CHANGES IN LIMITED ENTRY PERMIT HOLDINGS IN SOUTHEAST ALASKA COMMUNITIES, 1975-2007

CFEC Report Number 08-11N

Alaska Commercial Fisheries Entry Commission 8800 Glacier Highway, Suite 109 Juneau, Alaska 99801 (907) 789-6160

ABSTRACT

This report was prepared for the 2008 Southeast Alaska Native Summit. The conference was organized by the Central Council Tlingit and Haida Indian Tribes of Alaska and held in November 2008 in Juneau, Alaska. Data in the report were presented at the conference by Commissioner Frank Homan of the Commercial Fisheries Entry Commission. The report focuses on limited entry permit holdings in Southeast Alaska communities and how those holdings have changed over time. Community specific data are provided.

OEO/ADA Compliance Statement

The Commercial Fishing Entry Commission is administratively attached to the Alaska Department of Fish and Game (ADF&G).

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972. If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

INTRODUCTION

This report provides data on changes in holdings of commercial fisheries entry permits by residents of communities in Southeast Alaska over the 1975 through 2007 time period. It was prepared for Commissioner Frank Homan's presentation at the 2008 Southeast Alaska Native Summit sponsored by the Central Council Tlingit and Haida Indian Tribes of Alaska. The conference was held in Juneau, Alaska in November 2008.

The report briefly reviews the history of Alaska's limited entry program and provides data focusing on Southeastern Alaska communities. Data are provided on the number of entry permits held by persons in each Southeast Alaska community by permit fishery and year. These data show how holdings of limited entry permits for different limited fisheries have changed in each of these Southeast communities over the 1975 through 2007 time period.

The report also provides data that focus on those limited entry fisheries that occur entirely or mostly in Southeast Alaska. The report details net changes in permit holdings in these fisheries by resident type over the 1975 through 2007 time period.

Commercial fisheries are a vital part of the economic base for most Southeastern Alaska communities. Limiting entry into a fishery can help to conserve a fishery resource and sustain economic yields in the fishery. The economic base for a community may grow or shrink as the number and types of entry permit held by persons in the community change. This report also summarizes how holdings of entry permits in rural and urban communities that are local to Southeast Alaska have changed over time.

Brief Overview of Alaska's Limited Entry Program

In 1973, the Alaska State Legislature enacted Alaska's Limited Entry Act (AS 16.43) for commercial fisheries. The law was passed at a time when the State's salmon stocks were very depressed. The act established a new agency, the Commercial Fisheries Entry Commission (CFEC), to administer a program to regulate entry into all commercial fisheries. Limited entry programs were implemented in 19 of the salmon fisheries in 1974.

By the end of 2007, permanent limited entry permits had been issued in 65 commercial fisheries: 26 salmon fisheries, 19 herring fisheries, 9 crab fisheries, 5 sablefish fisheries, 3 shrimp fisheries and 3 dive fisheries (sea urchin, sea cucumber, and geoduck). Through 2007, a total of 79 permit types have been issued in the 65 limited fisheries.¹

When a fishery is placed under limited entry, a maximum number of entry permits is established by regulation. By law, the maximum number can be no less than the highest number of units of gear fished in the fishery in any one of the four years immediately preceding the year that the fishery is limited.² Since the number of persons eligible to apply is typically greater than the maximum number, the law specifies that the commission should develop a hardship ranking system or "point system" to determine which of the eligible applicants should receive an initial permit allocation. While most entry permits initially issued in a limited fishery are permanently transferable, the law specifies that permits issued to persons in "minor hardship" point classifications should be nontransferable. The salmon hand troll fishery is an example of a fishery where large numbers of nontransferable permits were issued.

The number of limited entry permits held by persons in a community can change over time. The number can increase as new fisheries are limited and entry permits are initially issued. The number can also increase as permits are transferred to persons inside the community from persons outside the community, and decrease as permits are transferred from persons inside the community to persons outside the community. Similarly, the number of permits can increase as entry permit holders move into a community and decrease as entry permit holders move away from the community. Entry permits can also be cancelled or forfeited for a variety of reasons including non-renewal for two years. Forfeitures have been particularly common in the salmon hand troll fishery where a lot of nontransferable entry permits were issued.

¹ See Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2007 (CFEC 08-5N).

² The Southeast Dungeness crab pot fishery and the Southeast dive fisheries had different rules for qualification dates and maximum numbers because they were placed under limitation during moratoria established by the legislature. The moratoria laws provided that participation during the moratoria years could not count for a limited entry permit.

Overview of Limited Entry Permit Holdings in Southeast Alaska Communities

Table 1 provides a listing of Southeast Alaska communities and Southeast Alaska census areas. These communities are classified as either "rural" or "urban" based upon 2000 United States census classifications. The listing is first sorted by the rural/urban designation, next sorted in alphabetical order by census area within each designation, and finally sorted in alphabetical order by community within each census area.

Table 2 provides a listing of limited entry permit holdings by Southeast Alaska community over the 1975 through 2007 time period. The listing provides counts of entry permits held by permit fishery and year. The table includes holdings of entry permits from any limited fishery in the State and not just entry permits for Southeast Alaska limited fisheries. The table provides counts of permit holdings in ten-year increments over the 1975 through 2005 time period, and in one year increments over the 2005 through 2007 time period.³

Table 2 provides a succinct summary of how holdings of entry permits for different limited fisheries have changed over time in each community. As new fisheries are placed under limitation, entry permits are initially issued to those applicants who qualify. After the initial allocation, the holdings of entry permits in a community can change due to migration of permit holders, transfers of entry permits, or cancellation of entry permits.

For example, most communities show a large decline in holdings of salmon hand troll permits over time. This is in large part due to a gradual reduction in the large number of nontransferable permits that were issued in these fisheries. Many of these permits have been cancelled over time due to the death of the original permit holder or due to failure of the permit holder to renew the permit for a two year period. There were 2,161 entry permits initially issued in the salmon hand troll fishery but only 1,083 salmon hand troll entry permits remained at the end of 2007.

Changes in Limited Entry Permit Holdings in Southeast Alaska Communities, 1975-2007

³ Permit types which have zero permits listed in all years that appear in this table are included because a permit of this type was held by a community member at some point during a year or years not shown.

Reasons for Changes in Holdings of Entry Permits for Southeast Alaska Fisheries by Resident Type

Tables 3 through 5 examine the limited entry fisheries that occur in Southeast Alaska only and the holdings of those limited entry permits. The tables show the net ownership changes that have occurred among five resident types since the entry permits were initially issued.⁴ Five resident types are defined for this table as follows:

ARL: Alaska resident of a Rural community which is Local to the Southeast Alaska area

ARN: *Alaska* resident of a *Rural* community which is *Nonlocal* to the Southeast Alaska area

AUL: Alaska resident of an Urban community which is Local to the Southeast Alaska area

AUN: Alaska resident of an Urban community which is Nonlocal to the Southeast Alaska area

NON: *Nonresident* of Alaska.

The communities that are considered local to the Southeast Alaska area are shown in Table 1.

There are also limited entry permits held by the Department of Commerce, Community & Economic Development (DCCED- Division of Investments) and the Alaska Commercial Fishing and Agricultural Bank (CFAB). Entry permits are transferred to these agencies upon loan foreclosures and are later sold by the agencies to new holders.

As noted above, after entry permits are initially allocated, changes in permit holdings by resident type can occur for three reasons.

a. Migration of Permit Holders to a Different Resident Type

A permit holder can change his/her resident type by moving to a community of a different resident type. For example, a salmon hand troll entry permit holder from Angoon, who is classified as an ARL resident type, could move to Sitka and would then be classified as an AUL resident type.

⁴ Note that these are "net changes" over the time period specified. Permit transfers and migrations can move permits both to and from a resident type classification. Tables 3, 4, and 5 report the net result of all of the movements that have occurred between 1975 and 2007. Similarly, cancellations include the net results from both cancellations and reinstatements.

b. Transfers of Entry Permits

A permit can be transferred from a person of one resident type to a person of another resident type. For example, a Southeast Alaska salmon seine permit holder from Juneau, who is classified as an AUL resident type, could transfer his entry permit to a person in Anchorage, who would be classified as an AUN resident type.

c. Cancellations

Entry permits in a community can be reduced due to permit cancellations. Permit cancellations can occur for a variety of reasons. As noted above, the failure to renew a permit for two years can result in a forfeiture of the permit. ⁵ Similarly, the death of a holder of a non-transferable entry permit results in the cancellation of the permit.

Table 3 shows the net changes that have occurred in permit holdings by resident type through 2007 due to <u>migration</u> of entry permit holders. A permit holder can change his/her resident type by moving to a community of a different resident type. For example, a salmon hand troll entry permit holder from Angoon, who is classified as an ARL resident type, could move to Sitka and would then be classified as an AUL resident type.

As Table 3 indicates, between 1975 and 2007, communities that are local to limited Southeast Alaska fisheries experienced a net decline in the number of permit holders due to persons moving to communities that are nonlocal to Southeast Alaska. ARLs have had a net decline of 144 permits and AULs have had a net decline of 109 permits due to permit holder migration over this time period.

ARNs showed a net decline of 2 permits due to migration. The other two resident types showed net gains in permits for limited entry fisheries in Southeast Alaska due to migration. Nonresidents have had a net increase in 206 permits and AUNs have had a net increase of 49 permits over the 1975 through 2007 time period.

Table 4 shows the net changes that have occurred in permit holdings by resident type over the 1975 through 2007 time period due to <u>permanent transfer</u> of entry permits across resident types. A permit can be transferred by a person of one resident type to a person of another resident type. For example, a Southeast Alaska salmon seine permit holder from Juneau, who is classified as an AUL resident type, could transfer his entry permit to a person in Anchorage, who would be classified as an AUN resident type for these Southeast fisheries.

As Table 4 indicates, rural communities that are local to limited entry Southeast Alaska fisheries have seen a net decline in permits for these fisheries over the 1975 through 2007 time period due to permit transfer activities with the other resident types. In total across all Southeast Alaska limited fisheries, ARLs have had a net decline of 28 permits over the entire time period due to permanent transfers.

Changes in Limited Entry Permit Holdings in Southeast Alaska Communities, 1975-2007

⁵ Note that reinstatements sometimes occur for a good cause.

Table 5 summarizes the "net" changes in permit holdings due to transfers, migrations, and cancellations that have occurred through 2007 by resident type. Note that net changes due to transfers and migrations "cancel out" across resident types, since a decline in the holdings of one resident type is offset by gains in holdings by the other resident types. In contrast, cancellations reduce the number of entry permits in a fishery.⁶

The biggest decline in ARL held permits as the net result of permit transfers was in the Southeast Alaska salmon purse seine fishery (-66 permits) and the biggest gain in ARL held permits as the net result of permit transfers was in the Southeast Alaska salmon power troll fishery (+73 permits).

In contrast, communities that are urban and local to Southeast Alaska limited entry fisheries (AULs) have had a net gain of 146 permits for these fisheries due to permit transfers. The biggest gains for AULs due to net transfer activity over the time period occurred in the salmon power troll fishery (+60 permits) and the Southeast Alaska salmon purse seine fishery (+60 permits). The biggest decline for AULs due to net transfer activity occurred in the Southeast Alaska salmon hand troll fishery (-32 permits).

Nonresidents had the largest decline in permit holdings (-167 permits) for limited Southeast Alaska fisheries due to net transfer activities over the time period. AUNs (+13 permits) and ARNs (+34 permits) had small gains in permits as the net result of permit transfers.

-

⁶ Note that these are "net changes" over the time period. Permit transfers and migrations can move permits both to and from a resident type classification. Tables 3, 4, and 5 are reporting the net result of all of the movements that have occurred over the 1975-2007 time period. Similarly, cancellations include the net results from both cancellations and reinstatements.
