VII. PERMIT TRANSFERS FROM ALASKA LOCALS TO OTHER RESIDENT TYPES

Local Alaskan permits, which are the combined permits from Alaska Rural Local (ARL) and Alaska Urban Local (AUL) resident types, are the focus of this section. Alaska Local permits are defined as those permits held by persons who reside in the area near a limited fishery. Since 1975, 79.0% (11,702 transfers) of all transfers from Local Alaskans were made to other Local Alaskans. The remaining 21.0% (3,103 transfers) were made to other resident types. Tables are provided on the cross-cohort transfers between Alaska Local permit holders and other resident types. They are similar to tables in the previous section on Alaska Rural Locals.

Transfer Activity Away From Alaska Locals

In every year from 1977 to 1996, the number of permits held by Alaska Locals declined as a result of transfer activities with the Nonresident and Nonlocal resident types (Table 28). Over the 1975-2000 time period Alaskan Locals transferred 3,103 permits to other resident types. Alaskan Locals received 2,578 permits from other resident types which resulted in a net decrease of 525 locally held permits. Total net decreases were greatest in the years 1979 through 1986.

The corresponding net increases within the other resident types were 318 permits to Alaska Urban Nonlocals (60.6%), 161 permits to Nonresidents (30.7%) and 19 permits to Alaska Rural Nonlocals (3.6%). Transfers to the DCED or CFAB through loan foreclosures and subsequent resale by these agencies are responsible for net decrease of 27 (5.1%) Alaska Local permits.

The cumulative numbers of transfers to and from Alaska Local permit holders are presented for each fishery in Table 29 and by fishery and year in Appendix E.¹ By the end of 2000, the number of permits held by Alaska Locals decreased in 28 fisheries and increased in 27.

The greatest decreases in the number of permits held by Alaska Locals have been in the Bristol Bay salmon fisheries (388 permits), the Prince William Sound salmon fisheries (109 permits), the Peninsula/Aleutian

¹ Note that if there have not been any transfers for a particular permit type, that permit/fishery will not be listed on the tables.

fisheries (89 permits), and the hand troll fishery (56 permits). The Bristol Bay salmon fisheries alone accounted for 73.9% of the 525 net decrease in the number of permits held by Alaska Locals due to transfer. The net local shift in these fisheries was highest in the late 1970s and early 1980s but this shift has been reduced in the 1989-2000 period (Appendix E).

The power troll fishery showed the largest gain (102 permits) in number of permits to Alaska Locals.

The relationship between transfer parties by fishery and year is presented in Table 30. Statewide, 63.5% of the survey responses indicate transfers from Alaska Local residents to other resident types during the 1980-2000 period were between people who had no pre-existing relationship (1,547 out of 2,435).²

Permit Financing Methods

Transfer acquisition methods are presented in Table 31. From 1980 to 2000, 76.9% of the transfers from Alaska Locals to other resident types were sales (1,873 of 2,435 transfers). Statewide, the majority of all cross-cohort transfers (regardless of resident type) were also sales. Cross-cohort transfers appear more likely to be transfers between people without a pre-existing relationship and therefore are more likely to be sale rather than gift transactions.

Sources of permit financing are shown in Table 32 for 1,873 purchases where nonlocal buyers acquired permits from Alaska Locals. For all fisheries combined, 68.9% of the permit sales from 1980 to 2000 were financed through the personal resources of the transfer recipient. This figure is higher than the amount of self-financing by transfer recipients over all resident types (58.9%), reported in Table 22.³ However, both tables indicate that since 1980 the use of personal assets to buy permits has increased.

² The relationship question in the Transfer Survey form was reworded in October of 1983 from "friend" to "personal friend." This rewording may be responsible for a portion of the increase in the percentage of "other" responses.

³ Note that Table 22 includes both cross-cohort and intra-cohort permit purchases for each resident type.
