

V. TRANSFER SURVEY RESULTS

V. TRANSFER SURVEY RESULTS

CFEC has conducted a survey of transfer participants since 1975. The survey collects information on the relationship between transfer parties, whether the transfer was a gift,¹ sale, or trade, and the type of financing used and sale price for permits that are sold. The survey has been the source of information for CFEC permit price estimates, which are used by the Department of Commerce, Community and Economic Development and the Alaska Commercial Fishing and Agriculture Bank for fishing loan purposes.

During the 1975-1979 period, the survey was sent to all transferors and transfer recipients, but its completion was entirely voluntary and anonymous. Because many surveys were not returned, and because those that were returned could not be tied to other CFEC data, their usefulness was somewhat limited. Information from the 1975-1979 transfer surveys is not included in this report, but may be found in the first edition published in 1983.²

In 1980 the survey was modified. It was tied to other CFEC data sources, and made mandatory for the transfer recipient to complete. In late 1983 the survey was expanded to include information from the transferor. Transfer survey results from the 1980-2003 time period are presented in the following tables.

Even though the survey was made mandatory in 1980, strict enforcement of this rule did not occur until 1981. There were 139 transfers in 1980 and 15 transfers in 1981 without completed surveys. Note that in every year some transfers occurred for which a transfer survey was not completed. This accounts for the slight differences in the “Totals” columns between Table 1 and the tables in this chapter. The majority of transfers without surveys occur on foreclosed permits. Overall, the surveys represent 98.1% of all transfers since 1980 (23,415 of 23,857 transfers).

The Census Bureau substantially changed the definition of rural and urban for the 2000 census (see Appendix A). This transfer study reflects the census changes in the rural and urban definitions.

¹ Permits transferred as part of an inheritance are classified as gifts.

² CFEC “Changes in the Distribution of Permit Ownership in Alaska’s Limited Fisheries, 1975-1981,” February 1983.

Relationships of Transfer Participants

Of the 23,415 transfer surveys received during 1980-2003, 38.9% (9,117 surveys) indicated a transfer between immediate family members or other relatives, and 19.5% (4,575 surveys) indicated a transfer between friends or business partners. Permit exchanges between people who appeared to have no preexisting relationship accounted for the remaining 41.5% (9,722) transfer surveys (Table 16).³ Many individual permit types differ from the all years' statewide percentages.

From 1981 to 1988 for all permit types combined, the percentage of transfers between friend/partners decreased while from 1989-2003 the percentage of transfers between friend/partners has remained relatively constant. The rewording of the "Friend" category on the survey form to "Personal Friend" in October of 1983 may be responsible for part of this decrease and may also account for the relatively sharp increase in the number of transfers between persons in the "Other" category in 1984.

When transfers are organized by the resident type of the transfer recipient, considerable variation in relationship patterns is evident among resident types (Table 17). Over half of the transfers to Alaska Rural Locals, for all years combined, were from immediate family members and relatives (55.3% or 4,101 transfers), which is almost double that of some other resident types. In the remaining resident types, the "Other" category predominated.

Permit Acquisition Method: Gift, Sale, Trade, and Other

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away or inherited, thus enabling new participants to enter a fishery. During the 1980 to 2003 time period, transfer survey responses indicated that 59.7% of transfers for all permit types were sales (13,976 transfers), 34.8% were gifts (8,154 transfers), and 1.6% were trades (382 transfers). The remaining 901 transfers in the "Other" category comprised 3.8% of the survey responses (Table 18).

The incidence of gift transactions has accounted for roughly 30 to 40% of all transfers since 1980. Because gifts accounted for only 21.5% of all transfer survey responses in the 1975 to 1979 time period,⁴ it has been suggested that the 1980 to 2003 percentage increase may be a result of efforts to enforce the prohibition on leasing permits.

³ If no transfers have occurred in a particular permit type, that permit type will not be shown on the table.

⁴ CFEC "Changes in the Distribution of Permit Ownership in Alaska's Limited Fisheries, 1975-1981", February 1983.

Therefore, some of the “Gift” responses may actually represent lease arrangements or carry reciprocal expectations.

Individual permit types often differ considerably from the statewide averages. While sale transactions predominated in most fisheries, gifts represented at least half of the 1980 to 2003 survey responses in 15 fisheries.

A breakdown of acquisition methods by the resident type of the transfer recipient is presented in Table 19. Since 1980, 49.5% of the Alaska Rural Locals who have obtained permits through transfer have received them as gifts. Sales have accounted for roughly 65% to 67% of the transfers to each of the other resident types over the time period.

Permit Prices

In Table 20, mean and median permit prices are given by permit type and year for permit sales during the period 1980 through 2003. Surveys that indicated permit sale prices of less than \$500 have been excluded from the computations.⁵ To preserve confidential data, price statistics are not computed for permit types with less than four sales transactions per year; also, no value is reported for a permit if there were no sales transactions for that permit in a year. All of the prices are in nominal dollars, which do not reflect adjustments for general price inflation.

Permit prices for the same gear type used in different areas of the state vary (Table 20). For example, the median price of salmon drift gillnet permits varied in 2003 from \$14,925 (Cook Inlet) to \$35,000 (Prince William Sound).

The longest and most complete information on permit prices are in the salmon permit types. Prices in these permit types tended to increase until around 1990, then fell from 1991 to 2003.

There has been a dramatic decrease in values for some permits. For example, the PWS salmon seine permit type fell from a median of \$250,000 in 1990 to \$20,000 in 2002. Peninsula/Aleutian salmon drift permits fell from a median of \$360,000 in 1990 to \$24,000 in 2003.

⁵ Permit price estimates produced for this report may differ from the CFEC estimated monthly permit value report due to the more stringent exclusion criteria used for the monthly report.

Financing of Permit Purchases

Transfer survey information on sources of financing used for 13,976 permit purchases is presented by permit type and year in Table 21. Beginning in 1990, additional data has been utilized from surveys in which more than one finance method was indicated.

Finance source data from 1980-2003 have been re-evaluated in the following manner:

1. Survey respondents may mark “Other” on the survey form if they feel their source of financing does not fit into the categories of personal resources, DCED loan, CFAB loan, other bank loans, or loans from the transferor or a processor. A review of the comments associated with the surveys marked “Other” revealed that a large number of these involved unique methods of self-financing or loans from relatives or friends. Because of the strong association of the “Other” financing with that of the personal resources financing, those responses were combined and classified under a “Self/Other” category thus eliminating the nondescriptive “Other” category for the purposes of this report.
2. For surveys where two finance sources were indicated, but one of those sources was “Self/Other,” the finance source reported in tables of this study is that of the alternative finance source (other than the “Self/Other” category). The self-financing associated with permits financed by multiple methods is primarily in the form of a down payment or interim financing. The “Self/Other” category is intended to be representative of permit purchases that are primarily financed by personal resources rather than simply purchases involving a down payment. (Many financing methods involve a down payment.)
3. Surveys involving three finance sources as well as the remainder of the two finance source surveys (i.e., those surveys that did not indicate “Self/Other”) are reported under the category of “Combination” financing in subsequent tables of this study.

Statewide, self-financing of permits has been the predominant method of finance, accounting for 61.4% of all purchases during the 1980-2003 time period (8,575 permits). The next most important source of financing has been the Department of Commerce, Community and Economic Development’s loan program with 17.2% (2,401 permits).⁶ Transferors financed 8.1% (1,128 permits), banks and other private lending institutions financed 6.9% (970 permits), the Commercial Fishing and Agriculture Bank financed 2.4% (342 permits), and processors financed 1.3% (177 permits) of the permit purchases. The remaining 383 (2.7%) survey responses which indicated multiple finance sources were placed in the combination category.

Both the percentage and the number of permit sales financed by the transferor have declined significantly since 1980 (Table 21). In 1980, 142 transfers were financed by the

⁶ The percentage of state-financed permits increases to 25.3% when only the purchases by Alaskan residents are considered (Table 22).

seller (27.7%); in 2003 only one transfer was seller-financed (0.2%). The percentage of self-financed purchases has tended to increase over the time period and the percentage of sales financed by DCED has declined since the high in 1982. Self-financed transfers are at an all-time high in 2003. Perhaps lower permit values enable more persons to finance the purchase of permits themselves.

Sources of permit financing by resident type and year derived from the transfer survey are provided in Table 22. The most commonly used methods of financing for the 9,618 permits purchased by Alaskan residents were the personal resources (Self/Other) of the transferee (55.8% or 5,364 transfers) and DCED authorized loans (24.8% or 2,384 sales). Urban Alaska residents have received 53.1% (1,266) of the 2,384 DCED loans issued to Alaskans. Nonresidents have the highest rates of self-financing (73.7%) and of financing through the transferor (11.5%) of the permit.

Foreclosures on Permit Loans

Table 23 shows the number of permit loans foreclosed upon by DCED or CFAB over the 1982 to 2003 time period. By law, these are the only two lending entities that can accept an entry permit as collateral on a loan. The number of foreclosures remained fairly constant in the 1980s, and then dropped lower following 1988. The fewest loan foreclosures occurred in 1990 (2 foreclosures). The number of permits transferred to DCED or CFAB began increasing in 1999 and spiked dramatically in 2002 with 45 foreclosures. While the number of foreclosures declined slightly in 2003 (37 foreclosures), this was still larger than the number of foreclosed permits seen prior to 2002.

Over the 1982 through 2003 period, the number of foreclosed permits was greatest for Alaska Rural Locals with 36.9% of the foreclosures (100 permits), followed by Alaska Urban Locals at 28.4% (77 permits). Alaska Urban Nonlocals and Alaska Rural Nonlocals had fewer foreclosures with 15.9% and 10.3%, respectively (43 and 28 permits). Nonresidents had the fewest foreclosures (8.5%, 23 permits). Nonresidents are not eligible for DCED or CFAB loans, so those represented here were residents when they received the loan and subsequently changed residency status due to migration prior to foreclosure.

* Because permit prices of less than \$500 are excluded, average permit values in this table will vary somewhat from those reported in CFEC Annual Reports, which use different exclusionary criteria.

Transfer survey information for Department of Commerce, Community and Economic Development foreclosures are also excluded, however transfers from the Department of Commerce, Community and Economic Development to other Alaskans are included.

** All instances where there are less than four transactions are masked due to confidentiality statutes.
