OEO/ADA Compliance Statement

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648

Abstract

This publication examines annual gross earnings (in 2021 dollars) for permit holders in all limited commercial fisheries in Alaska for the years 1975-2020. Summary statistics provided include mean gross earnings, and the lower (first) quartile, median, and upper (third) quartile for the gross earnings. A list of limited fisheries in Alaska with regulation information, relevant dates, and ratios of adjudicated permits is also included.

Prepared by Daniel Strong.

Acknowledgements

Special thanks to Caitlin Stern and Brad Robbins for their insights and contributions to this document.

Introduction

In 1972, Alaskan voters amended the state constitution to allow limited entry in the state's commercial fisheries. Following the amendment, in 1973 the Alaska State Legislature enacted the Limited Entry Act (AS 16.43), giving the Commercial Fisheries Entry Commission (CFEC) the authority to administer the program. Permit fisheries are defined by CFEC as a specific gear type for a fishery resource within a defined administrative area.

This report provides a list of Alaska's limited fisheries and counts of fished permits with gross earnings for all limited permit fisheries from the CFEC gross earnings file.

The CFEC gross earnings file is based on ADF&G fish tickets and is augmented with CFEC permit holder and other data. The ex-vessel value for salmon in the CFEC gross earnings file largely come from the Commercial Operators Annual Report and ADF&G fish tickets, with some additional information provided by processors. All ex-vessel values are adjusted for inflation using the 2021 Bureau of Labor Statistics Consumer Price Index.

Gross earnings are reported in real (2021) dollars. Summary statistics include mean (average), 25th quartile, median (50th percentile), and 75th quartile gross earnings. To produce the quartile earnings, all earnings by permit were first ordered from smallest to largest gross earnings. The median is the middle value or the mean of the two middle values if there is an even number of permits fished that year. The 25th quartile is the middle value of the median and the lowest value, and the 75th quartile is the middle value between the median and the largest value.

Some figures are masked for confidentiality. 25th and 75th quartile earnings are hidden when fewer than 16 permits were used to make landings. When fewer than four permits were fished, both the median and mean earnings are marked as confidential.

Tables

Table 1. Participation in Alaska's Limited Commercial Fisheries in 2020. This table has information for each limited commercial fishery. Included in the table are: permit code, description of the permit type, the regulations that defined the limitations, the first year that the permit type was issued, the number of permits issued in 2020, and the number of permits that made landings in 2020. Only permits that were or could be issued as permanent permits are included in these figures.

Table 2. Mean and Quartile Estimated Gross Earnings (in 2021 Dollars) of Permit Holders in Alaska's Limited Commercial Fisheries, 1975-2020. This table summarizes annual earnings for each limited fishery. All ex-vessel values are adjusted for inflation using the 2021 Bureau of Labor Statistics Consumer Price Index. Included are the mean and quartile earnings to provide references to both the expected value and skewness of what a commercial fisherman could earn. When fewer than four permit holders are presented, earnings are masked due to confidentiality.

Discussion

This report focuses on landings by permits, not individuals. While permits can only be held by one person at a time, they can be transferred either permanently or temporarily to multiple individuals in any given year. For

information on changes of permit holdings through time, please refer to the latest annual Transfer Study publication.¹

In certain years for some fisheries, permits have been used either in stacked or dual permit operations. For these fisheries, the actual number of permits fished will not be accurately represented and the average earnings could also be affected. A stacked permit operation is where a single permit holder holds two permits with the benefit of an added measure of gear; dual permit operations occur when two permit holders work together and are permitted to increase the amount of gear for the operation. Permit stacking is permitted in several salmon set gillnet fisheries: Kodiak (S04K) from 2008 to 2010, Bristol Bay (S04T) from 2010 to 2012, Cook Inlet (S04H) since 2011, and in limited areas and circumstances in Yakutat (S04D) since 2012. Dual permit operations are permitted in most areas of two salmon drift gillnet fisheries: Bristol Bay (S03T) since 2004 and Cook Inlet (S03H) since 2008. The Southeast herring gillnet (G34A) fishery has had dual permit regulations in effect since 2006.

As estimated earnings have been adjusted for inflation, differences in annual average values across multiple years can be considered. Because of the open access competitive nature of State of Alaska managed fisheries, variation exists in average earnings by permit for each of the fisheries. Average earnings by year also show variation due to environmental and market influences, such as the Exxon Valdez oil spill and farmed salmon.

In March of 1989, the Exxon Valdez struck Bligh Reef in Prince William Sound and spilled more than 10 million gallons of crude oil. Several fisheries were affected by the spill from Prince William Sound to Kodiak as can be observed by both a decrease in participation as well as a reduction in average earnings in the years immediately following the oil spill.

By the mid-1990s, production of farmed salmon began to exceed wild salmon harvest. The increased production of farmed salmonids had an impact on the market for wild Alaska salmon and it reached a low point in the 2000s. Market conditions have generally stabilized since then due to improved methods to preserve fish quality and seafood marketing efforts, among other factors.
