## VII. PERMIT TRANSFERS FROM ALASKA LOCALS TO OTHER RESIDENT TYPES

Local Alaskan permits, which are the combined permits from Alaska Rural Local and Alaska Urban Local resident types, are the focus of this section. Alaska local permits are defined as those held by persons who reside in the area near a limited fishery. Since 1975, $78.9 \%$ (11,318 transfers) of all transfers from Local Alaskans (14,339 transfers) were made to other Local Alaskans. The remaining $21.1 \%$ ( 3,021 transfers) were made to other resident types. Tables are provided on the cross-cohort transfers between Alaska Local permit holders and other resident types. They are similar to tables in the previous section on Alaska Rural Locals.

In every year over the 1977-1996 time period, the number of permits held by Alaska Locals declined as a result of transfer activities with the Nonresident and Nonlocal resident types (Table 28). However, in 1997, 1998, and 1999 the number of permits held by Alaska Locals increased by 51, 18, and 36 permits, respectively, as the net result of transfer activities. Over the 1975-1999 time period Alaskan Locals transferred 3,021 permits to other resident types. Alaskan Locals received 2,428 permits from other resident types which resulted in a net decrease of 593 locally held permits. Total net decreases were greatest in the years 1978 through 1986.

The corresponding net increases within the other resident types were 328 permits to Alaska Urban Nonlocals (55.3\%), 212 permits to Nonresidents (35.8\%) and 25 permits to Alaska Rural Nonlocals (4.2\%). Transfers to the DCED or CFAB through loan foreclosures and subsequent resales by these agencies have resulted in a net decrease of 28 (4.7\%) permits from Alaska Locals.

The cumulative numbers of transfers to and from local permit holders are presented for each fishery in Table 29 and by fishery and year in Appendix E. ${ }^{1}$ By the end of 1999, the number of permits held by Alaska locals decreased in 30 fisheries.

Numerically, the greatest decreases in permit numbers have been in the Bristol Bay fisheries (391 permits), the Prince William Sound salmon fisheries (110 permits), the Peninsula/Aleutian fisheries (88 permits), and the hand troll fishery ( 55 permits). The Bristol Bay fisheries alone accounted for

[^0]$65.9 \%$ of the 593 net decrease in the number of permits held by Alaska locals due to transfer. The net local shift in these fisheries was highest in the late 1970s and early 1980s but this shift has been reduced in the 1989-1999 period (Appendix E).

The power troll fishery ( 93 permits) showed the largest numerical gain in permits to Alaska locals.

The relationship between transfer parties by fishery and year is presented in Table 30. Statewide, survey responses indicate that $63.8 \%$ of the transfers from local residents to other resident types during the 1980-1999 period were between people who had no pre-existing relationship (1,507 out of $2,363) .{ }^{2}$ Since 1984 this percentage has ranged from $59.8 \%$ to $83.8 \%$.

Transfer acquisition methods are presented in Table 31. From 1980 to 1999, 77.1\% of the transfers from Alaska Locals to other resident types were sales ( 1,822 of 2,363 transfers). Statewide, the majority of all cross-cohort transfers (regardless of resident type) were also sales. Cross-cohort transfers appear more likely to be transfers between people without a pre-existing relationship and therefore are more likely to be sale rather than gift transactions.

Sources of permit financing are shown in Table 32 for 1,822 purchases where non-local buyers acquired locally-held permits. For all fisheries combined, $68.6 \%$ of the permit sales throughout 1980-1999 were financed through the personal resources of the transferee. This figure is higher than the amount of self-financing used by only Alaska residents (52.9\%) and higher than the overall buyer percentage (58.4\%) reported in Table 22. ${ }^{3}$ However, both tables indicate that since 1980 the use of personal assets to buy permits has increased. Table 32 also shows that DCED loans were used to purchase $11.1 \%$ of the permits transferred by Alaska Locals.

TABLE 32. Permit Financing Methods Used in Transfers from Alaska Local Permit Holders to Other Resident Types by Fishery and Year From 1980-1999 Survey Data.*

[^2]Alaska Local permit holders include both Alaska Rural Local and Alaska Urban local resident types.

[^0]:    ${ }^{1}$ N ote that if there have not been any transfers for a particular permit type, that permit/fishery will not be listed on the tables.

[^1]:    ${ }^{2}$ The relationship question in the Transfer Survey form was rew orded in October of 1983 from "friend" to "personal friend." This rewording may be responsible for a portion of the increase in the percentage of "other" responses.
    ${ }^{3}$ Note that Table 22 includes both cross-cohort and intra-cohort permit purchases for each resident type.

[^2]:    * This table includes only those surveys where respondents indicated that they had purchased their permit.
