## VI. PERMIT TRANSFERS FROM ALASKA RURAL LOCALS TO OTHER RESIDENT TYPES

The long-term effects of limited entry on rural fishing communities have been of considerable interest to the legislature, the administration, and the public, especially the degree to which limited entry permits have been transferred away from rural communities. Since 1975, over two thirds ( $67.1 \%$ ) of the 8,280 transfers made by Alaska Rural Locals have been to other Alaska Rural Locals. This percentage has been relatively consistent, ranging from a low of $60.8 \%$ in 1982 to a high of $74.7 \%$ in 1999 (Table 5). The remaining $32.9 \%(2,723)$ of the transfers since 1975 have been to other resident types (cross-cohort transfers). This section will present information regarding only the cross-cohort transfers from Alaska Rural Local residents (ARLs).

## Transfer Activity Away From Alaska Rural Locals

In every year except 1975, 1990, 1997, 1999, and 2000, ARLs have transferred more permits to other resident types than other resident types have transferred to them, resulting in a net decrease in ARL-held permits (Table 23). Through 2000, this cross-cohort transfer activity has resulted in a net decrease of 667 transferable permits held by ARLs. Each of the other resident types gained permits through their transfer activity with ARLs. The net gains were as follows: Alaska Urban Nonlocals gained 299 permits, Nonresidents gained 258 permits, Alaska Urban Locals gained 63 permits, Alaska Rural Nonlocals had a net gain of 24 permits. Note that each of the resident types may have either gained or lost additional permits in exchanges with resident types besides ARLs (Table 5).

From 1976 through 1989, net shifts of permits away from ARLs due to transfer activity ranged from 12 to 93 permits per year. The annual net decreases have generally been less since then, and in 2000 transfer activity resulted in a net gain of 44 permits for ARLs, the largest gain over the 1975-2000 period.

Net transfer activity of ARL permits is presented in Table 24 for each fishery for all years combined. Similar data are presented in Appendix D by fishery and year. ${ }^{1}$ The Bristol Bay drift and set gillnet fisheries

[^0]have had the largest net decreases in ARL-held permits due to transfer activity ( 220 and 168 permits, respectively), representing $58.2 \%$ of the statewide ARL net transfer decrease.

While the Bristol Bay fisheries have had the highest numerical decreases in the number of permits held by ARLs, other fisheries have had larger proportional decreases. There are seven fisheries (other than Bristol Bay fisheries) with more than five permits issued to ARLs that indicate net decreases greater than $25 \%$.

Table 25 provides information concerning the relationships between transfer parties for 2,108 ARL crosscohort transfers that occurred over the 1980-2000 time period. The information comes from the CFEC transfer survey. As might be expected, most (61.4\%) cross-cohort transfers of ARL-held permits were between persons who had no previous relationship. ${ }^{2}$

## Permit Financing Methods

The methods used to acquire permits through transfers from ARLs to other resident types for the 19802000 period are presented in Table 26. Most $(78.0 \%)$ of these cross-cohort transfers were sales $(1,645$ of 2,108). Other acquisition methods in the CFEC transfer survey include gift, trade, and other.

Transfer survey information on financing methods used in permit sales from ARLs to other resident types is provided in Table 27 by fishery and year. The major source of financing has been the personal resources of the buyer ( $62.4 \%$ ). DCED loans are also an important source of financing for buyers of permits held by ARLs (17.5\%). These figures differ from the totals in Table 22 for all resident types and suggest that crosscohort ARL permit sales tend to involve slightly more bank and self-financing, and use fewer state loans than do permit sales as a whole.

The survey information also indicates that since 1984 there has been a sharp decrease in the number of sales of ARL-held permits financed by the transferor. There have not been any ARL-held permits financed by the transferor in the last five years.

[^4]
[^0]:    ${ }^{1}$ If there have not been any transfers of a particular permit type, that permit/fishery will not be listed on the tables.

[^1]:    ${ }^{2}$ The relationship question in the Transfer Survey form was reworded in October 1983 from "friend" to "personal friend." This rewording may be responsible for part of the increase in the percentage of "other" responses after 1983.

[^2]:    * Transfer survey information for foreclosed permits is not included.

[^3]:    * Transfer survey information for foreclosed permits is not included.

[^4]:    * This table only includes those surveys where respondents indicated that they had purchased their permit.
