OEO/ADA Compliance Statement

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

Abstract

This report provides detailed information on changes in the distribution of permanent entry permits in Alaska's limited fisheries. From 1975 through 2023, 79 permit types have been issued in 66 fisheries. The report provides both statewide and fishery-specific data on the number of permit transfers, the geographic distribution of permit holders, changes due to permit transfers, changes due to the relocation of permit holders, and the 2023 year-end geographic distribution of permit holders.

The report also includes extensive information on the age of permit holders, age differences between permit transferors and permit transfer recipients, the incidence of intra-family and business partner permit transfers, permit transfer acquisition methods, and the financing of permit purchases. The information contained in the report is derived from the Commercial Fisheries Entry Commission's permit and transfer survey files.

The report is published as two separate documents: an executive summary and the principal report, which is primarily a reference document.

Introduction

In 1972, voters amended Alaska's constitution to allow limited entry into the state's commercial fisheries. Following this amendment, in 1973, the Alaska State Legislature enacted Alaska's **Limited Entry Act** (AS 16.43), creating the state's limited entry program and giving the Commercial Fisheries Entry Commission (CFEC) the responsibility of administering the program.

Limited entry was implemented in 19 of the state's salmon fisheries in 1974. Here, a fishery is defined as a unique combination of three attributes: species, gear type, and area. In some limited fisheries, more than one type of permit is issued to help check developing fishing industries. Some permits regulate the amount of gear that can be used, while others moderate vessel lengths. Permit types with different vessel lengths or gear amounts do not constitute different fisheries by our definition. By the end of 2023, limited entry permits had been issued in a total of 66 commercial fisheries: 26 salmon fisheries, 20 herring fisheries, 9 crab fisheries, 5 sablefish fisheries, 3 shrimp fisheries, and 3 dive fisheries. To date, a total of 79 permit types have been issued in the 66 limited fisheries.¹

A legal prerequisite of the Limited Entry Act stated permits could not be locked in the hands whom they were originally issued (i.e., the "initial issuees"). After much study and debate, the legislature chose free transferability as the means to allow permit holders to enter and exit the fisheries.

Free transferability allows the transfer of permits from parents to their children and allows family members to inherit a permit upon the death of a permit holder. It facilitates the sale of permits on the open market and allows fishermen to enter and exit fisheries at will. It eliminates the need for an expensive and time-consuming bureaucratic process to handle permit reallocation. Many other transfer options were considered but were found lacking with respect to these criteria.

In 1983, the Alaska State Supreme Court decided *State of Alaska v. Ostrosky*, which challenged the constitutionality of the Limited Entry Act, particularly the free transferability provisions. The court upheld the constitutionality of both the Act and of free transferability, and affirmed the legislative objectives in adopting the transferability option. The decision was subsequently allowed to stand by the United States Supreme Court when it dismissed the Ostrosky appeal in *Ostrosky v. State*.

Despite the benefits of free transferability, many people remain concerned that permit transfers might result in undesirable consequences with regard to the distribution of permits. There is a concern that permits will leave the state, or that permits will disappear from isolated fishing communities which are local to a limited fishery, thereby eroding their economic base. Partly to address these concerns about free transferability, CFEC has produced this updated report to accurately inform the legislature, the administration, and other interested parties of the facts.

This edition of *Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits* has been published as two separate documents. The executive summary provides tables that address the most common questions about limited entry permits. It includes information on permit holdings, and how holdings are affected by permit transfers and by the migration (relocation) of permit holders. There is also summary information from the results of permit transfer surveys. The main report is primarily a reference document and includes more detailed fishery-specific and time-series tables on the topics addressed in the executive summary. The main report also contains sections on rural permit holders, and on permit holders who live locally to the fisheries where they hold permits.

Transfer Incidence

CFEC issues both transferable and non-transferable permits in the state's limited fisheries. The transferability status of a permit is determined when the permit is issued.

The Limited Entry Act requires CFEC to initially allocate permits using hardship ranking systems, often called 'point systems', which rank individuals based upon the relative hardship they would suffer if they were denied a permit. The Act also requires CFEC to determine levels within the point systems where persons would experience only minor economic hardship if excluded from the fishery; permit holders who qualified for a permit but did not have enough points for a transferable permit received non-transferable permits.

Types of permanent permits CFEC issues:

Transferable: Permanent limited entry permits that can be freely transferred.

Non-transferable: Permanent limited entry permits that remain with the initial issuee only. These permits cannot be transferred.

From 1975 through 2023, 16,619 permanent limited entry permits were issued in 79 permit types:

14,230 permits were fully transferable², and

2,389 permits were non-transferable

Some permits for a fishery may be initially issued several years after the main body of permits has been issued. This is because some applicants are difficult to classify under a hardship ranking system, and a final determination of their standing may come only after an extensive hearing and adjudication process. In other cases, permits have been issued at a later date as the result of lawsuits brought against CFEC.

Permit Transfers

Since the adoption of limited entry (1975 – 2023):

There have been 48,300 permanent permit transfers.

Initial issues transferred 12,694 permits, indicating that 89.2% (12,694 / 14,230) of all transferable permits have changed hands at least once.

Transfers per number of transferable permits have averaged 8.0% (48,300 total transfers / 604,101 sum of all annual transferable permit counts).

Transfers Rates

Two types of annual transfer rates are shown in Table 1:

Rate of Transfers from Initial Issuees to Transferable Permits. This rate is calculated by dividing the sum of permits transferred for the first time by the total number of transferable permits. Permits transferred for the first time are those that are transferred by the initial issuees.

Rate of Transfers to Transferable Permits. This rate is calculated by dividing the sum of all transfers by the sum of all available permanent transferable permits.³

Over time, the rate of transfers from initial issues to transferable permits would decline if no new permits were issued. This would happen because each year there would be fewer permits held by initial issuees. As expected, the rate declined, from 8.4% in 1975 to 0.4% in 2023. Over the entire period of limited entry (1975–2023) the average annual rate of transfers from initial issuees is 2.4%.

The rate of transfers to transferable permits provides a measure of the annual turnover rate for transferable permits. This turnover rate has varied from a low of 4.8% in 2023 to a high of 13.3% in 1978. Over the entire period of limited entry (1975 – 2023) the turnover rate averaged 8.1%.

Figure 1 displays the number of permanent transferable permits and the annual number of transfers.

Figure 1. Transferable Permits and Number of Transfers per Year, 1975–2023

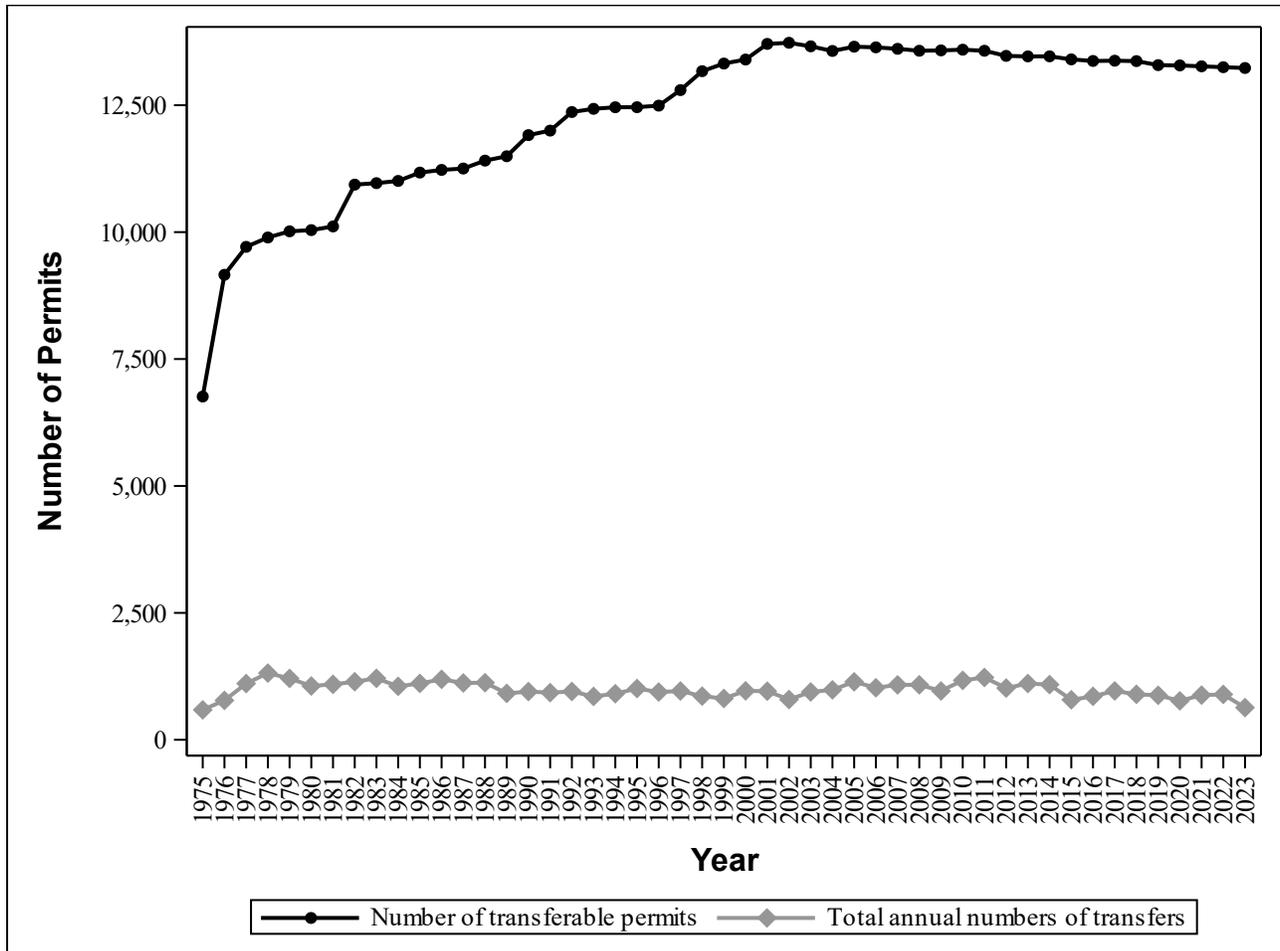

Table 1. Summary of Transfer Data on Permanent Permits by Year

| Year | Permit Types | Number of Permanent Permits | Number of Transferable Permits | Annual Number of Transfers From Initial Issuees | Ratio of Transfers From Initial Issuees to Transferable Permits | Total Annual Number of Transfers | Ratio of Transfers to Transferable Permits |
|------|--------------|-----------------------------|--------------------------------|---|---|----------------------------------|--|
| 1975 | 19 | 6,762 | 6,762 | 568 | 8.4% | 590 | 8.7% |

| 2005 | 79 | 14,535 | 13,653 | 178 | 1.3% | 1,142 | 8.4% |
| 2006 | 79 | 14,532 | 13,640 | 163 | 1.2% | 1,025 | 7.5% |
| 2007 | 79 | 14,471 | 13,611 | 165 | 1.2% | 1,082 | 7.9% |
| 2008 | 79 | 14,388 | 13,573 | 173 | 1.3% | 1,083 | 8.0% |
| 2009 | 79 | 14,411 | 13,580 | 98 | 0.7% | 962 | 7.1% |
| 2010 | 79 | 14,412 | 13,594 | 164 | 1.2% | 1,171 | 8.6% |
| 2011 | 79 | 14,372 | 13,573 | 128 | 0.9% | 1,228 | 9.0% |
| 2012 | 79 | 14,243 | 13,472 | 102 | 0.8% | 1,019 | 7.6% |
| 2013 | 79 | 14,204 | 13,462 | 104 | 0.8% | 1,108 | 8.2% |
| 2014 | 79 | 14,179 | 13,463 | 110 | 0.8% | 1,087 | 8.1% |
| 2015 | 79 | 14,084 | 13,403 | 49 | 0.4% | 788 | 5.9% |
| 2016 | 79 | 14,012 | 13,372 | 73 | 0.5% | 856 | 6.4% |
| 2017 | 79 | 13,996 | 13,377 | 73 | 0.5% | 963 | 7.2% |
| 2018 | 79 | 13,979 | 13,369 | 65 | 0.5% | 896 | 6.7% |
| 2019 | 79 | 13,850 | 13,290 | 59 | 0.4% | 877 | 6.6% |
| 2020 | 79 | 13,827 | 13,284 | 48 | 0.4% | 767 | 5.8% |
| 2021 | 79 | 13,796 | 13,266 | 57 | 0.4% | 880 | 6.6% |
| 2022 | 79 | 13,746 | 13,249 | 48 | 0.4% | 894 | 6.7% |
| 2023 | 79 | 13,700 | 13,233 | 51 | 0.4% | 634 | 4.8% |
| Mean | 59 | 13,098 | 12,329 | 259 | 2.4% | 986 | 8.1% |

- 3,268 permits have been cancelled. Except for the 800 reinstated cancelled permits, cancelled permits are excluded from the year of cancellation forward.
- 724 transferable permits have been cancelled.
- The net change in the number of permits through conversion from nontransferable to transferable status through the CFEC adjudication process is -145
- The number of transfers includes 357 loan foreclosures by the Department of Commerce, Community, and Economic Development or by the Commercial Fishing and Agriculture Bank, along with 352 subsequent transfers from these entities.

Geographic Distribution of Permits: Changes Due to Transfers, Migrations, and Cancellations

Classification of Permits and Permit Holders

This report classifies permits based upon where the permit holders reside. Five resident type classifications are defined. Permit holders who reside in Alaska are classified into ‘rural’ or ‘urban’ and ‘local’ or ‘nonlocal’ groups. Nonresidents are classified into a single category. The resident types and their acronyms are listed below:

ARL: Alaska resident of a Rural community which is Local to the fishery for which the permit applies;

ARN: Alaska resident of a Rural community which is Nonlocal to the fishery for which the permit applies;

AUL: Alaska resident of an Urban community which is Local to the fishery for which the permit applies;⁴

AUN: Alaska resident of an Urban community which is Nonlocal to the fishery for which the permit applies;

ADM: Alaska Data Missing refers to Alaska residents with out-of-state addresses who thus could not be classified as local or nonlocal to the fishery for which the permit applies;

NR: Nonresident of Alaska;

DCCED / CFAB: Signifies permits that have been foreclosed upon by the Alaska Department of Commerce, Community, and Economic Development (DCCED), or by the Commercial Fishing and Agriculture Bank (CFAB), that have yet to be transferred.

An example of this classification could be a permit holder who lives in Dillingham and who holds two limited entry permits. If one permit is for the Bristol Bay salmon drift gillnet fishery, it will be classified as a permit held by an Alaska Rural Local (ARL) because Dillingham is a rural community and is local to Bristol Bay. If the other permit is for the Cook Inlet herring purse seine fishery, then that permit will be classified as one held by an Alaska Rural Nonlocal (ARN) because Dillingham is rural, but not local to Cook Inlet.

Urban and rural designations are based upon information from Census 2010. Because editions of this report prior to 2012 used Census 2000 criteria, some changes have occurred in the rural/urban designations. In general, there are now more Alaska places designated as rural, and consequently more permits issued to persons classified as rural residents. For more detailed information concerning classification rules, please see Appendix A in the main document.

Changes in the Distribution of Permits

Table 2 provides summary information on the initial issuance and changes in permit holdings for the assigned resident types. Figure 2 graphically compares the percentages of initial permit holdings and year-end 2023 permit holdings by resident type.

Since the adoption of limited entry (1975 – 2023):

16,619 permanent permits (transferable and non-transferable) were issued in Alaska’s limited fisheries.

Alaska residents received 82.1% of the total permanent permits (13,647 Alaskan-held permits/16,619 total permits issued).

Alaska Rural Locals were issued 50.8% permits of the total permanent permits (8,444 Alaska Rural Local-held permits/16,619 total permits issued).

Alaska Urban Locals were issued 21.1% permits of the total permanent permits (3,506 Alaska Urban Local-held permits/16,619 total permits issued).

Nonresidents were issued 22.5% permits of the total permanent permits (2,972 nonresident-held permits/16,619 total permits issued).

The number of permits held by each resident type can change for three reasons:

Transfer: permits can be transferred (either by gift, sale, or trade) to other resident types.

Migration: a permit holder can move from one location to another.

Cancellation: permanent permits can be cancelled, usually when a person who holds a non-transferable permit fails to renew the permit for two consecutive years or passes away. Other reasons for cancellation are discussed in more detail in the next section.

At the end of 2023, the net effects of cancellation, transfers, and migrations are combined, resulted in Alaska residents holding 10,623 permits (77.5% of the total), while nonresidents held 3,077 permits (22.5%).

Permit Cancellation

By the end of 2023, the total number of permits decreased to 13,700 due to the cancellation of 1,977 Alaskan permits and 491 nonresident permits. Note that at year-end 2023, 5 permits had been foreclosed upon by DCCED or CFAB and had yet to be transferred back to individuals.

Cancellation normally occurs on non-transferable permits when a permit holder dies or does not renew the permit. Most of the net cancelled permits have been in the salmon hand troll fishery (40.5%, 1,325 cancelled salmon hand troll permits/ 3,268 total cancelled permits), of which a large number of non-transferable entry permits were issued. In this report, the number of cancelled permits also includes permits that were administratively removed or reconsidered through CFEC's adjudication process.

Permit Buybacks

Some cancelled permits are voluntarily relinquished under the special circumstances of a buyback program. Generally, buyback programs are established to reduce effort in the fishery, to increase economic efficiency, and/or to conserve the fishery resource. There have been three federally funded buyback programs of CFEC permits.

A buyback first occurred in 2003 when the National Park Service administered a program to buy and permanently retire 10 Southeast Alaska Dungeness crab permits. Nine permits were transferable (3 D9AA, 4 D9BA, and 2 D9CA), and one (D10A) was non-transferable. This buyback removed permits for persons who had substantial fishing history in the marine waters of Glacier Bay National Park. It was part of a larger effort to phase out commercial fishing in the park. Each of the permit holders contractually agreed to allow their permits to lapse by not renewing them.

The second buyback program occurred in 2008, when 35 permanent transferable Southeast Alaska salmon purse seine permits (S01A) were bought and retired under the Southeast Revitalization Association (SRA) fleet consolidation program. The buyback was administered by the SRA and the Alaska Sustainable Salmon Fund (under ADF&G) using federal grant funds from the Pacific Coastal Salmon Recovery Fund. The goals of the buyback were to reduce effort, promote economic efficiency, and increase flexibility in conservation and management of the fishery.

The third buyback program occurred in 2012 with another round of buybacks in the Southeast salmon purse seine fishery. This time, the buyback permanently retired 64 more permits. The buyback was again administered by the SRA and was financed with a federal loan to be repaid by the remaining permit holders in the fishery.

The fourth buyback program occurred in 2018-2019, also in the Southeast salmon purse seine fishery and administered by the SRA. CFEC retired 36 S01A permits, and the National Marine Fisheries Service (NMFS) reimbursed permit holders with the remaining loan monies.

Permit Migration

Decreases in the number of permits held by Alaska residents are countered by increases in the number of nonresident permits. Migrations, which refer to the relocation of permit holders, have changed the resident/nonresident balance to a greater degree than permit transfers. At the end of 2023, the net result of permit transfer activity had reduced the number of permits held by nonresidents by 282 permits, whereas permit holders moving into and out of Alaska resulted in a net increase of 930 nonresident permits (See Table 2 and Table 5).

Note that changes in permit distributions are reported in **net** terms. A **net increase** in permits means that after accounting for all permit activity, the resident type gained permits. A **net decrease** in permits means that after accounting for all permit activity, the resident type has fewer permits.

Figure 2. Percentages of Initial Permits and 2023 Year-End Permit Holdings by Resident Type

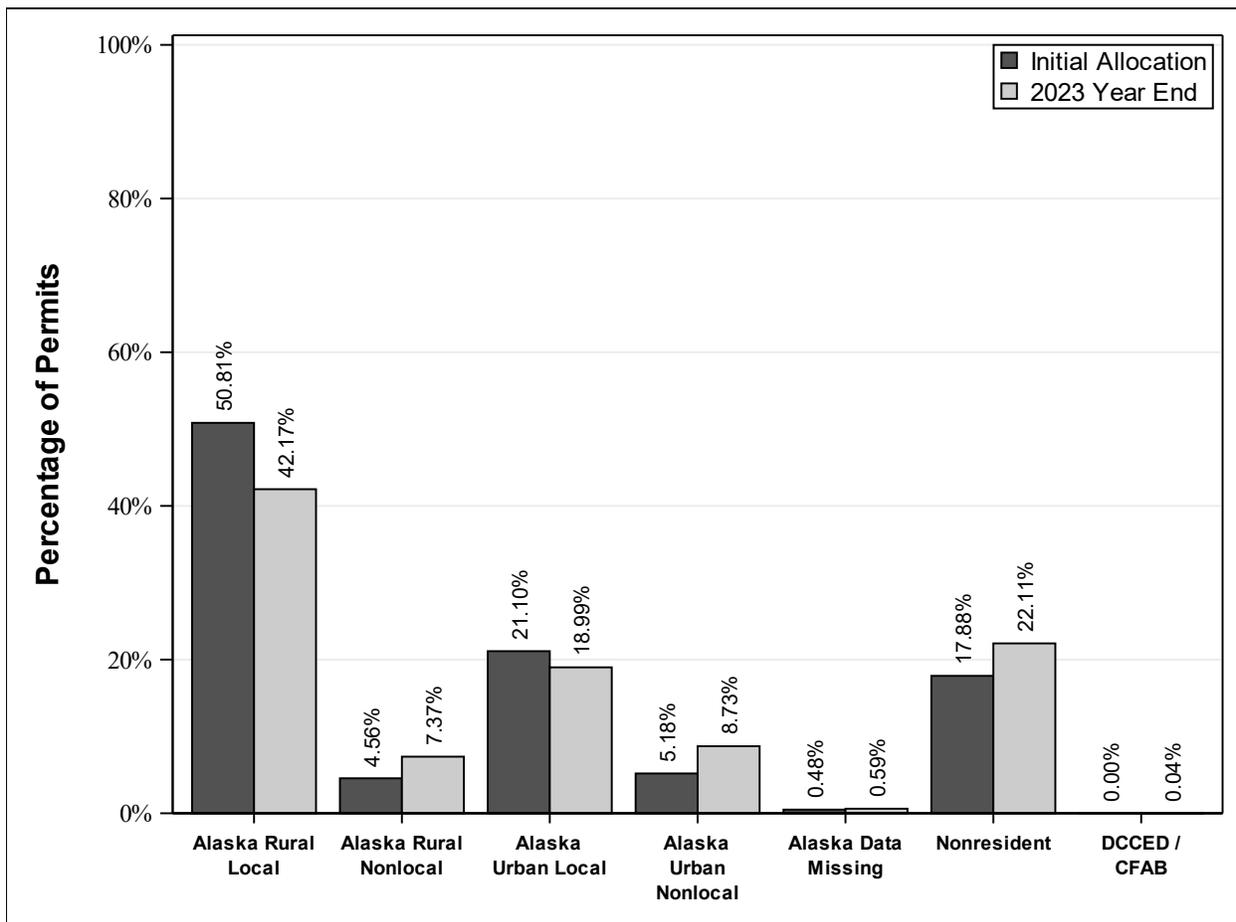

Table 2. Initial Issuance, Total Net Changes, and Year-end 2023 Permanent Limited Entry Permit Holdings by Resident Type

| Residency | Initially Issued | | Transfer | | Migration | | Cancellation | | Total | | 2023 Year-end Permit Holdings | |
|-----------------------|------------------|---------------|----------|-------------|-----------|-------------|---------------|---------------|---------------|---------------|-------------------------------|---------------|

Changes in Permit Distribution by Fishery

Tables 3 and 4 show permit distribution at initial issuance and at the end of 2023, for the 79 permit types where limited entry permits have been issued. Table 5 shows the net effects of transfer, migration, and cancellation for the same permit types. Table 6 also shows the net effects from transfers, migrations, and cancellations, but does so across all permit types, among the five resident types, annually.

Alaska Rural Local Highlights

The net reduction of 2,475 permits held by Alaska Rural Locals (ARL) represents 29.3% (2,475 total net change/8,444 total initially issued) of all transferable and non-transferable permits originally issued to them. This net reduction was accounted for by changes of -1,543 permits due to migration, -82 permits due to transfer activity, and -850 permits due to cancellations.

Fisheries with a high net loss of permits held by ARLs due to transfer activity include the Bristol Bay Salmon Drift Gillnet (S03T) fishery (-327 permits) and the Bristol Bay Salmon Set Gillnet (S04T) fishery (-144 permits). Fisheries with a high net gain of permits held by ARLs due to transfer activity include the Statewide Salmon Power Troll (S15B) fishery (143 permits) and the Cook Inlet Salmon Drift Gillnet (S03H) fishery (90 permits).

Alaska Rural Nonlocal Highlights

The net increase of 286 permits held by Alaska Rural Nonlocals (ARN) represents 37.8% (286 total net change/757 total initially issued) of all transferable and non-transferable permits originally issued to them. This net increase was accounted for by changes of -33 permits due to migration, 459 permits due to transfer activity, and -140 permits due to cancellations.

Fisheries with a high net loss of permits held by ARNs due to transfer activity include the Lower Yukon Salmon Gillnet (S04Y) fishery (-41 permits) and the Kuskokwim Salmon Gillnet (S04W) fishery (-14 permits). Fisheries with a high net gain of permits held by ARNs due to transfer activity include the Bristol Bay Salmon Drift Gillnet (S03T) fishery (146 permits) and the Prince William Sound Salmon Drift Gillnet (S03E) fishery (125 permits).

Alaska Urban Local Highlights

The net reduction of 818 permits held by Alaska Urban Locals (AUL) represents 23.3% (818 total net change/3,506 total initially issued) of all transferable and non-transferable permits originally issued to them. This net reduction was accounted for by changes of -277 permits due to migration, 226 permits due to transfer activity, and -767 permits due to cancellations.

Fisheries with a high net loss of permits held by AULs due to transfer activity include the Cook Inlet Salmon Set Gillnet (S04H) fishery (-34 permits) and the Statewide Salmon Hand Troll (S05B) fishery (-26 permits). Fisheries with a high net gain of permits held by AULs due to transfer activity include the Kodiak Salmon Purse Seine (S01K) fishery (90 permits) and the Statewide Salmon Power Troll (S15B) fishery (90 permits).

Alaska Urban Nonlocal Highlights

The net increase of 374 permits held by Alaska Urban Nonlocals (AUN) represents 43.4% (374 total net change/861 total initially issued) of all transferable and non-transferable permits originally issued to them. This net increase was accounted for by changes of 546 permits due to migration, -6 permits due to transfer activity, and -166 permits due to cancellations.

Fisheries with a high net loss of permits held by AUNs due to transfer activity include the Lower Yukon Salmon Gillnet (S04Y) fishery (-25 permits) and the Kuskokwim Salmon Gillnet (S04W) fishery (-20 permits). Fisheries with a high net gain of permits held by AUNs due to transfer activity include the Bristol Bay Salmon Drift Gillnet (S03T) fishery (55 permits) and the Bristol Bay Salmon Set Gillnet (S04T) fishery (44 permits).

Nonresident Highlights

The net increase of 157 permits held by Nonresidents (NR) represents 5.3% (157 total net change/2,972 total initially issued) of all transferable and non-transferable permits originally issued to them. This net increase was accounted for by changes of 930 permits due to migration, -282 permits due to transfer activity, and -491 permits due to cancellations.

Fisheries with a high net loss of permits held by NRs due to transfer activity include the Statewide Salmon Power Troll (S15B) fishery (-156 permits) and the Kodiak Salmon Purse Seine (S01K) fishery (-99 permits). Fisheries with a high net gain of permits held by NRs due to transfer activity include the Bristol Bay Salmon Set Gillnet (S04T) fishery (122 permits) and the Bristol Bay Salmon Drift Gillnet (S03T) fishery (113 permits).

Age Patterns Among Permit Holders

Figure 3 compares the annual mean (average) ages of all persons who transferred permits, (transferors) with the annual mean ages of all persons who received permits through transfers, (recipients) and all persons who hold transferable permits. The statewide mean age of all transferable permit holders increased from 1975 to the present, rising from 42.7 years in 1975 (median age = 43.0) to 53.0 years in 2023 (median age = 55.0).⁵

Transfer recipients tend to be younger than transferors, but the average age of each has risen over time. In 1975, the mean age of transfer recipients was 33.1 (median = 31.0) years and that of transferors was 52.0 (median = 54.0) years, while in 2023 the mean ages of transfer recipients and transferors were 42.5 (median = 38.0) and 53.4 (median = 56.0) years, respectively.

Figure 4 displays the age distribution of year-end 2023 permit holders in all limited entry fisheries. Permit holders are only counted once in calculating age groupings. This means that, if an individual holds two permits, they are only counted once so as not to skew age category calculations.

Chapter 4 in the main document provides a detailed look into the mean age of permit holders, transferors, and transfer recipients by fishery. While the mean age of all permit holders at year-end 2023 was 53.0 years, the mean age in individual permit fisheries at year-end 2023 varies from a high of 71.5 years in the Norton Sound Herring Roe Beach Seine (G02Z) fishery, to a low of 41.2 years in the Kodiak Herring Food or Bait Purse Seine Fixed VL Length To 60 ft (H1DK) fishery.

The median age in individual permit fisheries at year-end 2023 varies from a high of 70.5 years in the Norton Sound Herring Roe Beach Seine (G02Z) fishery, to a low of 40.0 years in the Prince William Sound Salmon Set Gillnet (S04E) fishery.

Figure 3. Mean Ages of Permit Holders with Transferable Limited Entry Permits: Transferors, Transfer Recipients, and All Permit Holders

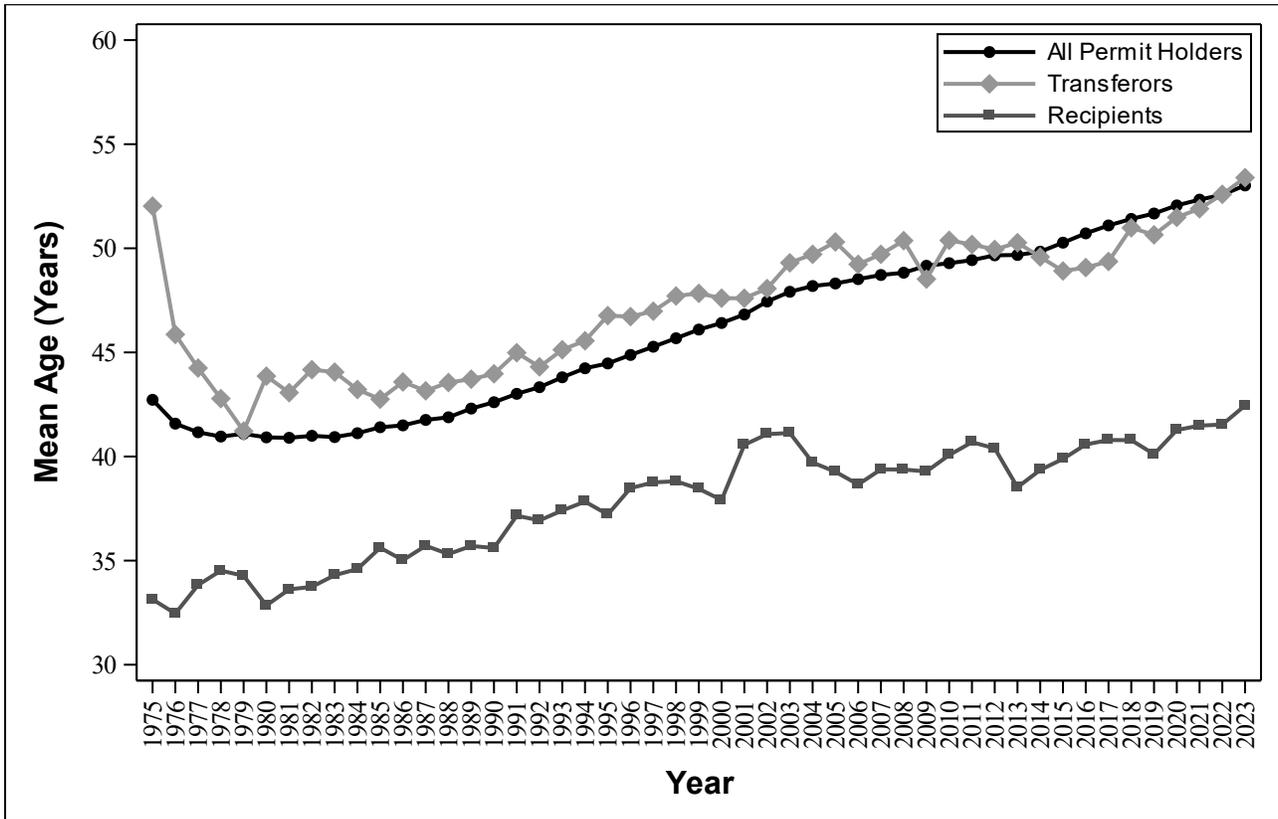

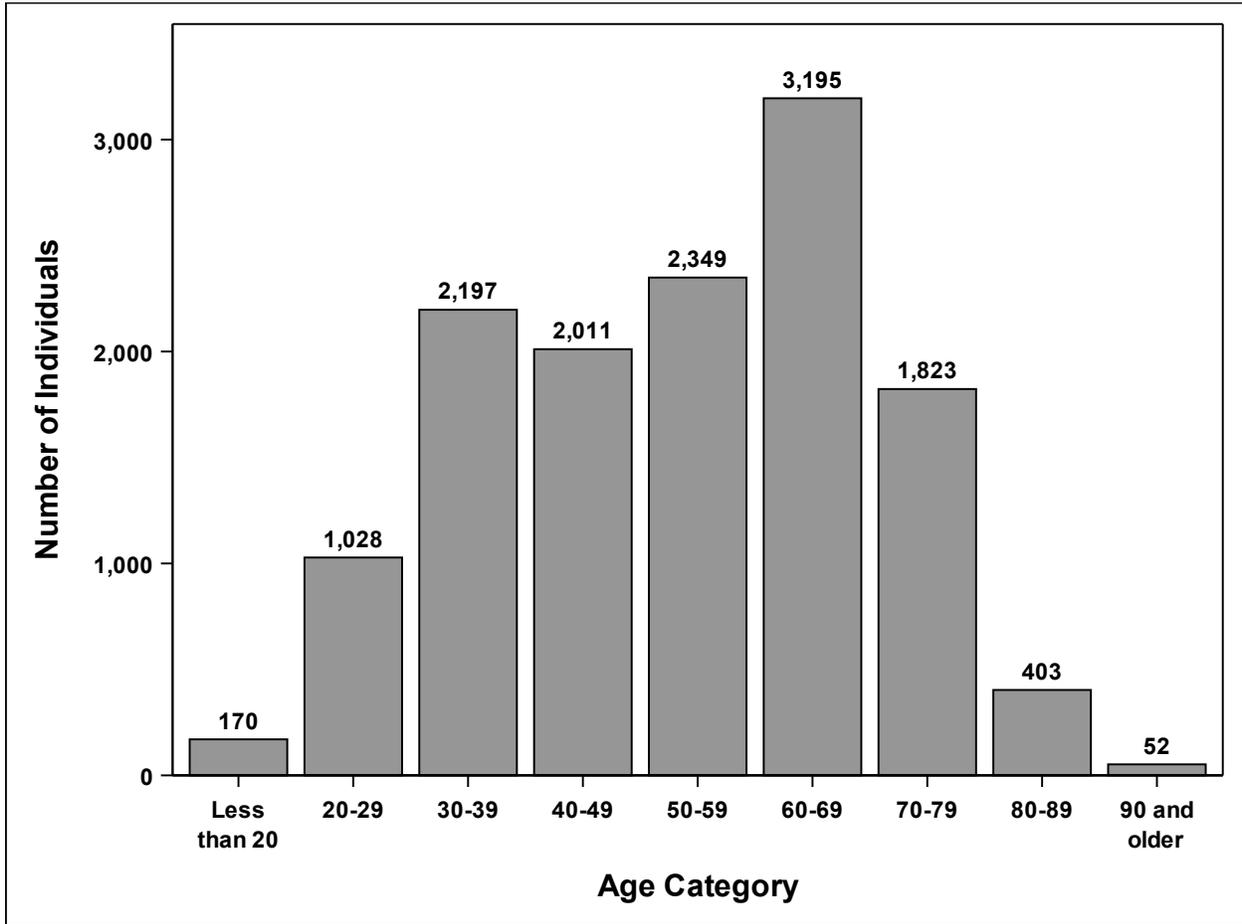

Figure 4. Age Distribution of 2023 Year-end Permit Holders

Transfer Survey Results

When limited entry permits are transferred, CFEC conducts a survey of the two parties involved in the transfer. The survey collects information on whether the transfer was a gift, sale, or trade, and information on the relationships between the parties.⁶ If the permit is sold, the survey asks for the sale price and the type of financing used. This survey is the source of information for CFEC's estimates of permit values, which are used to make fishing loans by the DCCED and by CFAB. Survey results from 1980-2023 are presented in both this summary and in the main report.

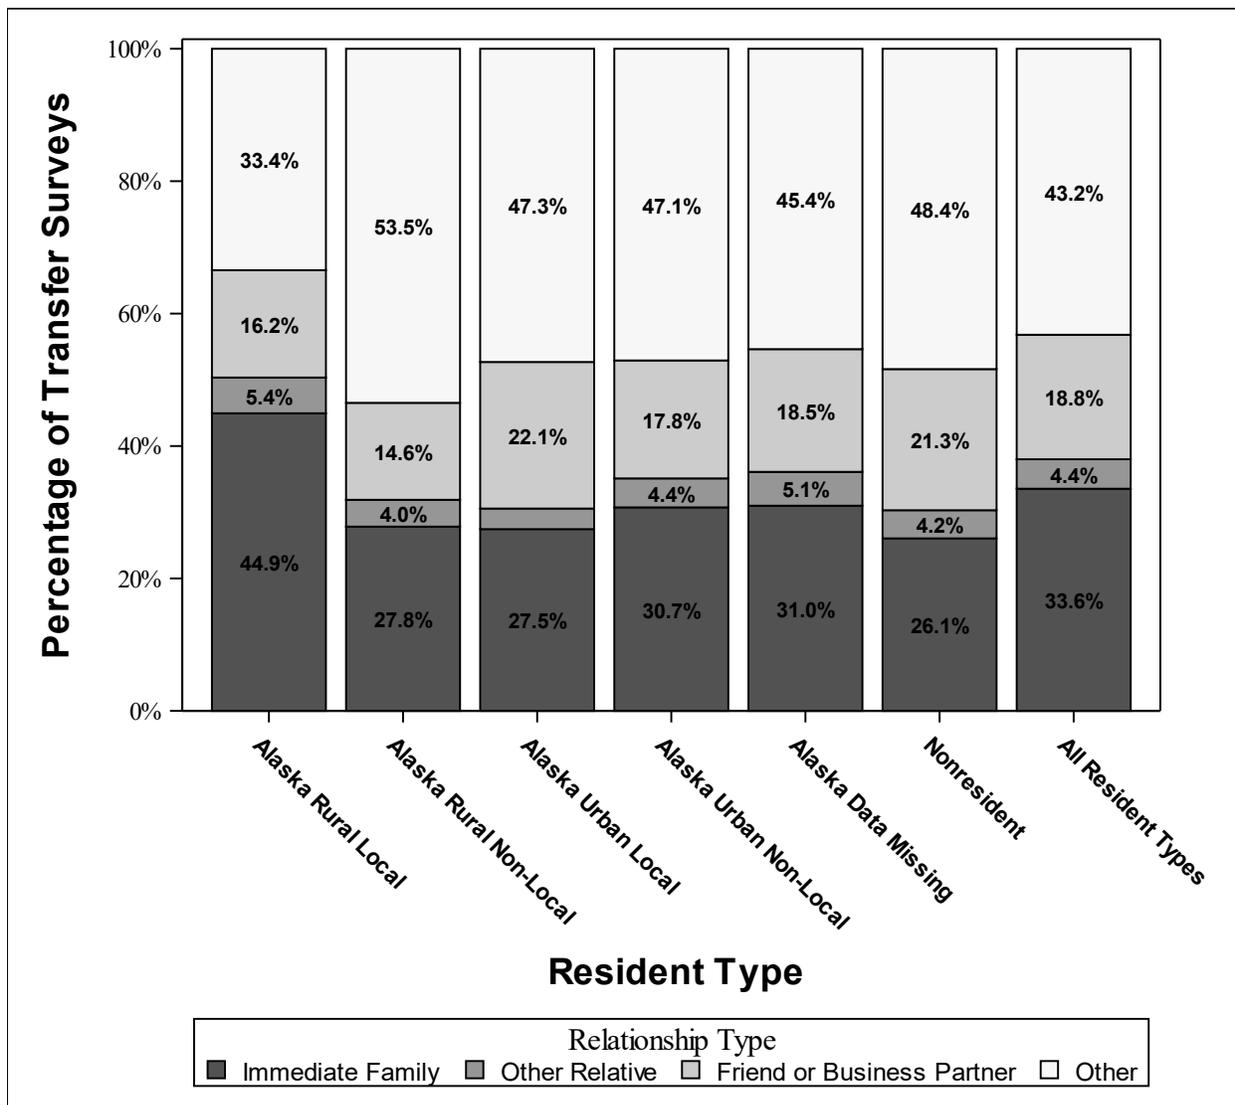

Since 1980, it has been mandatory for the transfer recipient to complete the survey; however, this was not strictly enforced until 1981. There were 140 transfers in 1980 and 15 transfers in 1981 without completed surveys. In other years, there have been a small number of transfers with missing surveys, the majority of which are transfers to the two lending agencies on foreclosed permits. These missing surveys account for the slight differences between Table 1 and the tables in this section.

Relationships of Transfer Participants

Most permits are transferred between people who know one another. Figure 5 (All Resident Types bar) shows that of the 42,768 transfer surveys received between 1980 and 2023, 18.8% indicated a transfer between friends or business partners, 33.6% between immediate family members, and 4.4% between other relatives. Permit exchanges between people who have either a different type of relationship or no pre-existing relationship accounted for the remaining 43.2% of the transfers.

The percentage of transfers accounted for by each relationship type has remained relatively constant over the period from 1980-2023, with the exception of an apparent decrease in the percentage of transfers between friends and business partners in 1983. The rewording of the “Friend” category on the survey form to “Personal Friend” may be responsible for some of that decrease and may also account for the relatively sharp increase in the number of transfers between persons in the “Other” category.

Figure 5. Relationships Between Permit Transferors and Transfer Recipients, by Residency and Overall, 1980-2023

Relationships of Transfer Participants, by Residency

When transfer surveys are broken out by the resident type of the transfer recipient, considerable variation in relationship patterns is evident among resident types (Figure 5). For Alaska Rural Locals, 50.4% of transfers were from relatives (either immediate family or other relatives). In contrast, transfers from relatives made up only 31.9%, 30.6%, 35.1%, 36.1%, and 30.3% of transfers received by Alaska Rural Nonlocal, Alaska Urban Local, Alaska Urban Nonlocal, Alaska Data Missing, and Nonresident permit holders, respectively.

Permit Acquisition Method: Gift, Sale, Trade, and Other

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. During the 1980-2023 period, 58.3% of all transfers were sales, 32.8% were gifts, and 1.3% were trades (Table 7). The remaining transfers in the 'Other' category comprised 7.6% of the survey responses.

Chapter 5 in the main document provides a detailed look at permit acquisition. Sale transactions have consistently accounted for over half of all transfers, with a low of 46.8% in 2023, and a high of 65.6% in 1986. The 'other' category has accounted for between 1.2% in 1982 and 16.3% in 1989. Trade transactions have been the smallest acquisition method and have accounted for between 0.0% in 2020 and 2.8% in 1980.

Since 1980, gift transactions have accounted for between 24.8% in 1989 and 44.9% in 2023. Because gifts accounted for only 21.5% of all transfer survey responses in the 1975-1979 period ⁷, the apparent increase in this transaction type since 1980 may be a result of efforts to enforce the Limited Entry Act's prohibitions against leasing permits. Therefore, some of the 'Gift' responses may represent lease arrangements or carry reciprocal expectations. Table 8 presents fisheries in which at least half the transfers were gifts

Table 7. Permit Acquisition Methods, All Fisheries 1980–2023

| Acquisition Method | Number of Transfers | Percentage |
|--------------------|---------------------|---------------|
| Gift | 14,043 | 32.8% |
| Sale | 24,955 | 58.3% |
| Trade | 540 | 1.3% |
| Other | 3,230 | 7.6% |
| Total | 42,768 | 100.0% |

- Transfer survey information is not included for 357 permit foreclosures. However, 352 subsequent transfers of these permits are included in the Other category.
- Transfer of permits as an inheritance is included in the 'Gift' category.

Table 8. Permit Types with Greater Than 50% Gift Transfer Transactions

| Permit Type | Percentage Gift Transfer Transactions |
|---|---------------------------------------|
| Nelson Island Herring Roe & Food/Bait Gillnet (G34N) | 72.4% |
| Nunivak Island Herring Roe & Food/Bait Gillnet (G34U) | 72.2% |
| Kodiak Salmon Set Gillnet (S04K) | 69.1% |
| Goodnews Bay Herring Roe & Food/Bait Gillnet (G34W) | 69.0% |
| Kuskokwim Salmon Gillnet (S04W) | 61.2% |
| Bristol Bay Herring Spawn On Kelp Hand Pick (L12T) | 56.3% |
| Cape Romanzof Herring Roe & Food/Bait Gillnet (G34Y) | 53.7% |
| Kotzebue Salmon Gillnet (S04X) | 53.4% |
| Lower Yukon Salmon Gillnet (S04Y) | 52.4% |

Permit Acquisition Methods by Residency

Table 9 shows a breakdown of acquisition methods by the resident type of the transfer recipient. Since 1980, 39.5% of the transferred permits obtained by Alaska Rural Locals have come as gifts. Sales have accounted for 58.8% to 64.9% of the transfers for the other resident types since 1980.

Table 9. Permit Acquisition Methods by Residency, 1980–2023

| Residency | Gift | Sale | Trade | Other |
|------------------------|--------------|--------------|-------------|-------------|
| Alaska Rural Local | 39.5% | 48.9% | 1.4% | 10.2% |
| Alaska Rural Non-Local | 28.0% | 64.8% | 1.1% | 6.2% |
| Alaska Urban Local | 27.0% | 64.9% | 1.7% | 6.4% |
| Alaska Urban Non-Local | 30.6% | 60.6% | 1.1% | 7.7% |
| Alaska Data Missing | 31.3% | 58.8% | 1.3% | 8.6% |
| Nonresident | 30.5% | 63.3% | 1.0% | 5.2% |
| Total | 32.8% | 58.3% | 1.3% | 7.6% |

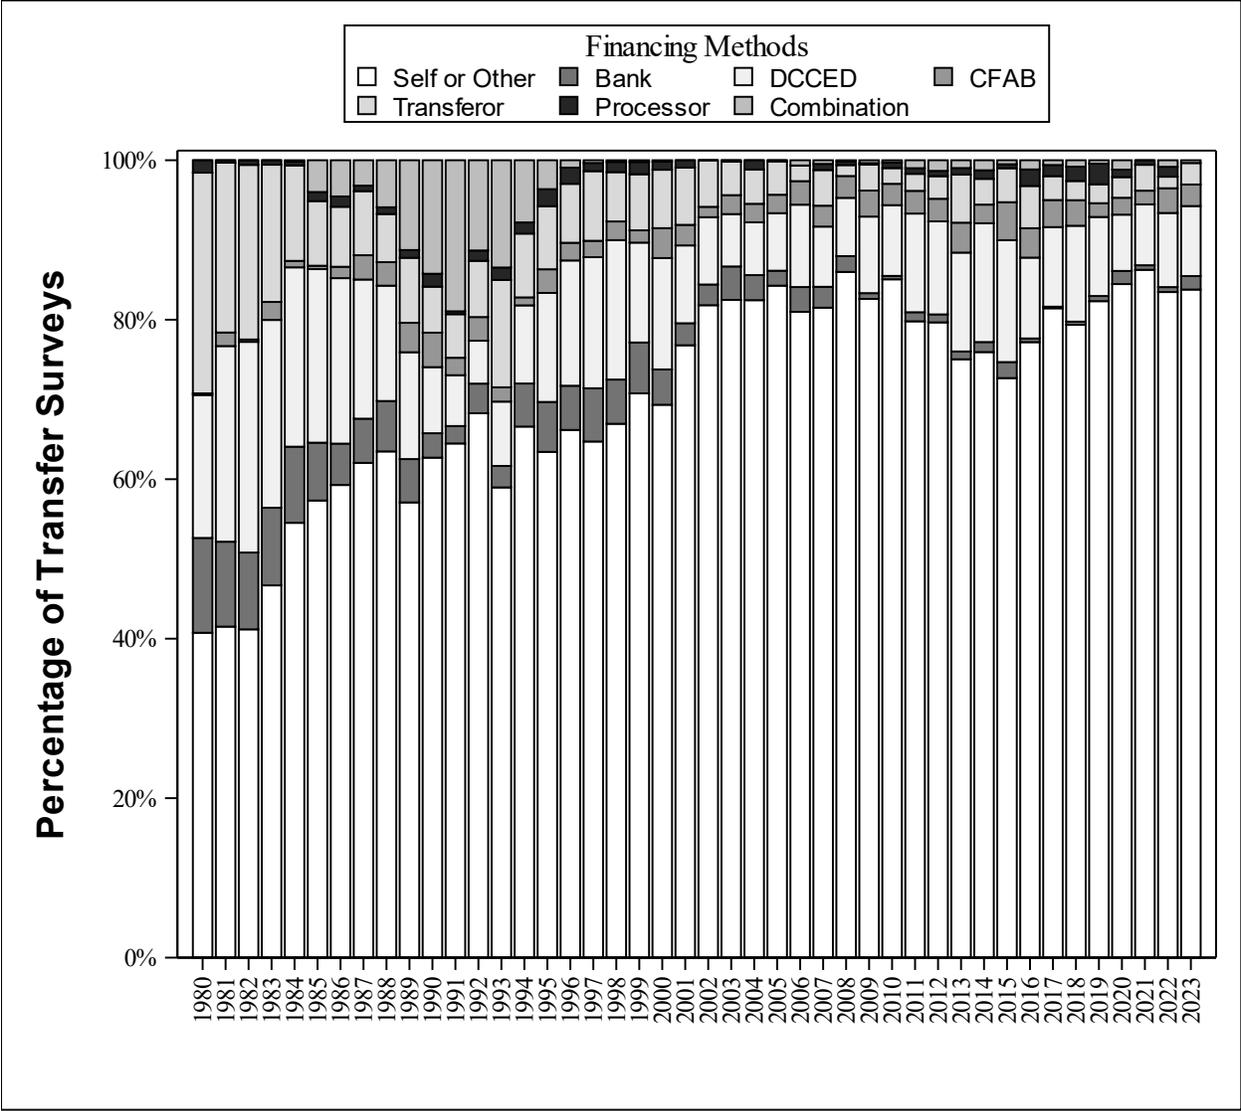

Financing of Permit Purchases

Results from the transfer survey indicate that the most common financing method for permit purchases over 1980-2023 was self-financing, which was used for 70.1% of all purchases surveyed (Figure 6 and Table 10). The next most common source of financing was the Department of Commerce, Community, and Economic Development’s (DCCED) loan program, which assisted in 13.0% of purchases. Other financing sources used include transferors (7.1% of purchases), banks and other private lending institutions (4.0%), a combination of financing methods (2.5%), the Commercial Fishing and Agriculture Bank (CFAB) (2.4%), and fish processors (0.9%).

Chapter 5 in the main document provides time-series data about sources of permit financing. In 2023, 83.8% of the purchasers reported self/other financing, up from 40.7% in 1980, with a mean value of 70.1% between 1980 and 2023. The percentage of purchases financed by DCCED loans was 8.8%, down from 17.9% in 1980, with a mean of 13.0%. The percentage of transferor-financed loans was down from 27.7% in 1980 to 2.7% in 2023, with a mean value of 7.1%. In 2023, the use of bank-financed loans was reported in 1.7% of purchases, down from 11.9% in 1980, with a mean value of 4.0%. Processor, CFAB, and combination financed loans were relatively minor permit purchase financing methods, with overall means of 0.9%, 2.4%, and 2.5% respectively.

Fishery-specific tables in the main report indicate that many individual fisheries substantially deviate from the statewide percentages. Among the 20 fisheries with greater than 90% self/other financing in 2023, the two largest fisheries are Statewide Salmon Hand Troll (S05B), with 100.0% self-financed purchases, and Cook Inlet Salmon Drift Gillnet (S03H), with 95.8% self-financed purchases.

Figure 6. Permits Financing Methods, 1980–2023

Permit Financing by Resident Type

Table 10 provides information from survey responses on the sources of permit financing by resident type over the entire 1980 to 2023 time period. Alaska residents have been the recipients of 17,189 surveyed permit purchases since 1980 with the majority using either personal resources (64.5% of purchases) or authorized loans from the State of Alaska (22.1% of purchases) to finance these purchases. Alaska Rural Local residents have received 40.7% (1,563 / 3,842) of the state loans.

Table 10. Sources of Permit Financing by Resident Type of Transfer Recipient, 1980–2023

| Resident Type | Self or Other | | Bank | | DCCED | | CFAB | | Transferor | | Processor | | Combination | | Total |
|---------------------------|---------------|--------------|--------------|-------------|--------------|--------------|------------|-------------|--------------|-------------|------------|-------------|-------------|-------------|---------------|
| | Count | % | Count | % | Count | % | Count | % | Count | % | Count | % | Count | % | |

- This table only includes the transfers where the survey respondents indicated the permit changed hands through a sales transaction

Permit Prices

In Table 11, average permit prices are given by permit type and year for permit sales during the period 1982 through 2023. Permit prices are derived from the monthly CFEC Permit Value Report (PVR). The figures represent the annual average price of arms-length sales transactions. The Number column is the count of permit sales that occurred that year for the permit type. The Begin and End columns include the date of the first and last permit sales used to compute the average permit price. If fewer than four transactions occur in a year, values from previous years are included to calculate the average of at least four permit sales. All of the prices are in the current year's dollars, meaning that they have been inflation-adjusted using the annual Consumer Price Index. To maintain restrictions on confidential data, permit values cannot be shown in some cases. The method of calculating the annual average price of arms-length transactions was standardized in 1987. Prior to 1987, different methods were used. As a result, permit values prior to 1987 do not display a 'Begin' and 'End' date.

The longest and most complete information on permit prices is for the salmon permit types. Prices in these permit types tended to increase until around 1990, then fell between 1993 to 2004.

Permit prices can vary for the same gear type used in different areas of the state. There can be dramatic fluctuations in values for some permits during specific periods. In 2023, the fisheries with the largest percent gains in permit price since the previous year were Southeast Red/Blue/Brown King Crab Pot Gear (K29A) (23.1%) and Prince William Sound Salmon Purse Seine (S01E) (16.6%). The fisheries with the largest percent losses in permit price in 2023 were Bristol Bay Salmon Drift Gillnet (S03T) (-27.9%) and Cook Inlet Herring Roe & Food/Bait Purse Seine (G01H) (-20.5%).

- Permit values prior to 1987 are not calculated. For estimates, visit the CFEC pre-1987 permit value portal, https://www.cfec.state.ak.us/pmtvalue/pre1987_main.htm
- All instances with less than four valid transactions are masked due to reasons of confidentiality.
- The net change in the number of permits through conversion from nontransferable to transferable status through the CFEC adjudication process is -145
- Permit price estimates are derived from the Permit Value Report in June of the designated year.
- Begin and End indicate first and last month sale values used to derive permit prices.
- Additional permit price data can be found at the CFEC permit value portal, http://www.cfec.state.ak.us/fishery_statistics/permits.htm

Endnotes

¹ By the end of 2023, maximum number regulations had been adopted for 67 fisheries. No permanent entry permits have been issued in the Prince William Sound sablefish pot gear fishery; therefore, the fishery does not appear in this report as permits have only been issued in 66 of the 67 fisheries. In addition, fisheries that were under a vessel limited entry program are not reported herein; the weathervane scallop dredge fishery expired December 30, 2013, and the Bering Sea hair crab fishery expired on December 30, 2018. There was one permanent non-transferable permit issued for the Cook Inlet Dungeness crab ring net (D10H) permit type in 1997 (Table 3) which was cancelled in 2003. Consequently, this permit type is not listed in Table 4.

² Although 14,230 transferable permits were initially issued (Table 3), the number of transferable permits remaining at the end of 2023 was 13,700 (Tables 1 and 4). The net reduction of 530 transferable permits is due to the cancellation of 397 transferable permits and the net addition of 133 permits that were converted from non-transferable to transferable status through the CFEC adjudication process.

³ Because a permit may be transferred more than once during a year, the rate of permits transferred to available transferable permits would be slightly less.

⁴ The Alaska Urban Local category is not applicable for several fisheries which have no local urban communities. These fisheries are Yakutat salmon setnet; Chignik salmon seine; Bristol Bay salmon drift and setnet; Bristol Bay herring spawn on kelp; Lower Yukon salmon and herring gillnet; Prince William Sound salmon seine, drift and setnet; Prince William Sound herring seine, gillnet and spawn on kelp pound; Prince William Sound sablefish; and the Nelson Island, Nunivak Island, and Goodnews Bay herring gillnet fisheries.

⁵ The calculation of the average age of permit holders is impacted by persons who hold multiple permits. Because each permit reflects the age of the permit holder, a person's age may be used more than once in the calculations.

⁶ For the purposes of this document, the transfer of a permit that occurs as part of an inheritance is categorized as a 'gift'.
