	3.5%	1,238	3.2%
<b>Total</b>	<b>257</b>		<b>4,950</b>		<b>3,804</b>		<b>38,724</b>	

Table 1-2 presents transfer acquisition methods for the S01H permits, all three Cook Inlet salmon permit types combined, statewide salmon purse seine permits, and all limited entry permits between 1980 and 2018. During the 1980 – 2018 period, just over half of all S01H permit transfers were sales (51.4%, or 132/257), a large percentage were transferred as gifts (41.2% or 106/257), and a smaller percentage were trades (1.6% or 4/257) or other (5.8% or 15/257). The annual acquisition methods for the limited S01H permits have not changed substantially throughout the time period.<sup>6</sup>

**Table 1-3. Relationships of Transferor to Transfer Recipients among Cook Inlet Salmon Purse Seine Permits, 1980-2018**

Relationship	S01H Permit		Cook Inlet Combined Salmon		Statewide Salmon Purse Seine		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Business Partner/Friend</i>	41	16.0%	983	19.9%	679	17.8%	7,169	18.5%
<i>Member of Immediate Family</i>	96	37.4%	1,775	35.9%	1,220	32.1%	13,096	33.8%
<i>Other Relative</i>	20	7.8%	320	6.5%	148	3.9%	1,769	4.6%
<i>Other</i>	100	38.9%	1,872	37.8%	1,757	46.2%	16,690	43.1%
<b>Total</b>	<b>257</b>		<b>4,950</b>		<b>3,804</b>		<b>38,724</b>	

Table 1-3 shows the relationships between the transferors and transfer recipients for S01H permits, all three Cook Inlet salmon permit types combined, statewide salmon purse seine permits, and all limited entry permits from 1980 to 2018. For the S01H permit transfers, both immediate family members and other relatives, total 45.1% (116 /257) of all transfers. This compares to 41.3% (2,095/4,950) for all three Cook Inlet salmon permit types combined, 36% (1,368/3,804) for statewide salmon purse seine permits, and 38.4% (14,865 /38,724) for all limited entry permits statewide.

<sup>5</sup> CFEC implemented the transfer survey in 1980.

<sup>6</sup> See *Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2018*, CFEC Report No. 19-2N.

## S01H Permit Value

Many permit transfers are non-monetary transactions (see Table 1-2). Only arms-length market permit sales were used in calculating permit values. Estimated values are expressed in both nominal and real (adjusted for inflation) terms.

**Table 1-4. CFEC Estimated Value of Cook Inlet Salmon Purse Seine Permits**

Year	S01H Permit Sales	Nominal		Real	
		Permit Value	Standard Deviation	Permit Value	Standard Deviation
1982	5	\$84,267	-	\$219,275	-
1983	8	\$90,000	-	\$226,904	-
1984	1	-	-	-	-
1985	4	\$58,375	-	\$136,230	-

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1991.
- Real permit values were calculated using the 2018 Consumer Price Index from the U.S. Bureau of Labor Statistics.

## Emergency Transfers of S01H Permits

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman. At the end of the year, ET permits automatically revert to the permanent permit holder.

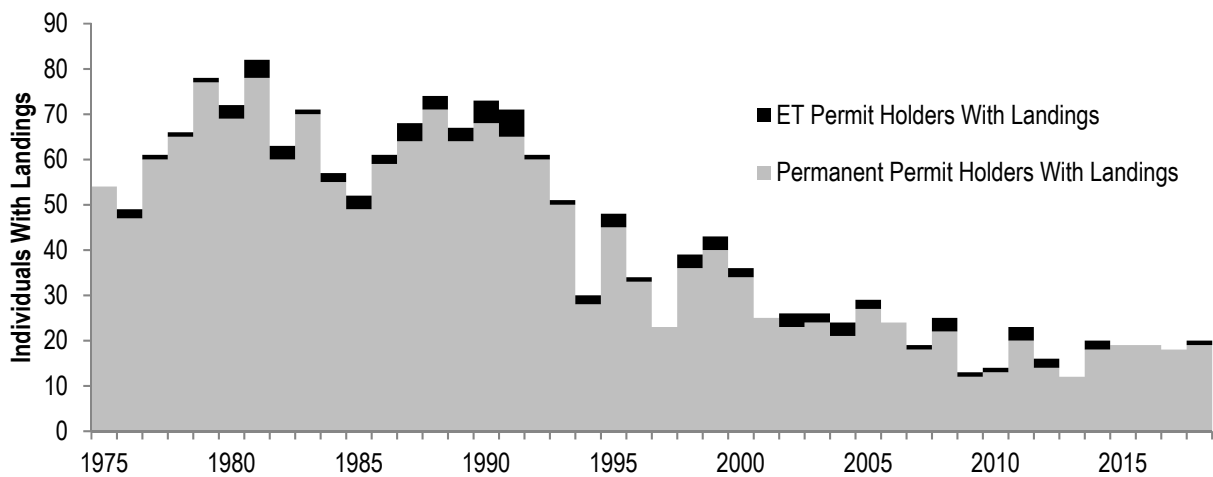

Table 1-5 and Figure 1-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with emergency transfer permits also made landings with permanent permits in the same year.

**Table 1-5. Use of Emergency Transfer Permits in the Cook Inlet Salmon Purse Seine Fishery, 1975-2018**

Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate

**Figure 1-1. Use of Emergency Transfer Permits in the Cook Inlet Salmon Purse Seine Fishery, 1975-2018**

## Latent S01H Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a given year are referred to herein as "latent" permits for that year.

Table 1-6 indicates the total number of viable S01H permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 1-2.

**Table 1-6. Cook Inlet Salmon Purse Seine Permit Latency, 1975-2018**

Year	Permits		Latency	Year	Permits		Latency	Year	Permits		Latency
	Issued	Fished	Rate		Issued	Fished	Rate		Issued	Fished	Rate
1975	89	54	39.3%	1990	83	71	14.5%	2005	82	29	64.6%
1976	78	49	37.2%	1991	83	68	18.1%	2006	82	24	70.7%

1979	84	77	8.3%	1994	84	30	64.3%	2009	82	13	84.1%
1980	84	71	15.5%	1995	84	46	45.2%	2010	82	14	82.9%
1981	85	82	3.5%	1996	85	34	60.0%	2011	83	23	72.3%
1982	84	63	25.0%	1997	85	23	72.9%	2012	83	16	80.7%
1983	83	71	14.5%	1998	83	39	53.0%	2013	83	12	85.5%
1984	81	54	33.3%	1999	83	43	48.2%	2014	84	20	76.2%
1985	82	51	37.8%	2000	83	36	56.6%	2015	84	19	77.4%
1986	83	61	26.5%	2001	83	25	69.9%	2016	84	19	77.4%
1987	83	67	19.3%	2002	82	25	69.5%	2017	84	18	78.6%
1988	83	72	13.3%	2003	81	26	67.9%	2018	83	20	75.9%
1989	83	64	22.9%	2004	81	24	70.4%				

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year.

**Figure 1-2. Cook Inlet Salmon Purse Seine Permit Latency Rate, 1975-2018**

# New Entrants into the Cook Inlet Salmon Purse Seine Fishery

New entrants are individuals who recorded a landing on a permanent S01H permit for the first time. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 in order to qualify for a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 1-7 and Figure 1-3 describe individuals rather than permits. An individual may hold up to two permits in a fishery but can only fish one of them. Individuals may hold one S01H permit one year but in subsequent years hold a different S01H permit, and they may also enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

**Table 1-7. New Entrants into the Cook Inlet Salmon Purse Seine Fishery, 1975-2018**

Year	Individuals w/Landings	New Entrants Count	Percent	Year	Individuals w/Landings	New Entrants Count	Percent	Year	Individuals w/Landings	New Entrants Count	Percent
1975	32	0	0.0%	1990	72	4	5.6%	2005	29	7	24.1%

2017	49.1	47.3	52.4	51.3	39.6
2018	49.5	47.2	52.6	51.7	39.6

- Mean AK Worker Age is the annual average age of all Alaskans age 16-64 as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Age data from the CFEC permit file is as of December 31<sup>st</sup> of each year.

Table 1-8 shows the annual mean age of five different cohorts of people: 1) Cook Inlet salmon purse seine (S01H) permit holders, 2) all three Cook Inlet salmon permit holders (S01H, S03H, and S04H), 3) statewide salmon purse seine permit holders 4) all CFEC limited entry permit holders, and 5) the general Alaskan population. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

Between 1975 and 2018, the mean age of the general Alaskan population has increased 6.2 years, which represents an 18.5% increase. The percent change in ages over the same period for all CFEC permit holders increased by 32.9% (12.8 years), 24.3% (10.3 years) for the statewide salmon purse seine permit holders, and 17.7% (7.1 years) for the combined Cook Inlet salmon permit holders. For S01H permit holders, the mean age increased 23.1% (9.3 years).

## S01H Purse Seine Vessel Characteristics

Table 1-9 reports on various vessel characteristics of the Cook Inlet salmon purse seine fleet since 1978. These data are from the vessel license file which includes voluntarily reported statistics of vessels. Reported are the age, length, net tonnage, horsepower, and hold capacity. The first column of each category reports the count of vessels with described characteristics. Statistics reported include the 25<sup>th</sup> percentile, median, and 75<sup>th</sup> percentile for vessel age, length, weight, horsepower and capacity.

**Table 1-9. Cook Inlet Salmon Purse Seine Vessel Characteristics**

Year	Vessel Count	Vessel Age				Length in Feet				Net Tons				Horsepower				Hold Capacity (ft <sup>3</sup> )			
		Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%

- Counts represent the total number of vessels with the corresponding data. Not all vessels have data for each of the characteristics.

*Cook Inlet Salmon Purse Seine (S01H)*

Table 1-10 provides additional Cook Inlet salmon purse seine vessel characteristics. Included are statistics of engine propulsion and hull material for each year since 1978.

## S01H Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 1-4 are for both nominal and real dollars using the 2018 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim-entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the Cook Inlet salmon purse seine fishery was in 2008. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

**Figure 1-4. Cook Inlet Salmon Purse Seine Permit Estimated Nominal and Real Average Gross Earnings**

- Real earnings are adjusted for inflation using the 2018 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 1-11 reports the number of permits issued, permits and vessels with landings, and estimated gross earnings in the Cook Inlet salmon purse seine fishery from 1975 to 2018. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred. Table 1-12 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Table 1-13 provides earnings by Cook Inlet district.

**Table 1-11. Estimated Total Gross Earnings (Real and Nominal) for the Cook Inlet Salmon Purse Seine Fishery, With Average Earnings (Real) by Permit and Vessel, 1975-2018**

Year	Permits Issued	Total Gross Earnings		Permits With Landings	Average Real Earnings	Vessels with Landings	Average Real Vessel Earnings

## Chapter 2 - Cook Inlet Salmon Drift Gillnet Fishery (S03H)

### S03H Permit Holdings

License limitation permits for the Cook Inlet salmon drift gillnet fishery (S03H permits) were issued starting in 1975. Table 2-1 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 573 S03H permits. Of this total, Alaska Locals received 64.0% (367) of the permits, Nonlocal Alaskans received 3.7% (21) of the permits, and the remaining 32.3 % (185) of the permits went to Nonresidents. Every permit issued was a transferable permit.

**Table 2-1. Initial Issuance and Year-end 2018 Totals of Cook Inlet Salmon Drift Gillnet Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type**

INITIAL ISSUE			TRANSFERS		MIGRATIONS		CANCELLED		2018 YEAR-END	
Residency	Total	Percent	Change	Percent Change from Initial	Change	Percent Change from Initial	Change	Percent Change from Initial	Total	Percent
Local	367	64.0%	73	19.9%	-45	-12.3%	-1	-0.3%	394	69.4%
Nonlocal	21	3.7%	2	9.5%	-2	-9.5%	0	0.0%	21	3.7%
Nonresident	185	32.3%	-75	-40.5%	47	25.4%	-4	-2.2%	153	26.9%
<b>Total</b>	<b>573</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>	<b>0</b>	<b>0.0%</b>	<b>-5</b>	<b>-0.9%</b>	<b>568</b>	<b>100.0%</b>

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Transfers have had the largest impact on the changes, particularly between locals and nonresidents; however, some of the change has been offset by migrations.

## Transfers of S03H Permits

Under the Limited Entry Act’s terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.<sup>7</sup> The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

**Table 2-2. Transfer Acquisition Methods for Cook Inlet Salmon Drift Gillnet Permits, 1980-2018**

Acquisition Method	S03H Permits		Cook Inlet Combined Salmon		Statewide Salmon Drift Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Gift</i>	732	36.0%	2,116	42.7%	3,838	32.6%	14,202	36.7%
<i>Sale</i>	1,197	58.8%	2,583	52.2%	7,380	62.7%	22,761	58.8%
<i>Trade</i>	31	1.5%	56	1.1%	119	1.0%	523	1.4%
<i>Other</i>	74	3.6%	195	3.9%	436	3.7%	1,238	3.2%
<b>Total</b>	<b>2,034</b>		<b>4,950</b>		<b>11,773</b>		<b>38,724</b>	

Table 2-2 presents transfer acquisition methods for the S03H permits, all three Cook Inlet salmon permit types combined, statewide salmon drift gillnet permits, and all limited entry permits between 1980 and 2018. During the 1980 – 2018 period, over half of all S03H transfers were sales (58.8% or 1,197/2,034), about one third are gifts (36% or 732/2,034), and a smaller percentage were trades (1.5% or 31/2,034) or other (3.6% 74/2,034). The annual acquisition methods for the limited S03H permits have not changed substantially throughout the time period<sup>8</sup>

**Table 2-3. Relationships of Transferor to Transfer Recipients among Cook Inlet Salmon Drift Gillnet Permits, 1980-2018**

Relationship	S03H Permits		Cook Inlet Combined Salmon		Statewide Salmon Drift Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Business Partner/Friend</i>	305	15.0%	983	19.9%	1,941	16.5%	7,169	18.5%
<i>Member of Immediate Family</i>	731	35.9%	1,775	35.9%	3,694	31.4%	13,096	33.8%
<i>Other Relative</i>	99	4.9%	320	6.5%	490	4.2%	1,769	4.6%
<i>Other</i>	899	44.2%	1,872	37.8%	5,648	48.0%	16,690	43.1%
<b>Total</b>	<b>2,034</b>		<b>4,950</b>		<b>11,773</b>		<b>38,724</b>	

Table 2-3 shows the relationships between the transferors and transfer recipients for S03H permits, all three Cook Inlet salmon permit types combined, statewide salmon drift gillnet permits, and all limited entry permits from 1980 to 2018. Permit transfers, both between immediate family members and other relatives, total 40.8% (830/2,034) of all permit transfers for S03H permits compared to 42.3% (2,095/4,950) for all three Cook Inlet salmon permit types combined, 35.5% (4,184/11,773) for all statewide salmon drift gillnet permits, and 38.4% (14,865/38,724) for all limited entry permits statewide.

<sup>7</sup> CFEC implemented the transfer survey in 1980.

<sup>8</sup> See *Changes in the Distribution of Alaska’s Commercial Fisheries Entry Permits, 1975-2018*, CFEC Report No. 19-2N.

## S03H Permit Value

Many permit transfers are non-monetary transactions (see Table 2-2). Table 2-4 considers solely arms-length market transactions where permits are sold. CFEC estimated values are expressed in both nominal and real (adjusted for inflation) terms.

**Table 2-4. CFEC Estimated Value of Cook Inlet Salmon Drift Gillnet Permits**

Year	S03H Permit Sales	Nominal		Real	
		Permit Value	Std. Dev.	Permit Value	Std. Dev.
1982	41	\$58,176	-	\$151,382	-

2011	38	\$51,700	\$6,250	\$57,714	\$6,977
2012	36	\$76,400	\$5,200	\$83,559	\$5,687
2013	28	\$83,100	\$7,200	\$89,574	\$7,761
2014	22	\$74,400	\$6,350	\$78,916	\$6,735
2015	20	\$63,500	\$9,750	\$67,275	\$10,330
2016	10	\$52,500	\$4,150	\$54,928	\$4,342
2017	19	\$42,400	\$4,800	\$43,436	\$4,917
2018	21	\$39,900	\$7,350	\$39,900	\$7,350

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1991.
- Real permit values were calculated using the 2018 Consumer Price Index from the U.S. Bureau of Labor Statistics.

## Emergency Transfers of S03H Permits

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman. At the end of the year, ET permits automatically revert to the permanent permit holder.

Table 2-5 and Figure 2-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

**Table 2-5. Use of Emergency Transfer Permits in the Cook Inlet Salmon Drift Gillnet Fishery, 1975-2018**

Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate

## Latent S03H Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a given year are referred to herein as "latent" permits for that year.

Table 2-6 shows the total number of viable S03H permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 2-2.

**Table 2-6. Cook Inlet Salmon Drift Gillnet Permit Latency, 1975-2018**

Year	Permits		Latency Rate	Year	Permits		Latency Rate	Year	Permits		Latency Rate
	Issued	Fished			Issued	Fished			Issued	Fished	
1975	636	464	27.0%	1990	585	582	0.5%	2005	571	471	17.5%
1976	584	511	12.5%	1991	584	578	1.0%	2006	570	396	30.5%
1977	572	531	7.2%	1992	583	580	0.5%	2007	571	417	27.0%
1978	589	578	1.9%	1993	583	580	0.5%	2008	571	433	24.2%
1979	599	592	1.2%	1994	583	569	2.4%	2009	570	416	27.0%

1984	588	578	1.7%	1999	576	487	15.5%	2014	571	532	6.8%
1985	591	584	1.2%	2000	576	513	10.9%	2015	569	518	9.0%
1986	588	584	0.7%	2001	574	467	18.6%	2016	569	504	11.4%
1987	586	585	0.2%	2002	572	409	28.5%	2017	569	470	17.4%
1988	585	584	0.2%	2003	572	418	26.9%	2018	568	478	15.8%
1989	585	10	98.3%	2004	571	440	22.9%				

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year

**Figure 2-2. Cook Inlet Salmon Drift Gillnet Permit Latency Rate, 1975-2018**

## New Entrants into the Cook Inlet Salmon Drift Gillnet Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S03H permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 in order to become an initial permit holder. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 2-7 and Figure 2-3 describe individuals rather than permits. An individual may hold up to two permits in this fishery but can only fish one of them. An individual may hold one S03H permit one year, and then in subsequent years hold a different S03H permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing on a permanent permit.

**Table 2-7. New Entrants into the Cook Inlet Salmon Drift Gillnet Fishery, 1975-2018**

Year	Individuals w/Landings	New Entrants Count	Percent	Year	Individuals w/Landings	New Entrants Count	Percent	Year	Individuals w/Landings	New Entrants Count	Percent

2017	49.7	47.3	48.7	51.3	39.6
2018	50.5	47.2	48.9	51.7	39.6

- Mean AK Worker Age is the annual average age of all Alaskans age 16-64 as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Age data from the CFEC permit file is as of December 31<sup>st</sup> of each year.

Table 2-8 shows the annual mean age of five different cohorts of people: 1) Cook Inlet salmon drift gillnet (S03H) permit holders, 2) all three Cook Inlet salmon permit holders(S01H, S03H, and S04H), 3) statewide salmon drift gillnet permit holders, 4) all CFEC limited entry permit holders, and 5) the general Alaskan population. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

Between 1975 and 2018, the mean age of the general Alaskan population has increased 6.2 years, which represents an 18.5% increase. The percent change in ages over the same period for all CFEC permit holders increased by 32.9% (12.8 years), 16.1% (6.8 years) for the statewide drift gillnet permit holders, and 17.7% (7.1 years) for the combined Cook Inlet salmon permit holders. For S03H permit holders, the mean age increased 18.2% (7.8 years).

## S03H Permit Stacking

In 2002, the Alaska Legislature amended Alaska Statute 16.43.140 (c) to allow for individuals to hold two salmon permits. In 2006, the legislature passed House Bill 251 which allows the Alaska Board of Fisheries (BOF) the authority to grant fishing privileges to the second permit held by an individual. Since 2017, the BOF has allowed for stacked permit operations in the Cook Inlet set gillnet fishery.<sup>9</sup> A stacked permit operation is where an individual who holds two permits can fish up to two full complements of gear. A single permit operation is where an individual only holds one permit. Appendix B lists regulations covering dual permits and permit stacking.

Reporting on counts of stacked permit operations is not a simple task. Permits can change hands multiple times throughout the year. An individual may fish in a single permit operation at the beginning of season then fish as a stacked operation after acquiring a second permit midseason. An individual in a stacked permit operation might use an Emergency Transfer permit for part of the season, and then have a permanently held second permit for the rest of the season. Table 2-9 provides data on participation in stacked permit operations. Note that this table reports on individuals and not permits.

**Table 2-9. Cook Inlet Salmon Drift Gillnet Participation, Effort, and Earnings by Operation and Resident Type, 2017-2018**

## S03H Drift Gillnet Vessel Characteristics

Table 2-10 reports on various vessel characteristics of the Cook Inlet Salmon drift gillnet fleet since 1978. Reported in this table are the age, length, horsepower, hold refrigeration, and hold capacity. This data is from the vessel license file which includes voluntarily supplied information on vessels. Statistics reported include the count of vessels with the described characteristics, as well as 25<sup>th</sup> percentile, median, and 75<sup>th</sup> percentile for vessel age, length, weight, horsepower and capacity.

**Table 2-10. Cook Inlet Salmon Drift Gillnet Vessel Characteristics**

- Counts represent the total number of vessels with the corresponding data. Not all vessels have data for each of the characteristics.

Table 2-11 provides additional Cook Inlet Salmon drift gillnet vessel characteristics. Included are statistics of engine propulsion and hull material for each year since 1978.

**Table 2-11. Additional Cook Inlet Salmon Drift Gillnet Vessel Characteristics**

## S03H Dual Permit Operations

The Alaska Board of Fisheries (BOF) enacted 5 AAC 21.333 which allow for two Cook Inlet salmon drift gillnet permit holders to fish from a single vessel starting in 2008. Beginning in 2014, permit holders in dual permit operations were no longer required to register as a dual operation. However, dual participation is still documented on fish tickets. Appendix B lists regulations covering dual permits and permit stacking.

Figure 2-4 shows the percentage of landings for both single and dual permit operations by year between 2008 and 2018. Landings are defined as all landings made on a given day by a permit operation. Two permit holders made a commercial landing together as a dual permit operation were only counted as a single entity for that day. Some permit holders who participated in the fishery both as a single permit operation and part a dual permit operation had landings counted in both categories (on different days), depending how they were fishing the day the landing was made.

**Figure 2-4. Cook Inlet Drift Gillnet Permit Landings by Operation Type, 2008 – 2018**

In 2008, 2.2% of all landings were made by dual permit operations. Since 2010, the rate of landings made by dual permit operations has fluctuated between 10.1% and 16.9%.

Table 2-12 shows counts of dual permit operations utilizing either permanently transferred permits, or temporary emergency transfer permits, or both. If a permit was fished by a transferee and subsequently permanently transferred to that person in the same season, the permit was only counted as a permanent permit. Also, a dual permit operation sometimes re-forms with different permit holders and permits, so permit operation counts will not always compare to permit holder counts.

**Table 2-12. Use of Emergency Transfer Permits in S03H Dual Permit Operations**

Year	Both Permanent		One Permanent		Both ET		Total
	Count	Percent	Count	Percent	Count	Percent	
2008	7	77.8%	2	22.2%	0	0.0%	9
2009	17	81.0%	4	19.0%	0	0.0%	21
2010	45	76.3%	14	23.7%	0	0.0%	59
2011	54	78.3%	15	21.7%	0	0.0%	69

2013	53	77.9%	15	22.1%	0	0.0%	68
2014	56	87.5%	8	12.5%	0	0.0%	64
2015	54	88.5%	7	11.5%	0	0.0%	61
2016	51	83.6%	10	16.4%	0	0.0%	61
2017	33	91.7%	3	8.3%	0	0.0%	36
2018	36	92.3%	3	7.7%	0	0.0%	39

Table 2-13 reports on the resident type combinations of the individuals in dual permit operations with landings. Resident type is counted as the residency status of the permit holder at the end of the year. The percentages are for the entire resident type participating in the fishery as dual permit operations. Note that permit holders can regroup, thereby increasing the total count of dual permit operations.

**Table 2-13. Resident Type of Individuals in S03H Dual Permit Operations**

Year	Both Local		Both Nonlocal		Both Nonresident		Local/Nonlocal		Local/Nonresident		Nonlocal/Nonresident		Total Combinations
	Count	Percent	Count	Percent	Count	Percent	Count	Percent	Count	Percent	Count	Percent	
2008	5	55.6%	0	0.0%	2	22.2%	0	0.0%	2	22.2%	0	0.0%	9

2017	23	63.9%	2	5.6%	7	19.4%	1	2.8%	3	8.3%	0	0.0%	36
2018	26	66.7%	2	5.1%	4	10.3%	3	7.7%	3	7.7%	1	2.6%	39

Table 2-14 reports earnings by resident type of permit holders and their operation type. Individuals that participated at any time in a dual permit operation are categorized as that type. Note that earnings are averaged not by permits but are for individual permit holders. Table 2-12 counts dual permit operations, while Tables 2-13 and 2-14 count individuals.

Table 2-14. Earnings of S03H Permit Holders by Resident and Operation Type

## S03H Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices largely come from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings are shown in Figure 2-5 for both nominal and real (inflation-adjusted) dollars using the 2018 Consumer Price Index from the U.S. Bureau of Labor Statistics. 2018 ex-vessel values are preliminary and only include information from ADF&G fish tickets. Permit counts include interim-entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the Cook Inlet drift gillnet fishery was in 2005. Some individuals made landings on both an interim-entry permit and subsequently on their adjudicated permanent permit in the same year; for these instances, only the permanent permit is counted.

**Figure 2-5. Estimated Nominal and Real Average Gross Earnings per Cook Inlet Salmon Drift Gillnet Permit**

• Real earnings are adjusted for inflation using the 2018 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 2-15 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Table 2-16 shows the number of permit holders and earnings by resident type. Table 2-17 aggregates participation and earnings by district.

## Chapter 3 - Cook Inlet Salmon Set Gillnet Fishery (S04H)

### S04H Permit Holdings

Limited entry permits for the Cook Inlet salmon set gillnet fishery (S04H permits) were issued starting in 1975. Table 3-1 shows the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 746 S04H permits. Of this total, Alaska Locals received 87% (649) of the permits, Nonlocal Alaskans received 5.5% (41) and Nonresidents received 7.5% (56) of the permits. Every permit issued was a transferable permit.

**Table 3-1. Initial Issuance and Year-end 2018 Totals of Cook Inlet Salmon Set Gillnet Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type**

INITIAL ISSUE			TRANSFERS		MIGRATIONS		CANCELLED		2018 YEAR-END	
Residency	Total	Percent	Change	Percent Change from Initial	Change	Percent Change from Initial	Change	Percent Change from Initial	Total	Percent
Local	649	87.0%	1	0.2%	-46	-7.1%	-11	-1.7%	593	80.7%
Nonlocal	41	5.5%	-22	-53.7%	-3	-7.3%	0	0.0%	16	2.2%
Nonresident	56	7.5%	21	37.5%	49	87.5%	0	0.0%	126	17.1%
<b>Total</b>	<b>746</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>	<b>0</b>	<b>0.0%</b>	<b>-11</b>	<b>-1.5%</b>	<b>735</b>	<b>100.0%</b>

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Migrations have had the largest impact on the changes. Each of the permits cancelled were due to nonpayment.

## Transfers of S04H Permits

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.<sup>10</sup> The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

**Table 3-2. Transfer Acquisition Methods for Cook Inlet Salmon Set Gillnet Permits, 1980-2018**

Acquisition Method	Cook Inlet Salmon Set Gillnet		Combined Cook Inlet		Statewide Salmon Set Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	1,278	48.1%	2,116	42.7%	7,028	56.5%	14,202	36.7%
Sale	1,254	47.2%	2,583	52.2%	4,849	39.0%	22,761	58.8%
Trade	21	0.8%	56	1.1%	97	0.8%	523	1.4%
Other	106	4.0%	195	3.9%	472	3.8%	1,238	3.2%
<b>Total</b>	<b>2,659</b>		<b>4,950</b>		<b>12,446</b>		<b>38,724</b>	

Table 3-2 shows the transfer acquisition methods for the S04H permits, combined Cook Inlet Salmon permit types, all statewide salmon set gillnet permits, and all limited entry permits between 1980 and 2018. Almost half of all S04H transfers were gifts (48.1% or 1,278/2,659), just under half were sales (47.2% or 1,254/2,659), and a smaller percentage were trades (0.8% or 21/2,659) or other (4.0% or 106/2,659). The annual acquisition methods for S04H permits can be viewed in a different publication.<sup>11</sup>

**Table 3-3. Relationships of Transferor to Transfer Recipients among Cook Inlet Salmon Set Gillnet Permits, 1980-2018**

Relationship	Cook Inlet Salmon Set Gillnet		Combined Cook Inlet		Statewide Salmon Set Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Business Partner/Friend	637	24.0%	983	19.9%	2,413	19.4%	7,169	18.5%
Member of Immediate Family	948	35.7%	1,775	35.9%	6,017	48.3%	13,096	33.8%
Other Relative	201	7.6%	320	6.5%	880	7.1%	1,769	4.6%
Other	873	32.8%	1,872	37.8%	3,136	25.2%	16,690	43.1%
<b>Total</b>	<b>2,659</b>		<b>4,950</b>		<b>12,446</b>		<b>38,724</b>	

Table 3-3 shows the relationships between the transferors and transfer recipients for S04H permits and compares S04H permit transfers with the combined Cook Inlet Salmon permit types, all statewide salmon set gillnet permits, and all limited entry permits from 1980 to 2018. Transfers within the family, both between immediate family members and other relatives, total 43.2% (1,149/2,659) of all permit transfers for S04H permits compared to 42.3% (2,095/4,950) combined Cook Inlet Salmon permit types, 55.4% (6,897/12,446) for all salmon set gillnet permits statewide, and 38.4% (14,865/38,742) for all limited entry permits statewide.

<sup>10</sup> CFEC implemented the transfer survey in 1980.

<sup>11</sup> See *Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2017*, CFEC Report No. 18-2N.

## S04H Permit Value

Many permit transfers are non-monetary transactions (see Table 3-2). Table 3-4 considers solely arms-length market transactions where permits are sold. CFEC estimated values are expressed in both nominal and real (adjusted for inflation) terms.

**Table 3-4. CFEC Estimated Value of Cook Inlet Salmon Set Gillnet Permits**

Year	S04H Permit Sales	Nominal		Real	
		Permit Value	Std Dev	Permit Value	Std Dev
1983	51	\$18,340	-	\$46,238	-

2018	8	\$17,100	\$2,000	\$17,100	\$2,000

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1991.
- Real permit values were calculated using the 2018 Consumer Price Index from the U.S. Bureau of Labor Statistics.

## Emergency Transfers of S04H Permits

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman. At the end of each year, ET permits automatically revert to the permanent permit holder.

Table 3-5 shows the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

**Table 3-5. Use of Emergency Transfer Permits in the Cook Inlet Set Gillnet Fishery, 1975-2018**

Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate
1975	526	22	4.2%	1990	673	20	3.0%	2005	501	13	2.6%

1989	668	18	2.7%	2004	483	12	2.5%				

## Latent S04H Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a given year are considered "latent" for that year.

Table 3-6 shows the total number of viable S04H permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits.

In some cases, it's difficult to accurately count the number of latent permits. For example, permits might be active in the fishery but might not be used to record landings. This can occur when permit holders fish in a group, especially among family or friends, and the group records their landings on only one, or some, of the group's permits. Although this practice is not legal,<sup>12</sup> it allegedly occurs in the set gillnet fisheries at a rate higher than in other fisheries. The effect would be to under-count the number of permits active in the fishery, and over-estimate the latency rate.

Individuals who hold a DNR Shore Fishery Lease are required by regulation to fish at least four openings in years when they hold a lease, unless they refrain for no more than one year from using the site.<sup>13</sup> The 'Permits Fished and/or DNR Lease' column counts permits that either held a DNR Shore Fishery Lease or made a commercial landing. The actual annual rate of latency likely lies between the rates given in this table.

**Table 3-6. Cook Inlet Salmon Set Gillnet Permit Latency, 1975-2018**

Year	Total Fishery Permits	Permits With Landings	Latency Rate	Permit Landings and/or DNR Lease	Latency Rate
1975	759	522	31.2%	549	27.7%

2016	735	528	28.2%	591	19.6%
2017	735	518	29.5%	585	20.4%
2018	735	512	30.3%	581	21.0%

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted.
- 'Permits with Landings' is the number of CFEC permits that were used to record commercial landings in that year.
- 'Permit Landings and/or DNR Lease' is the number of CFEC permits that were used to record a landing or were associated with a DNR shore fishery lease.

<sup>12</sup> See AS 16.05.680 (b) and AS 16.05.690 (b).

<sup>13</sup> See 11 AAC 64.180.

## New Entrants into the Cook Inlet Salmon Set Gillnet Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S04H permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 in order to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 3-7 and Figure 3-1 describe individuals rather than permits. An individual may hold up to two permits in this fishery but can only fish one of them. An individual may hold one S04H permit one year, and then in subsequent years hold a different S04H permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

**Table 3-7. New Entrants into the Cook Inlet Salmon Set Gillnet Fishery, 1975-2018**

Year	Individuals w/Landings	New Entrants Count	New Entrants Percent	Year	Individuals w/Landings	New Entrants Count	New Entrants Percent	Year	Individuals w/Landings	New Entrants Count	New Entrants Percent	Year	Individuals w/Landings	New Entrants Count	New Entrants Percent

2018	51.0	47.2	48.4	51.7	39.6

- Mean AK Worker Age is the annual average age of all Alaskans age 16-64 as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Age data from the CFEC permit file is as of December 31<sup>st</sup> of each year.

Table 3-8 shows the annual mean age of five different cohorts of people: 1) Cook Inlet Salmon set gillnet (S04H) permit holders; 2) combined Cook Inlet Salmon permit holders; 3) all salmon set gillnet permit holders statewide; 4) all CFEC limited entry permit holders; and 5) the Alaskan worker population.

Note that these figures include ages of permit holders for both transferable and non-transferable permits. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

Between 1980 and 2018, the mean age of the general Alaskan worker age population has increased 6.2 years, which represents an 18.5% increase. The percent change in ages over the same period for all CFEC permit holders was 32.9% (12.8 years), 27.7% (10.5 years) for the statewide set gillnet permit holders, and 17.7% (7.1 years) for the combined Cook Inlet Salmon permit holders. For S04H permit holders, the mean age increased 36.3% (13.6 years).

## S04H Permit Stacking

Table 3-9 provides data on upper Cook Inlet participation in stacked permit operations. Note that this table reports on individuals and not permits. Earnings are adjusted for inflation using the U.S. Bureau of Labor Statistics 2018 Consumer Price Index. Appendix B lists regulations covering dual permits and permit stacking.

**Table 3-9. Upper Cook Inlet Salmon Set Gillnet Participation, Effort, and Earnings by Operation and Resident Type, 2011-2018**

Year	Residency	Operation Type	Individuals with Landings	Effort	Ex-vessel Value	Average Ex-Vessel Value	Individuals	Ex-vessel Percentage

- Adjusted for inflation to 2018 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Data is masked due to confidentiality when fewer than four individuals participate in a fishery. Also masked are any values that would allow someone to calculate the counts using other figures in the same table.

## S04H Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, come primarily from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 4-3 reflect both nominal and real dollars using the 2018 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim-entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held in the Cook Inlet Salmon set gillnet fishery was in 1997. Some individuals made landings on both an interim-entry permit and a permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

**Figure 3-2. Estimated Nominal and Real Average Gross Earnings Per Cook Inlet Salmon Set Gillnet Permit**

- Real earnings are adjusted for inflation using the 2018 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 3-10 reports the number of permits issued, and permits with landings, and estimated gross earnings in the Cook Inlet salmon set gillnet fishery from 1975 to 2018. Note that the figures by permit or vessel in this table span the entire year, regardless of who held the permit or however many times the permit was transferred. Table 3-11 reports the number of permit holders and estimated gross earnings by each resident type. Table 3-12 provides permit counts and gross earnings by Cook Inlet district.

**Table 3-10. Estimated Total Gross Earnings (Real and Nominal) for the Cook Inlet Salmon Set Gillnet Fishery, With Average Gross (Real) Earnings by Permit and Vessel, 1975-2018**

• Adjusted for inflation to 2018 dollars using U.S. Bureau of Labor Statistics Consumer Price Index. Some permits are used to record landings in more than one district.

Appendix A: Locations of DNR Shore Fishery Leases

Current as of June 2019

*Appendix B: Dual and Stacked Permit Regulations*

**Dual Permits:**

<b>Fishery</b>	<b>First Season in Effect</b>	<b>Basic Regulation</b>	<b>Identification</b>	<b>Special Considerations</b>	<b>Regulations</b>
Bristol Bay Salmon Drift Gillnet <b>S03T</b>	2004	Two permit holders may fish from a single vessel; the vessel's total allowable gear increases from 150 to 200 fathoms	Vessels display a 'D' adjacent to the license plate when fishing 2 permits. Otherwise, the 'D' is to be covered.	Dual-permit operations are not allowed in certain restricted fishing areas	<a href="#">5 AAC 06.333</a> <a href="#">5 AAC 06.370</a>
Cook Inlet Salmon Drift Gillnet <b>S03H</b>	2008	Two permit holders may fish from a single vessel; the vessel's total allowable gear increases from 150 to 200 fathoms	Vessels display a 'D' adjacent to the license plate when fishing 2 permits. Otherwise, the 'D' is to be covered. Do not have to preregister with F&G.	Dual-permit operations are not allowed in certain restricted fishing areas	<a href="#">5 AAC 21.333</a>
Southeast Herring Gillnet <b>G34A</b>	2006	Two permit holders may fish from a single vessel; the vessel's allowable gear increases from a single 50-fathom net to a 75-fathom net.	Vessels display the letter 'D' adjacent to the license plate when fishing 2 permits. Otherwise, the 'D' is to be covered.		<a href="#">5 AAC 27.131(i)</a>

**Stacked Permits**

**2002:** AS 16.43.140 (c) was amended to allow individuals to hold two salmon limited entry permits in the same fishery.

**2006:** AS 16.05.251 (i) gives the BOF the authority to grant fishing privileges to the second permit held by an individual.

<b>Fishery and Fishery Code</b>	<b>First Season In Effect</b>	<b>Basic Regulation</b>	<b>Identification</b>	<b>Special Considerations</b>	<b>Regulations</b>
Kodiak Salmon Set Gillnet <b>S04K</b>	Two regulations:  (a) 2008  and  (b) 1985	(a) Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 2 nets and 150 fathoms to 4 nets and 300 fathoms.  (b) Two permit holders may fish in a joint venture; the operation's total allowable gear increases from 2 nets and 150 fathoms to 3 nets and to 300 fathoms	In 2008 persons who fished 2 permits were issued 2 permit cards: a standard card and a white-colored (non-functioning) card. In 2009, the non-functioning card was yellow-colored. In 2010, persons were issued 2 standard cards, and either could be used to record a landing.  Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits.	(a) Unless reauthorized, this regulation expires December 2010  (did expire in 2010)	<a href="#">5 AAC 18.331</a>

*Appendix B: Dual and Stacked Permit Regulations*

**Stacked Permits**

**2002:** AS 16.43.140 (c) was amended to allow individuals to hold two salmon limited entry permits in the same fishery.  
**2006:** AS 16.05.251 (i) gives the BOF the authority to grant fishing privileges to the second permit held by an individual.

<b>Fishery and Fishery Code</b>	<b>First Season In Effect</b>	<b>Basic Regulation</b>	<b>Identification</b>	<b>Special Considerations</b>	<b>Regulations</b>
Bristol Bay Salmon Set Gillnet <b>S04T</b>	2010	Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 2 nets and 50 fathoms to 4 nets and 100 fathoms.	Persons who fish 2 permits are issued 2 permit cards. Each are standard cards, and either can be used to record a landing. Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits.	(u) "...the provisions of this subsection do not apply after December 31, 2012."  (did expire in 2012)	<a href="#">5 AAC 06.331(u)</a>
Cook Inlet Salmon Drift Gillnet <b>S03H</b>	2017	Permit holders may own and fish 2 permits simultaneously. Their allowable gear increases from 150 (with 1 permit) to 200 fathoms of drift gillnet gear.	Vessels display a 'D' adjacent to the license plate when fishing 2 permits. Otherwise, the 'D' is to be covered		5 AAC 21.333(a)
Cook Inlet Salmon Set Gillnet <b>S04H</b>	2011	Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 4 nets and 105 fathoms to 210 fathoms in aggregate, with no single net longer than 35 fathoms, of which no more than 105 fathoms may be more than 29 meshes in depth in the Upper Subdistrict. (Depth modification made by Board-Generated Proposal A at the 2014 Upper Cook Inlet Finfish meeting).	Persons who fish 2 permits are issued 2 permit cards. Each are standard cards, and either can be used to record a landing. Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits. The identification buoy attached to gillnet gear of no more than 29 meshes in depth must be marked with a "D 29" following the CFEC permit holder's permit number.		<a href="#">5 AAC 21.331</a>
Yakutat Salmon Set Gillnet <b>S04D</b>	2012	Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 4 nets and 105 fathoms to 210 fathoms in aggregate, with no single net longer than 35 fathoms.	Persons who fish 2 permits are issued 2 permit cards. Each are standard cards, and either can be used to record a landing. Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits. Valid only for Situk, Yakutat Bay, and Kaliakh, and only if Situk Chinook escapement exceeds 750 fish.	(e) Unless reauthorized, this regulation expires December, 2014	<a href="#">5 AAC 30.345</a>
