## 6 Types of Transfers, Financing of Transfers, Relationships Between Transferors and Transfer Recipients, and Use of Brokers

This chapter uses information collected during QS transfers to classify transactions by type of transaction. Transfers were classified as "priced sales," "gifts," "other sales," "trades," and "unknown." The chapter examines the extent to which different financing sources were used in priced transfers, the relationships between parties to transfers, and the extent to which brokers are involved in transfers.

All permanent transfers or leases of QS must be reviewed and approved by NMFS. Persons involved in the transfer or lease of QS are required to complete and submit a transfer application to NMFS-RAM. Part of this application is to be filled out by the transferor and part of it is to be filled out by the transfer recipient. In some cases, brokers help to complete these forms. The transfer application form asks some basic questions to help NMFS monitor changes under the IFQ program. Appendix II provides copies of the transfer applications used from 1995 through 1998. Data from the transfer application form has been used for the analyses in this chapter. ${ }^{47}$

### 6.1 Sales, Gifts, Trades, and Other Transfers

The transfer application form did not specifically ask if a QS transfer was a sale, gift, or trade. Without this information, the authors had to use other available transfer form information and some decision criteria to decide how transactions should be classified. For example, on the transfer application persons often indicated whether or not a transfer was a gift when they answered one of the open ended questions such as, "What is your reason for transferring the QS and/or the IFQ...?" and "If this is a purchase of QS or IFQ, how are you financing the purchase...?" Respondents often answered these questions by writing in "gift," "gift transfer," "gift to son," or a similar answer.

The transfer transactions were divided into one of five categories:
Priced sales includes all transfers where a price for the QS transferred could be obtained from the transfer application form

Other sales includes transfers where some monetary exchange occurred, but where NMFS-RAM could not calculate a price for the QS based on available information

Trades includes transfers where something was traded for the QS

[^0]Gifts includes transfers noted as gifts where there was no evidence of a reciprocal exchange

Unknown includes transfers where no information was provided or insufficient information was provided to classify the transaction

In 1997 NMFS-RAM revised their transfer application forms to provide more detail on gift and trade transactions. With these changes it was possible to reduce the percentage of observations assigned to the "unknown transaction type" category and increase the numbers assigned to "gifts" and "trades." Because of these refinements, the data series may not be comparable between 1995-1996 and 1997-1998. The numbers of observations assigned to the "priced" category were not affected and this series should be comparable for the 1995-1998 period.

Table 6-1a provides data on the amount of QS transferred in permanent transactions from 1995 through 1998 by management area and the type of exchange. The first columns show the total amount of QS transferred in priced sales, and the percent of all QS transferred by priced sales.

The "priced sales" category was the predominate class of permanent transfers. In all six of the management areas "priced sales" accounted for over $50 \%$ of the QS transferred during the four years. In five of the areas it was over $60 \%$ of the QS transferred during the four years.

The total percentages of QS transferred through sales are higher than indicated by the percentages for "priced sales" since the "other sales" category and, probably, some of the "unknown" transfers were also sales transactions. The percentage of QS transferred in "priced sales" generally rose over the first three years, then fell considerably in 1998.

The remaining columns show the amount and the percentage of each area's QS transferred in "other sales," "trades," "gifts," and "unknown" transaction types. As noted earlier, because of changes in the available data it is difficult to interpret the change in the percentage of "gifts," "trades," and "unknown" transactions. Therefore, this summary will focus on amounts of QS by type in 1997 and 1998.

In 1997 and 1998, the percentage of QS transferred in "other sales" ranged from zero in a number of area-year combinations up to $13.7 \%$ in the Western Gulf in 1997. The percentage of QS transferred in "trades" ranged from zero in several area-year combinations up to $37.9 \%$ in the Aleutian Islands in 1998 The percentage of QS transferred as "gifts" ranged from zero in two area-year combinations up to $21.9 \%$ in the Bering Sea area in 1997. The percentage of QS transferred in "unknown" transactions ranged from zero in the Bering Sea area in 1997 to $81.1 \%$ in the Bering Sea area in 1998.

Table 6-1b provides information on the number and percentage of sablefish transfer transactions (as opposed to QS transferred) that were classified as priced sales, other sales, trades, gifts, or unknown. Transfer transactions are distributed roughly in the same fashion as QS transferred. However, differences exist since the amount of QS transferred can vary widely across transactions.

Table 6-1a. Sablefish QS Transfer Activity by Area, Year, and Nature of the Transfer

### 6.2 Finance Source on Priced Sales Transfers

The transfer application form asks for the "primary" source of financing for the transfer. Possible sources listed on the form include personal, bank, Alaska Department of Commerce and Economic Development (DCED) or Commercial Fishing and Agriculture Bank (CFAB), seller, processor, and other. In many cases persons indicated more than one source of financing. In other cases application forms had missing information.

The transfer form did not ask for the proportions of financing derived from different sources. This means that if personal financing and bank financing were both used on a particular transaction, it would be impossible to determine what proportion of financing was derived from each source.

Table 6-2a provides information on the sources used to finance QS transferred in "priced sales" transactions in 1995-1998. The table provides data on the amount and percentage of QS transferred under each finance method. These data are reported by area. Since some reported more than one finance method used, the row percentages in the table total more than $100 \%$.

Personal resources and banks were the most important sources of financing. Personal resources were the most widely used financing method for QS in the Southeast, West Yakutat, Central Gulf, Western Gulf, and Aleutian Islands areas over the four year period. Banks were the most important source in the Bering Sea area during the four years. The percent of QS financed with personal resources ranged from $22.9 \%$ in the Bering Sea area up to $54.3 \%$ in the West Yakutat area during the four years. The percent financed by banks ranged from $27.4 \%$ in the Southeast area to $55.5 \%$ in the Bering Sea area during the period.

The other financing methods were generally used for less than $10 \%$ of the QS over the four-year period. Exceptions are "seller financing" in the Southeast, Central Gulf, Bering Sea, and Aleutian Islands areas and "other financing" in the Bering Sea and Aleutian Islands areas.

Table 6-2b also provides information on the sources used to finance QS transferred in "priced sales" transactions in 1995-1998. However, while Table 6-2a provides information on the amount and percentage of $Q S$ transferred, Table 6-2b provides information on the number and percentage of QS transfers under each finance method.

As in Table 6-2a, these data are reported by area. Again, since some persons reported more than one finance method used, the row percentages in the table may total more than $100 \%$. The data in this table are generally consistent with that in Table 6-2a. Personal resources are the most important finance method, followed by banks, seller financing, and other methods.

### 6.3 Relationship of Buyer and Seller on Permanent Transfers

This section examines the relationship between transferors and transfer recipients in permanent QS transfers. In the tables in this section these categories were designated as "partner," "family," "friend," or "none." Note that these tables should be read with caution because the actual categories on the NMFS-RAM transfer application form changed over the time period. ${ }^{48}$

Table 6-3a provides a summary of the responses to this question for all QS transfers recorded as transfer, sweep-up, spousal, and court transactions on the NMFS-RAM data base. The data are provided by management area and show the amount of QS involved in transfers based upon the relationship between the buyer and seller.
"None" or "No relationship" was the most likely response in all areas. In all six management areas where permanent QS transfers occurred during the four-year period, $50 \%$ or more of the QS transferred moved between persons indicating "no relationship." In four of the management areas the four-year average was over $60 \%$.

The table should be read cautiously because many respondents did not answer, especially in 1995. What may appear to be a change in the QS transferred in a relationship category may in fact be due to a reduction in missing data in 1996 and 1997.

Table 6-3b provides similar summary data but focuses on the number of transfer transactions rather than on the amount of QS involved in the transactions. The results are similar to those in Table 6-3a. In all areas over $50 \%$ of the four-year transfers are between parties with "no relation." In four of the six management areas the percentages for "no relation" are over 60\%.

### 6.4 Use of Broker Services in Permanent QS Transfers

The transfer forms asked whether or not a broker was involved in the transfer. The tables in this section look at broker involvement in permanent transfers of QS. The next section looks at broker involvement in leases. These sections report the proportions of transfers and leases being facilitated by a broker.

Table 6-4a provides information on the use of brokers by year. The table provides data on the amount of QS transferred with the help of brokers in each year, and the percentage that amount represents of all of the QS transferred. The table also has data on the number of QS transfers involving a broker and the percentage those transfers represent of all QS transfers.

Brokers were involved in a large proportion of the permanent transfers and the percentage of transactions involving brokers grew in each year. Table 6-4a shows that annual broker involvement ranged from $38.8 \%$ of the transactions in 1995 to $60.2 \%$ in 1997. The amount of QS transferred with the help of a broker ranged from $44.9 \%$ in 1995 to $72.3 \%$ in $1997 .{ }^{49}$

Table 6-4b is similar to Table 6-4a, except that it provides information on the use of brokers by management area as well as by year. The table provides data on the amount and percentage of QS transferred with the help of brokers. The table also provides data on the number of QS transfers involving a broker and the percentage those transfers represent of all QS transfers.

As can be seen, brokers were involved in a large proportion of the transactions in all areas and years. The lowest percentage of transactions conducted with the help of brokers was in the Aleutians area in 1995, when only $20.0 \%$ of the transactions involved brokers. The highest level of broker involvement came in the Bering Sea area in 1997 when $70.0 \%$ of the transactions involved brokers.

Table 6-4c provides similar information on the use of brokers over all areas by vessel category and year. ${ }^{50}$ Brokers were involved in large proportions of transactions in all vessel classes and years. The lowest percentage of transactions conducted with the help of brokers was for catcher vessels greater than 60 feet in $1995(28.0 \%)$ while the highest level of broker involvement was for freezer vessels in 1996 (88.2\%).

[^2]Table 6-4a. Use of Brokers in Sablefish QS Permanent Transfers, By Year

| Year | Was a <br> Broker <br> Used? | QS <br> Transferred | Total <br> Annual QS <br> Transferred | Percent of <br> Annual QS <br> Transferred | Number of <br> Transactions | Total Annual <br> Transactions | Percent of <br> Annual <br> Transactions |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 1995 | No | $12,168,638$ | $22,065,416$ | 55.1 | 233 | 381 | 61.2 |

|  | Yes | $18,640,899$ | $26,120,387$ | 71.4 | 203 | 381 | 53.3 |
| 1997 |  |  |  |  |  | 467 | 39.8 |
|  | No | $8,139,802$ | $29,352,033$ | 27.7 | 281 | 467 | 60.2 |
| 1998 |  |  |  |  |  |  | 212,231 |

Broker usage rates are calculated over all sablefish areas. Note that while these rates are calculated over all sablefish areas, the QS for different areas are not equivalent with respect to current year IFQ associated with the QS. Therefore, rates calculated across areas in current-year equivalents would be different that the rates shown here.

### 6.5 Use of Broker Services in Lease Transfers

Table 6-5a shows the extent to which brokers helped arrange leases of QS by year. In this table QS and transfers are summed across all management areas. ${ }^{51}$ Data are provided on the amount of QS leased with broker help in each year, the percent of all QS leased that was leased with broker assistance, the number of leases in which brokers helped, and the percent of all leases assisted by brokers. ${ }^{52}$

Brokers helped arrange large proportions of the leases in each year. They were involved with a low of $35.1 \%$ of the leases in 1995 and a high of $56.0 \%$ in 1997. Leases arranged by brokers accounted for a low of $34.4 \%$ of the total QS leased in 1998 and a high of $74.6 \%$ of the QS leased in 1997.

Table 6-5b shows the extent to which brokers helped arrange the leases of QS by management area and year. The data in this table is similar to that provided in Table 65 a . The table provides data on the amount and percentage of QS leased with the help of brokers. The table also provides data on the number of QS lease transactions involving a broker.

As can be seen, brokers were involved in a large proportion of the lease transactions in most areas and years. The lowest percentage of leases conducted with the help of brokers was in the Central Gulf in 1996, when only $15.4 \%$ of the lease transactions involved brokers. The highest level of broker involvement came in the Western Gulf in 1996 when $100 \%$ of the leases involved brokers.

[^3]Table 6-5a. Use of Brokers in Sablefish QS Leases, By Year

| Year | Was Lease Brokered? | $\begin{array}{r} \text { QS } \\ \text { Leased } \end{array}$ | Total Annual QS Leased | Percent of Annual QS Leased | Number of Leases | Total Annual Leases | Percent of Annual Leases |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1995 | No | 8,753,538 | 17,221,961 | 50.8 | 50 | 77 | 64.9 |
|  | Yes | 8,468,423 | 17,221,961 | 49.2 | 27 | 77 | 35.1 |
| 1996 | No | 3,083,823 | 11,299,983 | 27.3 | 33 | 51 | 64.7 |
|  | Yes | 8,216,160 | 11,299,983 | 72.7 | 18 | 51 | 35.3 |
| 1997 | No | 3,307,521 | 13,011,461 | 25.4 | 22 | 50 | 44.0 |
|  | Yes | 9,703,940 | 13,011,461 | 74.6 | 28 | 50 | 56.0 |
| 1998 | No | 8,504,242 | 12,973,226 | 65.6 | 29 | 57 | 50.9 |
|  | Yes | 4,468,984 | 12,973,226 | 34.4 | 28 | 57 | 49.1 |

QS were added across management areas to prepare this table. Since the pounds of IFQ per QS unit can vary across management areas and between years, the QS percentages reported in this table may be different from the IFQ equivalent percentages.

Table 6-5b. Use of Brokers in Sablefish QS Leases, by Area and Year

| Area | Year | Was Lease Brokered? | QS Leased | Total Annual QS Leased | Percent of Annual QS Leased | Number of Leases | Total Annual Leases | Percent of Annual Leases |

[^0]:    ${ }^{47}$ There have been some changes in the survey from one year to another. These are discussed in this chapter where they may be significant.

[^1]:    ${ }^{48}$ The relationship question on the transfer application form changed between 1995 and 1996. In 1995 respondents were given a choice of "No relationship," "Business Partner," "Personal Family Member," and "Other Friend or Relative." In 1996 "Personal Family Member" became "Family Member," "Other Friend or Relative" became "Friend," and an "Other" category was introduced.

[^2]:    ${ }^{49}$ These figures are based on summing QS amounts and QS transfers across areas. Recall that QS units are not comparable across areas.
    ${ }^{50} \mathrm{The}$ comment in the previous footnote applies to this table as well. These figures are based on a summation of QS amounts and QS transfers across areas. QS are not comparable across areas.

[^3]:    ${ }^{51}$ These figures are based on summing QS amounts and QS transfers across areas. Recall that QS units are not comparable across areas.
    ${ }^{52}$ This report uses the QS amounts shown in lease transactions on NMFS-RAM computerized files. In a few cases, these transactions appear to be in error with respect to the actual amount of QS leased relative to the IFQ involved. For that reason, the QS lease rates shown herein may be slight overestimates.
